INTRODUCTION

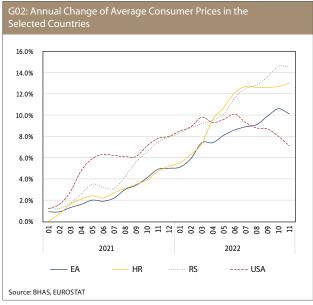

The autumn projections of the European Commission forecast a significant decrease in economic growth in the euro area, which will inevitably be reflected in Bosnia and Herzegovina economy (Graph 01). The inflation rate in the euro area remained in double digits in November, although growth slowed compared to the previous month (Graph 02). Due to heightened inflationary pressures, the ECB raised its key interest rates again in November and December, after other leading central banks did the same (Graph 03). In November, a slowdown in the growth of production and consumer prices was recorded in Bosnia and Herzegovina (Graph 04). In the first eleven months, the growth of consumer prices in BH was mostly determined by the growth of transportation, food and utility costs (Graph 05). Revenues from excise taxes recorded both monthly and annual growth in November under the influence of rising energy prices, while at the same time a decline in net collection of indirect tax revenues was recorded, primarily as a result of a significant increase in tax refunds (Graphs 06 and 07). The trend of falling industrial production at the annual level continued in November, fueled by the decline in mining activities and the supply of electricity and gas (Graph 08). The value of imported goods in BH in November recorded the lowest growth rate since February 2021, mostly as a result of the drop in the value of imports of base metals, one of the most important imported product groups (Graph 09). Also, the low annual growth rate of the

export value is the result of the annual decline in the export value of some of the most exportable product groups (Graph 10). Repayment of external debt as a percentage of exports moved in the usual monthly oscillations (Graph 11). In October, both the nominal and real effective exchange rates recorded an appreciation as a result of the significant appreciation of our anchor currency against the Turkish lira, while the KM recorded a nominal depreciation against other significant currencies (Graph 12).

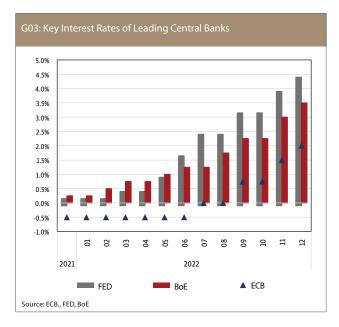

On a monthly level, foreign exchange reserves and monetary liabilities have significantly decreased (Graph 13). The decrease in cash outside the monetary authorities as well as the decrease in bank deposits with the monetary authorities had the greatest impact on the monthly decrease in reserve money (Graph 14). The total holdings of funds by commercial banks in the reserve account with CBBH decreased on a monthly basis in November due to a significant decrease in funds held by banks above the stipulated RR (Graph 15). In November, bank deposits decreased for the first time in seven months on a monthly basis, due to a significant decrease in entity government deposits, and the trend of decreasing credit growth continued (Graphs 16 and 17). After the growth of the average weighted interest rate on loans to non-financial companies in the previous month, the same level was maintained in November, but with a significantly lower amount of newly contracted loans (Graph 18).

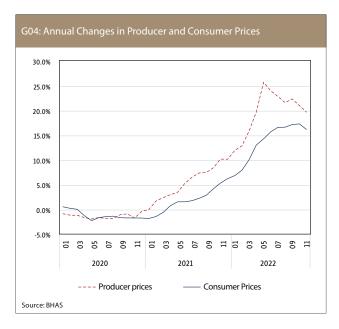

Compared to the summer economic forecast, the autumn forecast of the European Commission includes a considerable decline of economic growth in the euro area. Growth in the euro area in 2023 is expected to be only 0.3%, which is a significant revision compared to the previous forecast of real GDP growth in the euro area (1.4%). All the main foreign trade partners of BH from the euro area in 2023 will record much lower economic growth rates compared to the current year. According to the European Commission autumn forecast, the largest European economy, Germany, will face recession next year. Slowdown of growth in the main foreign trade partners of Bosnia and Herzegovina inevitably has a negative effect on BH economy which is shown in the CBBH autumn forecasts.

