INTRODUCTION

Following a several month long growth, yield rates on ten year bond markets of the EU countries during the previous two months recorded volatile trends (Graph 1). Since September, the ECB raised key interest rates, as a response to continuing significant growth of average consumer prices, with food and energy prices still making a prevailing pressure on the overall level of consumer prices in the euro area (Graph 2). In August, a record high growth of average consumer prices was seen in BH (Graph 3). Compared to the previous month, both RR base and excess holdings above RR increased, and since 01 September 2022, a new Decision on setting and maintaining required reserves and setting remuneration on banks' reserve accounts with the CBBH is applied (Graph 4). A growing risk from slowdown of economic activity resulted in decreased oil prices in global markets, with gas prices in Europe still staying under the pressure of the war in Ukraine (Graph 5). Imports of goods in August in BH also increased significantly, with the most significant annual increase recorded for mineral origin products, due to the growth of prices of oil and oil derivatives (Graph 6). The growth of prices also impacted a strong growth of net revenues from indirect taxes, particularly revenues from excise duties which recorded a significant growth both on annual and monthly levels (Graphs 7 and 8). Foreign debt

repayment in per cents of exports was within usual monthly oscillations (Graph 9). Industrial production, and producer prices of industrial products for overall industry, recorded annual growth in August, but also a decline on monthly level (Graphs 10 and 11).

The trend of very high growth rates of export value continued in August (Graph 12). Over the observed period, there was a significant monthly growth of deposits, while the total loans in August did not record any significant oscillations (Graphs 13 and 14). In August, an increase in yields to maturity on the primary market of the public debt of Republika Srpska continued (Graph 15). Compared to the previous month, both monetary liabilities and foreign exchange reserves recorded increases, with positive monthly balance of purchases and sales with commercial banks and internal depositors (Graph 16). The highest contribution to the monthly growth of reserve money was that of the growth of banks' deposits with monetary authorities, while monetary multipliers did not record any significant oscillations (Graph 17). In August, KM recorded nominal annual depreciation in relation to all the most significant currencies in the world, resulting from depreciation of our peg currency EUR (Graph 18).

G01: Yield to Maturity Rates in the Ten Year Bond Markets of the European Union Countries

Source: ECB

Following a several month long growth, yield rates on ten year bond markets of the EU countries during the previous two months recorded volatile trends. The strongest August and July decrease took place in the countries with the highest yield to maturity rates (Romania, Poland, Hungary), and also in several countries with moderate yield to maturity rates (Croatia, Slovenia, Cyprus). On the other hand, in Greece and Sweden, yield to maturity rates increased, while the highest growth was seen in Great Britain (19 bp). Difference in yields on Greek and German ten year bonds in August was 243 bp, being higher by 76 bp compared to the end of the previous year.

G02: Annual Change of Average Consumer Prices in the Selected Countries

Source: BHAS, EUROSTAT

The inflation recorded in the euro area in August was 9.1%, this being the record high for the ninth successive month, with energy and food prices still making a prevailing pressure on the overall level of consumer prices. Almost half of the total inflation in the euro area was related to energy, and according to individual consumption classification, electric energy, gas and other fuels saw the record annual growth of 51.9%. Drought and other adverse weather conditions brought about further growth of food prices, with the EU food prices reaching annual growth of 14.0%.

As a step for returning the inflation level back to medium term target level, since September, the ECB increased key interest rates by 75 basis points, and announced several additional increases in the period ahead, as high inflation level would probably stay for a longer period. The FED also increased interest rates again in September by 75 basis points, which was the fifth increase this year.