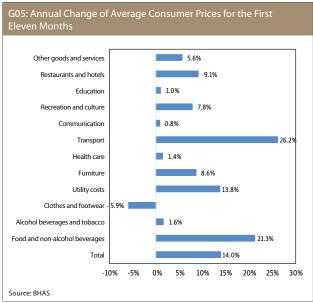

A high 10.1% inflation was recorded in November in the euro area, however, its growth slowed down compared to the previous month. At the annual level, food and energy prices remained the main generators of consumer price growth, with energy price growth slowing down at the monthly level. Prices of food and non-alcohol beverages saw a record high growth at the annual level in the EU and the euro area, reaching 17.9% and 16.0% respectively. Energy prices in the euro area recorded an annual growth of 34.9%, which is a considerable slowdown compared to October. According to individual spending classification, prices of electric energy, gas and other energy sources recorded a decline of 2.2% at the monthly level. Although signs of the growth of consumer prices in the euro area and the USA slowing down appeared in November, inflation rates remained at a high level, so the FED and the ECB again raised their benchmark interest rates in December.

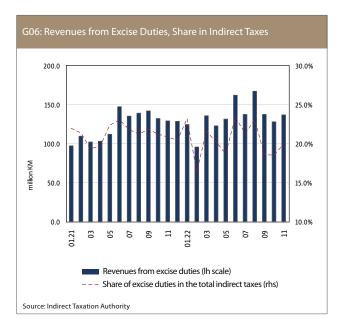

Strong inflationary pressures urged the leading central banks to further tighten their monetary policies. Following the July and September increases, the ECB again raised its key interest rates in November and December by 75bp and 50 bp respectively. The decision took place after similar decisions of other central banks, including the FED and the BoE. The ECB estimates that interest rates growth will need to continue at a significant and balanced pace to reach sufficiently restrictive levels to ensure the return of inflation to medium term target of 2%. Besides increase of key interest rates, the ECB announced a decrease of its balance sheet assets. Since the beginning of March 2023, purchases within Asset Purchase Programme (APP) will be decreased, the decrease amounting on the average to EUR 15 billion per month until the end of the second quarter of 2023.

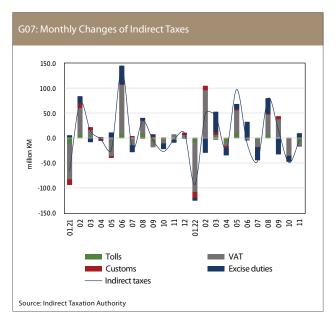

The growth of producer and consumer prices in BH slowed down in November. In the end of November, producer prices of industrial products for overall industry recorded an annual growth of 19.8%, which is lower by 1.4 pp than the October level. A decline of energy prices at the annual level, from 23.6% in October to 18.2% in November, particularly stood out, with no significant changes of prices at the annual level in other industrial groups. For the first eleven months of the current year, the growth of producer prices of industrial products of 20.0% was recorded compared to the same period of the previous year .

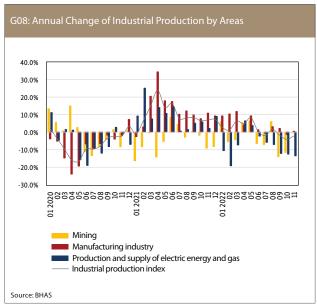

Consumer price growth was mainly determined by the growth of prices of transport, food and utility costs during the first eleven months. At the annual level, the clothes and footwear category made a continuing deflationary pressure on the general price level although a monthly growth of prices was recorded in this category in September and October. So , in the mentioned category, after a monthly growth of prices of 1.4% in October and 4.5% in September, prices declined again by 0.4% at the monthly level in November.

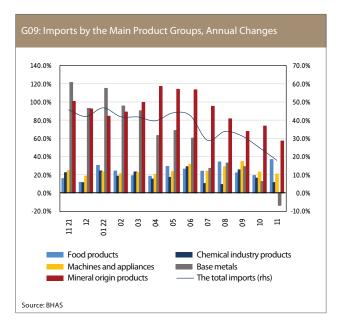

Revenues from excise duties recorded an increase in November, both on monthly and on annual level. In the first eleven months, cumulatively, KM 1.48 billion was collected net on the basis of excise duties, which is higher by KM 130.7 million (9.7%) compared to the same period of the previous year. Continuation of very positive trends in the collection of excise duties resulted from a strong impact of energy prices growth. As expected temporary revoke of excise duties on fuel did not take place, a significant collection of revenues on this basis is also expected in the period ahead.