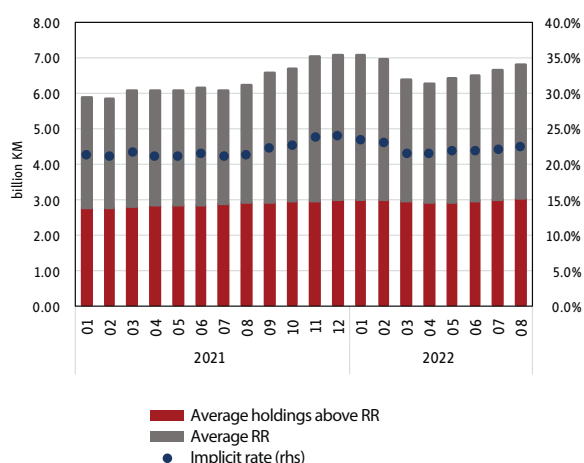

G03: Annual Consumer Price Change by Categories, during the First Eight Months

Source: BHAS

In August, the record high growth of average consumer prices, being 16.8% at the annual level, was seen, mainly arising from further considerable growth of prices of raw materials, energy and food. The most significant annual growth was seen in the price category of transport, however, a decline of prices of 3.8% was recorded in this category at the monthly level. Food and utility costs in August also saw a record high annual price growth of 25.6% and 17.4%, respectively. The strongest pressure on the overall consumer price growth came from the prices of food and non-alcohol beverages, so, almost half of the total inflation applied to this price category, with more than 8 percentage points in the end of August. On the other hand, clothes and footwear recorded a continuous price downward trend.

G04: Reserve Accounts with the CBBH

Source: CBBH

Compared to the previous month, both the RR base and excess holdings above RR recorded growth so the total holdings in reserve accounts with the CBBH in August amounted to KM 6.81 billion. As a result of the increase in the RR base, the average required reserve in August amounted to KM 3.04 billion, which indicates that bank deposits, after a considerable decrease in the beginning of the year, were increasing continually. In this regard, the implicit required reserve rate at the end of August was 22.39%. Compared to the previous month, excess holdings above RR increased by KM 197 million. Due to the amendment of remuneration policy and adoption of the Decision on setting and maintaining required reserves and setting remuneration, since 01 August 2022, remuneration rate of -0.25% is applied on holdings above required reserve in banks' reserve accounts with the CBBH, while that on the base in foreign currency is -0.10%, with the required reserve rate staying unchanged at 10%.

G05: Annual Changes of Prices of Selected Goods

Source: www.treadingeconomics.com, www.fao.org

Increase of benchmark interest rates of leading central banks and fear of investors that higher borrowing costs could decrease economic growth, brought about a decline of stock exchange prices of oil and food products. In mid August, oil price for September deliveries reached almost 90 USD/barrel, this being the lowest price since the end of February. According to the data of the UN Food and Agriculture Organisation, global food prices in August decreased for the fifth successive month, still being higher by around 8% than in the previous year. Decline of prices of cereals and vegetable oils reflected resumption of exports from the Black Sea harbours of Ukraine, and increased supply of palm oil from Indonesia. On the other hand, energy crisis and decreased inflow of natural gas from Russia to Europe raised the gas price on stock exchanges in August by 22.3% compared to the previous month. As a response to European sanctions, Russia ceased the flow of gas through the gas pipeline Nord Stream I, while transit through Ukraine was also decreased significantly.

G06: Imports by the Main Product Groups, Annual Changes

Source: BHAS

The value of imported goods in August amounted to KM 2.35 billion, which is annual growth of 33.7%, mainly resulting from price effect. The highest annual growth rate in August was seen in imports of mineral origin products (81.3%), with most of it related to imports of oil and oil derivatives, resulting only from price growth. Imports of base metals recorded annual growth of 32.8%, out of it, aluminium and its products recorded a significant quantity growth as well. In addition to the above, other significant product groups recorded annual growth of import value: food products (33.8%), machines and appliances (28.8%) and chemical industry products (9.1%).

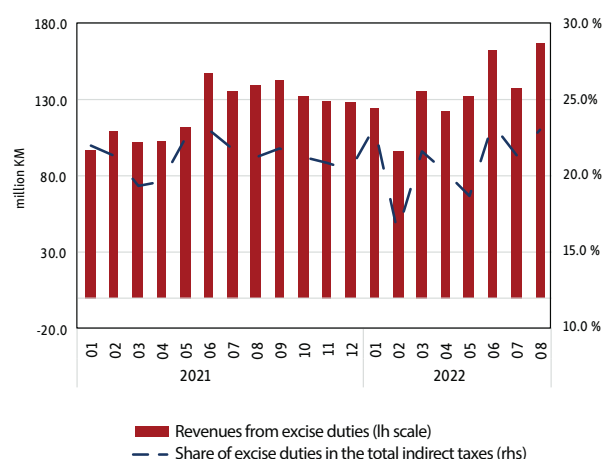

G07: Monthly Changes of Indirect Taxes

Source: Indirect Taxation Authority

In August, a strong increase in net revenues from indirect taxes was recorded on a monthly basis. In the first eight months of 2022, cumulative net revenues from indirect taxes amounted to KM 5.12 billion, which represents an increase of KM 703.0 million (15.9%) on an annual basis. The mentioned increase in revenues is primarily a reflection of inflation, which significantly influenced the strong growth of revenues on this basis. On a monthly basis, the growth of net revenues in August amounted to KM 78.9 million (12.2%). Returns in the first eight months of 2022 amounted to KM 1.32 billion and were higher by 39.0% compared to the same period of the previous year.

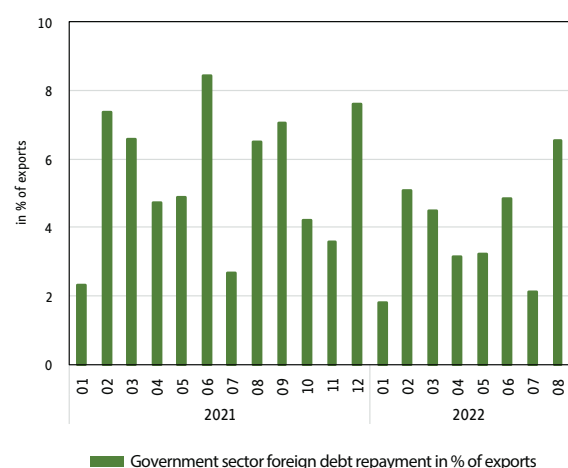

G08: Revenues from Excise Duties, Share in Indirect Taxes

Source: Indirect Taxation Authority

Revenues from excise duties recorded significant increase in August both on monthly and on annual level. In the first eight months, cumulatively, KM 1.08 billion was collected net on the basis of excise duties, which is higher by KM 131.5 million (13.9%) compared to the same period of the previous year. Continuation of very positive trends in the collection of excise duties resulted from a strong impact of energy prices growth. However, in the period ahead, lower amounts of collection of these revenues are expected, if provisional ban on excise duties on fuel becomes effective.

G09: Foreign Debt Repayment

Source: CBBH

Foreign debt for general government sector is serviced from indirect tax revenues. Revenues on this basis have an upward trend, so foreign debt repayment, in medium term, is stable. Foreign debt repayment in per cents of exports is within usual monthly oscillations, amounting to 6.5% of exports in August.

G10: Annual Change of Industrial Production by Areas

Source: BHAS

Industrial production in August recorded moderate growth at the annual level, but also decline of 4.0% at the monthly level. For the first eight months of the current year, the overall industrial production recorded growth of 2.9% compared to the same period of the previous year. In the end of August, activities of mining and manufacturing industry recorded annual growth, while production and supply of electric energy and gas decreased sharply. Observed by the main industrial groups, the strongest annual growth of 16.7% in August was seen for capital products, while durable consumer products recorded the strongest annual decline.

G11: Annual Changes in Producer and Consumer Prices

Source: BHAS

For the first eight months of the current year, producer prices of industrial products increased by 19.5% compared to the same period of the previous year. In the end of August, producer prices of industrial products for overall industry recorded annual growth of 21.7%, but also a decline of prices of 0.3% compared to the previous month. The growth of prices particularly standing out was that in industrial groups of energy and intermediate products reaching 28.2% and 23.5% at the annual level in the end of August, respectively. By industrial areas, the highest growth of the price level was recorded in mining, amounting to 24.2% at the annual level. On the other hand, average consumer prices saw a record high growth at the annual level, but also a much slower growth of 0.3% at the monthly level.

G12: Exports by the Main Product Groups, Annual Changes

Source: BHAS

Exports of goods from BH in August amounted to KM 1.34 billion, which is an annual growth of 23.9%. The highest annual growth rate in August was seen in exports of mineral origin products (80.3%), the largest part being related to exports of electric energy. Exports of base metals recorded annual growth of 27.2%, out of it, iron and steel products also recorded a significant quantity growth. The growth of value of exports was also seen with chemical industry products, and machines and appliances, while the annual decline of export value was seen for wood and wooden products, and exports of furniture. Decline of value of exports of wood and wooden products, as one of the most significant export groups of products, resulted from provisional ban on exports, aimed at meeting the needs of local demand.