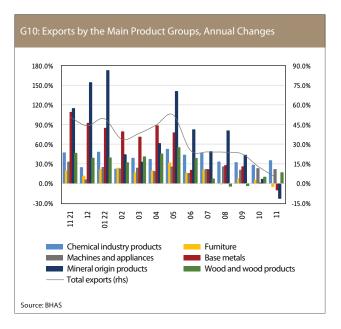

A monthly decline of net collected revenues from indirect taxes was seen in November, mainly due to a significant growth of tax refunds (amounting to KM 177.4 million in November). The amount of refunds paid to tax payers in the eleven months of the current year was higher by even KM 485.6 million (35.6%) compared to the same period of the previous year. The main reason of high tax refunds to tax payers were high growth rates of imports and exports. Cumulative net revenues from indirect taxes amounted to KM 7.24 billion, representing a growth of KM 928 million (14.7%) at the annual level, mainly due to inflationary pressures.

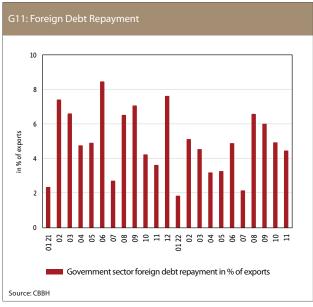

A downward trend of industrial production at the annual level continued in November, while a 3.4% growth was recorded at the monthly level. For the eleven months of the current year, the overall industrial production recorded a decrease of 1.2% compared to the same period of the previous year. In the end of November, the activities of mining and supply of electric energy and gas recorded a decline, while manufacturing industry recorded a slow annual growth (0.5%). Observed by the main industrial groups, the strongest annual growth of 17.2% in November was seen for capital products, while durable consumer products recorded the strongest annual decline.

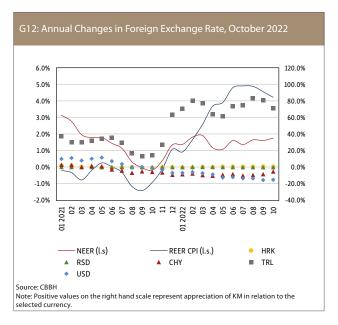

The value of imported goods in BH in November 2022 amounted to KM 2.48 billion, representing the lowest growth rate of import value since February 2021 (17.8%). The largest share in the total imports and the highest growth rate of import value was recorded in imports of mineral origin products (56.9%), the largest part being related to imports of oil and oil derivatives. In addition, significant annual growth rates of value in November were recorded in imports of food products (36.6%), machines and appliances (20.6%) and chemical industry products (11.3%). On the other hand, imports of base metals. as traditionally one of the most important product groups, recorded annual decline of 13.7% in November.

Exports of goods from BH in November amounted to KM 1.52 billion, which is an annual growth of 4.4%. Low annual growth rate of export value resulted from the fact that some of the most important export groups of products in November recorded annual decreases of export value: mineral origin products (22.8%), base metals (9.9%) and furniture (4.7%). On the other hand, other export significant product groups recorded annual increases of export value: machines and appliances (21.1%), chemical industry products (34.7%) and wood and wood products (16.4%), the growth mainly resulting from price effect.

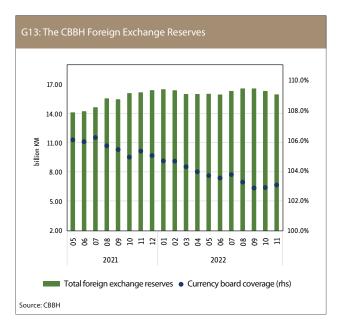

Foreign debt for general government sector is serviced from indirect tax revenues. Revenues on this basis had an upward trend, the current foreign debt repayment being stable. Foreign debt repayment in per cents of exports was within usual monthly oscillations, amounting to 4.4% of exports in November. In November, KM 67.2 million was serviced, representing 9.8% in per cents of revenues from indirect taxes for the mentioned month.