G13: Annual Growth Rates of BH Banks' Deposits

Source: CBBH

In the reporting period there was a significant monthly growth of deposits (1.85%), similar to that recorded in May by intensity. Contribution of transferable deposits in the total monthly growth of deposits was 1.5 pp, while that of other deposits was 0.35 pp. The growth in May was a consequence of the earlier mass withdrawal of deposits, while in August the base effect had no impact on deposit changes. Monthly growth of the total deposits (KM 520 million) was mainly contributed by deposits of households and deposits of non-financial companies. Having in mind the absence of considerable changes in monthly lending dynamics, a part of deposit growth was a consequence of the return of deposits previously withdrawn from banking sector. There was still a significant difference in annual growth rates of deposits of non-financial private companies and household sector, but on the average, the total deposits significantly exceeded the pre-crisis January level, by 2.3%.

G14: Annual Credit Growth Rates in Bosnia and Herzegovina

Source: CBBH

Although a significant monthly growth of deposits was recorded, the pace of lending did not change significantly compared to the previous month. The total loans in August increased both at the annual and monthly level, by 4.7% and 0.2% respectively. Loans to non-financial private companies still recorded moderate growth rates at the annual level, however, they declined in August (m/m-1). The seventh month of successive credit growth of household sector started (0.3% in August), while the highest contribution to the growth came from consumer non-purpose loans and housing loans for purchase or construction of new housing units.

G15: Issues of Republika Srpska Five Year Bonds

Source: BLSE

In August, the growth of yield to maturity rates in public debt market of Republika Srpska continued. Except for 2014, the yield to maturity rate and coupon interest rate of 5% were the highest so far in the market segment of five year bonds of Republika Srpska. Compared to July issue, yield to maturity rate and coupon interest rate were higher by 50 bp and 100 bp respectively. Observed by the lowest values, bid to cover ratio of Republika Srpska issues continued to increase, still significantly lagging behind the maximum values. The Federation of Bosnia and Herzegovina in August cancelled the planned issue of three year bonds.

G16: The CBBH Foreign Exchange Reserves

Source: CBBH

In August 2022, foreign exchange reserves recorded an annual growth of KM 1.02 billion, however their annual growth slowed down. Compared to the end of 2021, foreign exchange reserves were higher by KM 175 million, while monetary liabilities in the same period increased by KM 435 million due to the increase of bank deposits, and consequently, reserve accounts with the CBBH. Consequently, the currency board coverage ratio in the end of August was 103.20%. In addition to the faster increase of monetary liabilities, the fall in the coverage ratio is also a consequence of the effects of market movements on the value of the foreign exchange reserves portfolio. Compared to the previous month, both monetary liabilities and foreign exchange reserves recorded increases of 356 million and 257 million respectively, and the monthly balance of purchases and sales with commercial banks and internal depositors was positive in August in the amount of KM 324.4 million. In the period ahead, other changes and expected additional measures of leading central banks will influence the value of invested foreign exchange reserves of the CBBH.

G17: Reserve Money and Monetary Multiplication

Source: CBBH

The major contribution to monthly growth of reserve money in August came from the increase of bank deposits with monetary authorities in the amount of KM 270.2 million. After a significant decrease of bank deposits with monetary authorities in the beginning of the year, since April, this component of reserve money recorded growth, amounting to KM 7.16 billion in the end of August. Compared to the same period last year, the reserve money increased by KM 1.45 billion. Due to changes in reserve money as well as in monetary aggregates recorded during August, monetary multipliers did not record significant oscillations. The upward trend of monetary aggregate M2 was present in August mainly under the impact of the growth of transferable deposits in the local currency (KM 461 million).

G18: Annual Changes in Foreign Exchange Rate, August 2022

Source: CBBH

In August, at the annual level, KM nominally appreciated in relation to Turkish lira by 83.0%. The nominal appreciation of KM was caused by the significant nominal appreciation of EUR, our anchor currency, against the Turkish lira. On the other hand, KM recorded annual nominal depreciation in August in relation to all the most important currencies in the world. Depreciation of KM resulted from depreciation of EUR, our peg currency, which, due to the fear that increased energy prices could lead the euro area to prolonged economic crisis, in August recorded one of the weakest exchange rates in its history. So, over the observed period, KM recorded annual depreciation in relation to US dollar by 13.9%, Swiss franc by 10.0% and Chinese yuan by 9.7%.

Notes applicable for tables 4, 5, 7, 8, 9, 10, 11, 12 i 13.

Since 01 July 2017, the status change of the merger of subsidiary company UniCredit Leasing d.o.o. Sarajevo to the company Unicredit Bank d.d. Mostar has taken place. Accordingly, Unicredit Leasing d.o.o. Sarajevo has stopped existing as of 30 June 2017 and the data on the merged company are presented within the report on UniCredit Bank d.d. Mostar, starting from the report for July 2017.

The revised data for the period January 2006 – November 2015 are based on the active sub-balance of the banks with majority state owned capital from the Federation of BH, with the passive sub-balance excluded. Through such supplement of statistics, the users are provided with higher analytical usefulness of data and objective indicators on the current operations of banks in BH. Passive sub-balance includes the liabilities based on foreign loans and old foreign exchange savings of citizens until 31 March 1992 and it does not reflect the current operations of the bank, so this sub-balance in the privatization process will be taken over by the Ministry of Finance of FBH according to the Law on Initial Balance Sheets of Banks and the Law on Privatization, as it has been done for the previously privatized banks. The performed revision mainly influenced the decrease of loans to public companies in a foreign currency, decrease of foreign liabilities, decrease of other items of assets and liabilities on the basis of old foreign exchange savings, and in considerably lower amounts, on items of loans to the Entity Government, fixed assets, non-residents' deposits, shares and capital.

The data on the „complete“ balance sheet, with the included passive sub-balance, are still available at: http://statistics.cbbh.ba:4444/Panorama/novaview/SimpleLogin_bs.aspx

In November 2014, two banks have realized the sale and transfer of part of the loan portfolio which resulted with increase in reserves with monetary authorities in the amount of 64 million KM and a decrease in the following items: claims of non-financial private enterprises 260 million KM, foreign liabilities 101 million KM and other items (net) 95 million KM.

Due to the application of International Accounting Standards (IAS) and the International Financial Reporting Standards applied in BH Federation banks and the transfer of money flows in December 2011 data, the following changes have occurred at the assets side: decrease of loans by KM 155 million, an increase in other assets by KM 10 million, at the liabilities side: decrease of liabilities to non-residents in the amount of KM 624 million, an increase in loan loss provisions by KM 472 million and other liabilities increased by KM 7 million.

In February 2011, one bank from BH Federation reclassified deposits in the amount of around KM 80 million, from the deposits of public companies to the Entities' governments deposits, in line with the IMF recommendations.

By order of the FBH Banking Agency, in June 2010, one bank made a reclassification of about KM 300 million of claims based

on securities on domestic institutional sectors to the claims on non-residents. In December 2010, the same bank made this reclassification, retroactively, in the respective amounts for the period from August 2009 when the error occurred, until May 2010. The above reclassification was reflected in the increase in foreign assets and decrease in other items net.

One bank from FBH made a reclassification of financial instruments in the foreign assets amounting to about KM 40 million for the period January - August 2010. Claims on non-residents based on loans were reclassified in claims on non-residents on the basis of securities, which resulted in changes in the short- term and long-term foreign assets.

By order of the Banking Agency of Republika Srpska one bank made a reclassification of financial instruments on the liabilities side, for the period of September 2008 - November 2010, i.e.. the decrease in time and savings deposits of non-bank financial institutions and government sector, and the increase in loans from the same sectors, respectively, in the appropriate amounts, by months, ranging from 50 - 150 million KM.

In accordance with new regulations of the RS Banking Agency, published in the Official Gazette of RS, no.136/10, which has regulated a new manner of recording receivables classified in category "E", accounting and bookkeeping of interest on non-performing assets and calculation of general and special provisions, RS banks, in the data for December 2010, implemented the mentioned regulations, by transferring these items from off-balance records into balance sheet. The correction was reflected on the assets side, as increase of loans in the amount of about KM 144 million, and increase of due interest in the amount of KM 36 million, and on the liabilities side, as increase in provisions for loan losses amounting to about KM 180 million within the capital account.