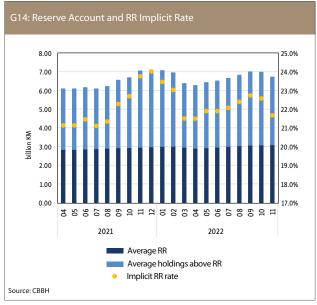

According to the latest available data in October 2022, the nominal effective exchange rate (NEER) and the real effective exchange rate (REER-CPI), where the consumer price index was used as a deflator, recorded appreciation (1.7% and 4.2%, respectively). As in the previous period, the appreciation of NEER was largely caused by a significant nominal appreciation of EUR, our anchor currency, in relation to Turkish lira, which amounted to 71.1%, in October, at the annual level. On the other hand, KM recorded a nominal annual depreciation in October in relation to other most important currencies in the world: US dollar (15.5%), Swiss frank (8.8%) and Chinese yuan (5.5%).

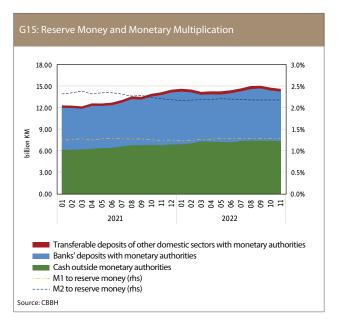

Depreciation of KM in relation to US dollar resulted from depreciation of EUR, our peg currency, due to higher exposure of the euro area to negative impacts of energy crisis and significant increase of key interest rates by the Federal Reserves.

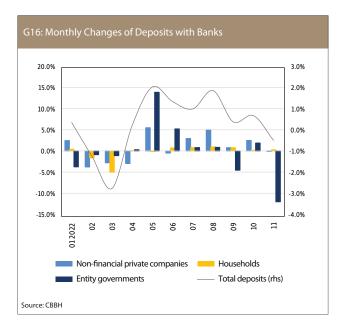

In November 2022, foreign exchange reserves recorded a decrease by KM 214.7 million at the annual level. Compared to the end of 2021, foreign exchange reserves were lower by KM 439 million, while monetary liabilities in the same period decreased by KM 131 million. At the monthly level, both monetary liabilities and foreign exchange reserves decreased by 353 million and 369 million respectively, and the monthly purchase and sale balance with commercial banks and internal depositors was negative in November in the amount of KM 356 million. These transactions contributed most to the decrease of foreign exchange reserves in the observed period. Foreign debt repayment accounted for KM 68.57 million. In relation to the trends of both foreign exchange reserves and monetary liabilities, coverage ratio of currency board in the end of November was 103.01%, having increased compared to the previous month.

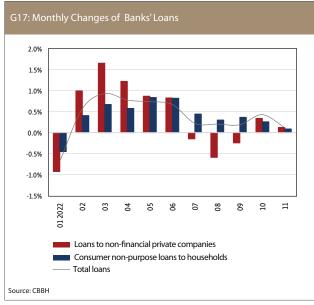

Compared to the previous month, RR base increased, while holdings exceeding RR decreased by KM 271 million. The average required reserves in November amounted to KM 3.1 billion and were higher than the average balance in the previous month by KM 7.6 million. Taking into account a larger decrease of holdings exceeding RR compared to the growth of RR, the total holdings in reserve accounts with the CBBH in November decreased, amounting to KM 6.71 billion. Due to the changes of remuneration policy and adoption of Decision on determining and maintaining required reserves and setting remuneration dated 01 January 2023, zero rate of remuneration will be applied on holdings exceeding RR in banks' reserve accounts with the CBBH, while the remunerations for the KM base and the foreign currency base will amount to 25 bp and 10 bp respectively. The required reserve rate remained the same amounting to 10%.

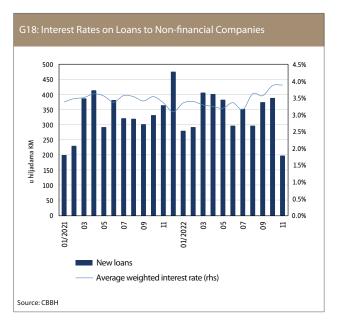

The largest contribution to monthly decrease of reserve money over the observed period came from decrease of cash outside monetary authorities and decrease of bank deposits with monetary authorities. Compared to the same period of the last year, reserve money increased by KM 483.51 million. Due to changes in reserve money as well as in monetary aggregates recorded during November, monetary multipliers did not record significant oscillations. Monthly increase of broad money supply resulted from increase of money (M1) by KM 62.5 million and decrease of quasi money (QM) by KM 53.8 million. Monetary aggregate M1 increased due to the increase of transferable deposits in the local currency and decrease of cash outside banks. Decrease of quasi money resulted from decrease of transferable deposits in foreign currency, other deposits in the local currency and other deposits in foreign currency.