By order of the Banking Agency of Republika Srpska, one bank made a reclassification of financial instruments on the liabilities side, for the period of September 2008 - November 2010, i.e. decrease in time and savings deposits of non-bank financial institutions and government sector, and the increase in loans from the same sectors, respectively in the appropriate amounts, by months, ranging from KM 50 - 150 million.

According to new regulations of the RS Banking Agency, published in the Official Gazette of RS no.136/10, which have defined a new way of recording claims classified in category "E", accounting and recording of interest on non-performing assets and calculation of general and special provisions, RS banks, in the data for December 2010 implemented the mentioned regulations, by transferring these items from off-balance records into balance sheet. The correction was reflected on the assets side, as increase of loans in the amount of KM 144 million, and increase of due interest in the amount of KM 36 million, and on the liabilities side, as increase in provisions for loan losses amounting to KM 180 million within the capital account.

Note:

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Gross foreign reserves consist of balance sheet positions of short-term foreign assets of the CBBH (gold, CBBH SDR holdings, foreign exchange in the CBBH vault, transferable deposits in foreign currency with non-resident banks and other) and investment in securities according to the CBBH Investment Committee Decision from July 2006. Net foreign reserves represent a difference between gross foreign reserves and liabilities to non-residents. Monetary liabilities of the CBBH include money outside monetary authorities and deposits of residents with monetary authorities. Net foreign assets of CBBH represent a difference between net foreign exchange reserves and monetary liabilities of the CBBH.

Note:

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

The currency outside monetary authorities is taken from the CBBH Balance Sheet and it consists of cash outside the central bank (monetary authorities). Deposits of commercial banks are commercial banks' funds in accounts at the CBBH. Transferable deposits of other domestic sectors with monetary authorities are deposits of other domestic sectors (except central government deposits). The central government consists of BH Institutions, Entity governments, Entity Social Security Funds and those of Brčko District. Social security funds on Entity level (from Federation of BH: Pension Fund, Health Care Fund of FBH, Employment Fund of FBH, and from Republika Srpska: Pension and Disability Insurance Fund of RS, Health Care Fund of RS, Employment Fund of RS and Fund for Child Protection of RS) are classified on the central government level.

Cash outside banks is taken over from the CBBH Balance Sheet (Table 6) and represents cash in circulation outside the central bank (monetary authorities) and cash outside commercial banks. Transferable deposits in the domestic currency are taken from the Monetary Survey (Table 5). They consist of deposits of non-central government (cantons and municipalities), deposits of public and private companies, other financial institutions and deposits of other domestic sectors (households, non-profit institutions and other unclassified sectors). Other deposits in the domestic currency, transferable and other deposits in foreign currency are taken over from the Monetary Survey (Table 5). They consist of deposits of non-central government (cantons and municipalities), deposits of public and private companies, other financial institutions and deposits of other domestic sectors (households, non-profit institutions and other unclassified sectors).

Reserve money (primary money or monetary base) is entirely taken from the CBBH Balance Sheet (Table 6). It consists of cash outside monetary authorities, deposits of commercial banks and deposits of other domestic sectors (except for deposits of the central government) with monetary authorities. According to national definition, money supply comprises all transferable and other deposits of domestic nonbank and nongovernment sectors, as well deposits of local government in domestic and foreign currency. Deposits of entity Social Security Funds are included into the central government on Entity level and by that they are excluded from money supply or monetary aggregates. Monetary aggregate M1 comprises cash outside banks and transferable deposits in domestic currency of all domestic sectors (except for deposits of the central government). Monetary aggregate QM is defined in the same way as the corresponding item in the Monetary Survey (Table 5). It consists of other deposits in domestic currency, transferable and other deposits in a foreign currency of all domestic sectors (except for deposits of the central government). Money supply M2 comprises monetary aggregates, M1 and QM.

Notes:

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports.