For the first time after seven successive months of growth, bank deposits decreased at the monthly level. Deposit growth at the monthly level was recorded with household sector by KM 35.7 million (0.3%), non-financial public companies by KM 7.6 million (0.4%) and other domestic sectors by KM 98.7 million (5.3%). Key contribution to monthly decline of the total deposits came from Entity governments deposits which decreased by even 12%. At the annual level, the growth rate of bank deposits stayed high (6%) taking into account the last year's two digit deposit growth rates. Although deposits of non-financial private companies stayed at almost the same level as in the previous month, they were higher by 6.1% compared to January level. Unlike them, household deposits did not reach their maximum level from January, and they were lower by 3.2%.

Having reached the monthly growth rate of almost 1% in March, credit growth was on a downward trend until the reporting period. In household sector, the slowdown of credit growth was determined by the slowdown of growth of consumer non-purpose loans, while in real sector, credit growth declined due to the sector of nonfinancial private companies. The growth of credit risks and uncertainties affected credit offer, while uncertainties as well as the growth of interest rates affected demand for loans. In November, annual rate of credit growth amounted to 4.9%, which is quite low compared to inflation rate (16.3%). The annual credit growth was mainly affected by household sector, the loans of which increased by KM 514.3 million and sector of non-financial private companies the annual increase of which was KM 377.9 million.

Following the growth of average interest rate on loans to non-financial companies in the previous month, the same, higher level of interest rate stayed in November, but with a much lower level of new loans. Compared to the end of the last year, the total growth of interest rate by 80 bp was not a high growth, as the inflation in the reporting period was much higher. Average weighted interest rate on consumer non-purpose loans to households did not change compared to the previous month, remaining at the same level of 5.5%. Interest rate on housing loans to households did not have significant monthly oscillations (3.8%). Compared to the end of the last year, growth of average interest rate on consumer non-purpose loans and housing loans was 20 bp. and 50 bp respectively.

Note: Brief notes on methodology can be found below each table, while more detailed ones are available at www.cbbh.ba

Notes applicable for tables 4, 5, 7, 8, 9, 10, 11, 12 i 13.

Since 01 July 2017, the status change of the merger of subsidiary company UniCredit Leasing d.o.o. Sarajevo to the company Unicredit Bank d.d. Mostar has taken place. Accordingly, Unicredit Leasing d.o.o. Sarajevo has stopped existing as of 30 June 2017 and the data on the merged company are presented within the report on UniCredit Bank d.d. Mostar, starting from the report for July 2017.

The revised data for the period January 2006 – November 2015 are based on the active sub-balance of the banks with majority state owned capital from the Federation of BH, with the passive sub-balance excluded. Through such supplement of statistics, the users are provided with higher analytical usefulness of data and objective indicators on the current operations of banks in BH. Passive sub-balance includes the liabilities based on foreign loans and old foreign exchange savings of citizens until 31 March 1992 and it does not reflect the current operations of the bank, so this sub-balance in the privatization process will be taken over by the Ministry of Finance of FBH according to the Law on Initial Balance Sheets of Banks and the Law on Privatization, as it has been done for the previously privatized banks. The performed revision mainly influenced the decrease of loans to public companies in a foreign currency, decrease of foreign liabilities, decrease of other items of assets and liabilities on the basis of old foreign exchange savings, and in considerably lower amounts, on items of loans to the Entity Government, fixed assets, non-residents' deposits, shares and capital.

The data on the "complete" balance sheet, with the included passive sub-balance, are still available at: http://statistics.cbbh.ba:4444/Panorama/novaview/SimpleLogin_bs.aspx

In November 2014, two banks have realized the sale and transfer of part of the loan portfolio which resulted with increase in reserves with monetary authorities in the amount of 64 million KM and a decrease in the following items: claims of non-financial private enterprises 260 million KM, foreign liabilities 101 million KM and other items (net) 95 million KM.

Due to the application of International Accounting Standards (IAS) and the International Financial Reporting Standards applied in BH Federation banks and the transfer of money flows in December 2011 data, the following changes have occurred at the assets side: decrease of loans by KM 155 million, an increase in other assets by KM 10 million, at the liabilities side: decrease of liabilities to non-residents in the amount of KM624 million, an increase in loan loss provisions by KM 472 million and other liabilities increased by KM 7 million.

In February 2011, one bank from BH Federation reclassified deposits in the amount of around KM 80 million, from the deposits of public companies to the Entities' governments deposits, in line with the IMF recommendations.

By order of the FBH Banking Agency, in June 2010, one bank made a reclassification of about KM 300 million of claims based

on securities on domestic institutional sectors to the claims on non-residents. In December 2010, the same bank made this reclassification, retroactively, in the respective amounts for the period from August 2009 when the error occurred, until May 2010. The above reclassification was reflected in the increase in foreign assets and decrease in other items net.

One bank from FBH made a reclassification of financial instruments in the foreign assets amounting to about KM 40 million for the period January - August 2010. Claims on non-residents based on loans were reclassified in claims on non-residents on the basis of securities, which resulted in changes in the short- term and long-term foreign assets.

By order of the Banking Agency of Republika Srpska one bank made a reclassification of financial instruments on the liabilities side, for the period of September 2008 - November 2010, .i.e.. the decrease in time and savings deposits of non-bank financial institutions and government sector, and the increase in loans from the same sectors, respectively, in the appropriate amounts, by months, ranging from 50 - 150 million KM.

In accordance with new regulations of the RS Banking Agency, published in the Official Gazette of RS, no.136/10, which has regulated a new manner of recording receivables classified in category "E", accounting and bookkeeping of interest on non-performing assets and calculation of general and special provisions, RS banks, in the data for December 2010, implemented the mentioned regulations, by transferring these items from off-balance records into balance sheet. The correction was reflected on the assets side, as increase of loans in the amount of about KM 144 million, and increase of due interest in the amount of KM 36 million, and on the liabilities side, as increase in provisions for loan losses amounting to about KM 180 million within the capital account.

By order of the Banking Agency of Republika Srpska, one bank made a reclassification of financial instruments on the liabilities side, for the period of September 2008 - November 2010, i.e. decrease in time and savings deposits of non-bank financial institutions and government sector, and the increase in loans from the same sectors, respectively in the appropriate amounts, by months, ranging from KM 50 - 150 million.

According to new regulations of the RS Banking Agency, published in the Official Gazette of RS no.136/10, which have defined a new way of recording claims classified in category "E", accounting and recording of interest on non-performing assets and calculation of general and special provisions, RS banks, in the data for December 2010 implemented the mentioned regulations, by transferring these items from off-balance records into balance sheet. The correction was reflected on the assets side, as increase of loans in the amount of KM 144 million, and increase of due interest in the amount of KM 36 million, and on the liabilities side, as increase in provisions for loan losses amounting to KM 180 million within the capital account.

Note:

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Gross foreign reserves consist of balance sheet positions of short-term foreign assets of the CBBH (gold, CBBH SDR holdings, foreign exchange in the CBBH vault, transferable deposits in foreign currency with non-resident banks and other) and investment in securities according to the CBBH Investment Committee Decision from July 2006. Net foreign reserves represent a difference between gross foreign reserves and liabilities to non-residents. Monetary liabilities of the CBBH include money outside monetary authorities and deposits of residents with monetary authorities. Net foreign assets of CBBH represent a difference between net foreign exchange reserves and monetary liabilities of the CBBH.

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports.

 $Monetary\ data\ have\ been\ updated\ according\ to\ the\ IMF\ methodology\ (Monetary\ and\ Financial\ Statistics\ Manual,\ 2000)\ from\ January\ 2006.$

The currency outside monetary authorities is taken from the CBBH Balance Sheet and it consists of cash outside the central bank (monetary authorities). Deposits of commercial banks are commercial banks' funds in accounts at the CBBH. Transferable deposits of other domestic sectors with monetary authorities are deposits of other domestic sectors (except central government deposits). The central government consists of BH Institutions, Entity governments, Entity Social Security Funds and those of Brčko District. Social security funds on Entity level (from Federation of BH: Pension Fund, Health Care Fund of FBH, Employment Fund of FBH, and from Republika Srpska: Pension and Disability Insurance Fund of RS, Health Care Fund of RS, Employment Fund of RS and Fund for Child Protection of RS) are classified on the central government level.