Monetary data updated according to the MMF methodology (Monetary and Financial Statistics Manual, 2000), from January 2006

The Monetary Survey presents the consolidated data from the Balance Sheet of CBBH - monetary authorities (Table 6) and the Consolidated Balance Sheet of Commercial Banks of Bosnia and Herzegovina (Table 7). Foreign assets (net) represent the difference between total foreign assets of the CBBH - monetary authorities and commercial banks of BH and total foreign liabilities of the CBBH - monetary authorities and commercial banks of BH. Domestic loans represent commercial banks' claims on all domestic sectors, but it should be noted that claims on central government are presented in net amounts, i.e. they are reduced by the deposits of central government with the CBBH and with BH commercial banks. The central government consists of BH Institutions, Entity governments, Entity Social Security Funds and those of Brčko District. According to new methodology, Social Security Funds are classified on the central government level as Entities' off-budget funds, which has a direct impact on the data about net claims on the central government in Monetary Survey.

Note:

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Money M1 comprises currency outside banks, transferable deposits in the domestic currency of all domestic sectors (except for deposits of central government). Quasi money QM comprises other deposits in the domestic currency, transferable and other deposits in foreign currency of all domestic sectors (except for deposits of the central government). Money supply M2 comprises monetary aggregates, money M1 and quasi money QM. Other liabilities include securities, loans, shares and other equity and other items (net). According to a new methodology, loans are presented as separate financial instruments on the side of liabilities (with which the calculated interest is added), and also shares and other equity. Other items (net) are unallocated items of liabilities reduced by the unallocated items of assets. Other items (net) also comprise restricted deposits, counter-items of funds and government lending funds.

Note:

Monetary data updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000), from January 2006.

The CBBH (monetary authorities) foreign assets comprise gold, foreign currency in the CBBH vault, foreign currency deposits with foreign banks, SDR holdings, foreign securities and other. Claims on domestic sectors consist of claims on employees of the CBBH for the extended long-term loans and claims on commercial banks on the basis of settlement accounts.

Reserve money (primary money or monetary base) is comprised of cash outside monetary authorities, deposits of commercial banks and deposits of other domestic sectors (except for the central government) with monetary authorities. Cash outside banks represents cash in circulation outside the Central Bank (monetary authorities) and cash outside commercial banks.

The CBBH foreign liabilities are comprised of short-term liabilities towards non-residents, deposits of non-residents and other short-term liabilities towards non-residents and liabilities towards the IMF (Accounts 1 and 2).

Deposits of central government with the CBBH are transferable and other deposits of BH Institutions, Entity Governments, Entity Social Security Funds and those of Brčko District in the local currency. Shares and other equity comprise the equity, current year result, general and special reserves and adjustment/revaluation. Other items (net) are unallocated items of liabilities reduced by the unallocated items of assets.

Note:

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Consolidated balance sheet of commercial banks includes consolidated balance sheets of commercial banks covered by Main Unit Sarajevo, Main Unit Mostar and Main Bank of Republika Srpska CBBH and it represents consolidation of mutual claims and liabilities among the commercial banks. Banks' reserves consist of cash in the banks' vaults and banks' deposits with the Central Bank of Bosnia and Herzegovina. Foreign assets of commercial banks include: foreign currency in the vaults, transferable and other deposits with non-residents in foreign currency, loans to non-residents, securities of non-residents in foreign currency, and other claims on non-residents.

Claims on general government include claims on all levels of government: the central government (BH Institutions, Entity governments, Entity social security funds and Brčko District) and non-central governments (canton and municipality governments). Claims on other domestic sectors include claims on public non-financial enterprises, private non-financial enterprises, other financial institutions and claims on other domestic sectors (households, non-profit institutions and other unclassified sectors).

Note:

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Central government deposits include transferable and other deposits in domestic and foreign currency of BH Institutions, Entity governments, Entity social security funds and those of Brčko District. Transferable and other deposits of other domestic sectors in domestic and foreign currency represent banks liabilities towards non-central government (canton and municipality governments), public non-financial enterprises, private non-financial enterprises, other financial institutions and other domestic sectors (households, non-profit institutions and other unclassified sectors). Foreign liabilities of commercial banks include banks liabilities to non-residents based on transferable and other deposits, loans, securities, trade loans and advance payments and other accounts payable. According to a new methodology, loans are presented as a separate financial instrument on the side of liabilities, with which the calculated interest is added.

Shares and other equity include equity, retained earnings, current year result, general and special reserves and adjustment /revaluation. Other items (net) are unallocated items of liabilities reduced by the unallocated items of assets. Restricted deposits are also included in other items (net).

Note:

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

By order of FBA in March 2010, loans to households with currency clause with one bank were reclassified, from loans in EUR to loans in KM.

Note:

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Loans to domestic institutional sectors represent claims of commercial banks on all institutional sectors. Loans at the BH level include loans extended by commercial banks covered by Main Unit Sarajevo, Main Unit Mostar and Main Bank of Republika Srpska CBBH Banja Luka.

Note:

Since 01 July 2017, the status change of the merger of subsidiary company UniCredit Leasing d.o.o. Sarajevo to the company Unicredit Bank d.d. Mostar has taken place. Accordingly, Unicredit Leasing d.o.o. Sarajevo has stopped existing as of 30 June 2017 and the data on the merged company are presented within the report on UniCredit Bank d.d. Mostar, starting from the report for July 2017.

* Interest rates in table for revolving loans and credit cards and their amounts refer to the outstanding amounts.

IRF – initial rate fixation

... insufficient data to be published

The interest rate on the revolving loans and credit cards, includes data on credit cards with loan facility. Considering that credit cards with loan facility imply an interest free deferred payment (0% ir), they are not published.

No data for interest rates on loans in foreign currency on the basis of credit cards and overdrafts to non-financial corporations.

	07	30,087,173	3,008,717	6,640,989	3,632,272
	08	30,427,192	3,042,719	6,814,061	3,771,342

Note:

From July 1st, 2016, the required reserves rate applied by the CBBH to the base for calculation of required reserves is 10%. From 1 July 2016, the CBBH applies the new rates for the calculation of fees to the funds in the banks' reserves accounts : in the accounting period, the Central Bank does not charge a fee on the amount of required reserves in commercial banks' reserves accounts, and on the amount of excess reserves, the CBBH charges the fee at the rate equal to 50% of the rate applied to commercial banks' deposits (deposit facility rate) by the European Central Bank. Since May 1st, 2015, the Central Bank has calculated the compensation for a bank on the amount of the bank's funds in the reserve account with the Central Bank in the calculation period, as it follows:

- on the reserve requirement amount – the average of EONIA recorded in the same period on the market reduced by 10 basis points, or minimum zero,
- on the amount of the funds exceeding the reserve requirement – zero rate of compensation.

The zero rate of compensation on the reserve requirement is applied in case the average EONIA decreased by 10 basis points has a negative value. From September 1st, 2014, the remuneration rate has been calculated on the basis of the weighted average interest rate which was earned by the Central Bank of BH on the market in the same period on deposits invested up to a month ; and 70% is calculated on the amount of required reserve or minimum 0, while 90% of the mentioned rate is calculated on the amount of excess reserves or minimum 0.

From February 1st, 2011 the required reserves rate on deposits and borrowed assets with contracted term of maturity up to one year was declined from 14% to 10%, while the required reserves rate on deposits and borrowed assets with contracted term of maturity over one year is not changed. From August 1st 2011, the remuneration rate is calculated by the weighted average interest rate which were earned by the Central Bank on deposits invested up to a month in the same period; 70% of this rate is calculated on the amount of required reserves while 90% of the same rate is calculated on the amount of excess reserves.

From July 1st, 2010 remuneration rate on the amount of required reserves is changed and calculated as an average of interest rates, which were earned by the Central bank on overnight deposits in the same period, while remuneration rate on the amount of excess reserves is not changed. From January 1st, 2009 the required reserves rate is 14% on deposits and borrowed assets with contracted term of maturity up to one year and 10% on deposits and borrowed assets with contracted term of maturity over one year. From April 1st, 2009 remuneration rate is calculated as:- On the amount of required reserves is 0,5%,- On the amount of excess reserves on the rate calculated as an average of interest rates, which were earned by the Central bank on deposits invested up to a month. From May 1st, 2009 the required reserves rate is 7% on deposits and borrowed assets with contracted term of maturity over one year.

From January 1st, 2008 required reserves rate was increased from 15% to 18%.

From October 11th, 2008 required reserves rate was declined from 18% to 14%.

*The base for calculation of required reserves includes deposits and borrowed funds in domestic (in KM and KM with the currency clause) and other currency expressed in KM.

Note:

Criteria for presenting country is the share of export of the country in total three-year BH export (2016,2017,2018).

Thus, all countries with share higher than 3,0% are separately presented, while the other countries are presented as sum in the column Other countries.