Cash outside banks is taken over from the CBBH Balance Sheet (Table 6) and represents cash in circulation outside the central bank (monetary authorities) and cash outside commercial banks. Transferable deposits in the domestic currency are taken from the Monetary Survey (Table 5). They consist of deposits of non-central government (cantons and municipalities), deposits of public and private companies, other financial institutions and deposits of other domestic sectors (households, non-profit institutions and other unclassified sectors). Other deposits in the domestic currency, transferable and other deposits in foreign currency are taken over from the Monetary Survey (Table 5). They consist of deposits of non- central government (cantons and municipalities), deposits of public and private companies, other financial institutions and deposits of other domestic sectors (households, non-profit institutions and other unclassified sectors).

Reserve money (primary money or monetary base) is entirely taken from the CBBH Balance Sheet (Table 6). It consists of cash outside monetary authorities, deposits of commercial banks and deposits of other domestic sectors (except for deposits of the central government) with monetary authorities. According to national definition, money supply comprises all transferable and other deposits of domestic nonbank and nongovernment sectors, as well deposits of local government in domestic and foreign currency. Deposits of entity Social Security Funds are included into the central government on Entity level and by that they are excluded from money supply or monetary aggregates. Monetary aggregate M1 comprises cash outside banks and transferable deposits in domestic currency of all domestic sectors (except for deposits of the central government). Monetary aggregate QM is defined in the same way as the corresponding item in the Monetary Survey (Table 5). It consists of other deposits in domestic currency, transferable and other deposits in a foreign currency of all domestic sectors (except for deposits of the central government). Money supply M2 comprises monetary aggregates, M1 and QM.

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports.

Monetary data updated according to the MMF methodology (Monetary and Financial Statistics Manual, 2000), from January 2006.

The Monetary Survey presents the consolidated data from the Balance Sheet of CBBH - monetary authorities (Table 6) and the Consolidated Balance Sheet of Commercial Banks of Bosnia and Herzegovina (Table 7). Foreign assets (net) represent the difference between total foreign assets of the CBBH - monetary authorities and commercial banks of BH and total foreign liabilities of the CBBH -monetary authorities and commercial banks of BH. Domestic loans represent commercial banks' claims on all domestic sectors, but it should be noted that claims on central government are presented in net amounts, i.e. they are reduced by the deposits of central government with the CBBH and with BH commercial banks. The central government consists of BH Institutions, Entity governments, Entity Social Security Funds and those of Brčko District. According to new methodology, Social Security Funds are classified on the central government level as Entities' off-budget funds, which has a direct impact on the data about net claims on the central government in Monetary Survey.

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Money M1 comprises currency outside banks, transferable deposits in the domestic currency of all domestic sectors (except for deposits of central government). Quasi money QM comprises other deposits in the domestic currency, transferable and other deposits in foreign currency of all domestic sectors (except for deposits of the central government). Money supply M2 comprises monetary aggregates, money M1 and quasi money QM. Other liabilities include securities, loans, shares and other equity and other items (net). According to a new methodology, loans are presented as separate financial instruments on the side of liabilities (with which the calculated interest is added), and also shares and other equity. Other items (net) are unallocated items of liabilities reduced by the unallocated items of assets. Other items (net) also comprise restricted deposits, counter-items of funds and government lending funds.

Monetary data updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000), from January 2006.

The CBBH (monetary authorities) foreign assets comprise gold, foreign currency in the CBBH vault, foreign currency deposits with foreign banks, SDR holdings, foreign securities and other. Claims on domestic sectors consist of claims on employees of the CBBH for the extended long-term loans and claims on commercial banks on the basis of settlement accounts.

Reserve money (primary money or monetary base) is comprised of cash outside monetary authorities, deposits of commercial banks and deposits of other domestic sectors (except for the central government) with monetary authorities. Cash outside banks represents cash in circulation outside the Central Bank (monetary authorities) and cash outside commercial banks.

The CBBH foreign liabilities are comprised of short-term liabilities towards non-residents, deposits of non-residents and other short-term liabilities towards non-residents and liabilities towards the IMF (Accounts 1 and 2).

Deposits of central government with the CBBH are transferable and other deposits of BH Institutions, Entity Governments, Entity Social Security Funds and those of Brčko District in the local currency. Shares and other equity comprise the equity, current year result, general and special reserves and adjustment/revaluation. Other items (net) are unallocated items of liabilities reduced by the unallocated items of assets.

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Consolidated balance sheet of commercial banks includes consolidated balance sheets of commercial banks covered by Main Unit Sarajevo, Main Unit Mostar and Main Bank of Republika Srpska CBBH and it represents consolidation of mutual claims and liabilities among the commercial banks. Banks' reserves consist of cash in the banks' vaults and banks' deposits with the Central Bank of Bosnia and Herzegovina. Foreign assets of commercial banks include: foreign currency in the vaults, transferable and other deposits with non-residents in foreign currency, loans to non-residents, securities of non-residents in foreign currency, and other claims on non-residents.

Claims on general government include claims on all levels of government: the central government (BH Institutions, Entity governments, Entity social security funds and Brčko District) and non-central governments (canton and municipality governments). Claims on other domestic sectors include claims on public non-financial enterprises, private non-financial enterprises, other financial institutions and claims on other domestic sectors (households, non-profit institutions and other unclassified sectors).

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Central government deposits include transferable and other deposits in domestic and foreign currency of BH Institutions, Entity governments, Entity social security funds and those of Brčko District. Transferable and other deposits of other domestic sectors in domestic and foreign currency represent banks liabilities towards non-central government (canton and municipality governments), public non-financial enterprises, private non-financial enterprises, other financial institutions and other domestic sectors (households, non-profit institutions and other unclassified sectors). Foreign liabilities of commercial banks include banks liabilities to non-residents based on transferable and other deposits, loans, securities, trade loans and advance payments and other accounts payable. According to a new methodology, loans are presented as a separate financial instrument on the side of liabilities, with which the calculated interest is added.

Shares and other equity include equity, retained earnings, current year result, general and special reserves and adjustment /revaluation. Other items (net) are unallocated items of liabilities reduced by the unallocated items of assets. Restricted deposits are also included in other items (net).

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

By order of FBA in March 2010, loans to households with currency clause with one bank were reclassified, from loans in EUR to loans in KM.

Note:

Since 01 July 2017, the status change of the merger of subsidiary company UniCredit Leasing d.o.o. Sarajevo to the company Unicredit Bank d.d. Mostar has taken place. Accordingly, Unicredit Leasing d.o.o. Sarajevo has stopped existing as of 30 June 2017 and the data on the merged company are presented within the report on UniCredit Bank d.d. Mostar, starting from the report for July 2017.

IRF – initial rate fixation

The interest rate on the revolving loans and credit cards, includes data on credit cards with loan facility. Considering that credit cards with loan facility imply an interest free deferred payment (0% ir), they are not published.

No data for interest rates on loans in foreign currency on the basis of credit cards and overdrafts to non-financial corporations.

^{*} Interest rates in table for revolving loans and credit cards and their amounts refer to the outstending amounts.

From July 1st, 2016, the required reserves rate applied by the CBBH to the base for calculation of required reserves is 10%. From 1 July 2016, the CBBH applies the new rates for the calculation of fees to the funds in the banks' reserves accounts: in the accounting period, the Central Bank does not charge a fee on the amount of required reserves in commercial banks' reserves accounts, and on the amount of excess reserves, the CBBH charges the fee at the rate equal to 50% of the rate applied to commercial banks' deposits (deposit facility rate) by the European Central Bank.

Since May 1st, 2015, the Central Bank has calculated the compensation for a bank on the amount of the bank's funds in the reserve account with the Central Bank in the calculation period, as it follows:

- $on the reserve requirement amount-the average of EONIA \, recorded \, in the same \, period \, on \, the \, market \, reduced \, by \, 10 \, basis \, points, or \, minimum \, zero, \, and \, basis \, points \, are the entire period on the market \, reduced \, by \, 10 \, basis \, points, \, or \, minimum \, zero, \, and \, basis \, points \, are the entire period \, basis \, points \, are the entire period \, basis \, points \, are the entire period \, basis \, points \, are the entire period \, basis \, basis \, basis \, points \, are the entire period \, basis \, bas$
- -on the amount of the funds exceeding the reserve requirement zero rate of compensation.

The zero rate of compensation on the reserve requirement is applied in case the average EONIA decreased by 10 basis points has a negative value. From September 1st, 2014, the remuneration rate has been calculated on the basis of the weighted average interest rate which was earned by the Central Bank of BH on the market in the same period on deposits invested up to a month; and 70% is calculated on the amount of required reserve or minimum 0, while 90% of the mentioned rate is calculated on the amount of excess reserves or minimum 0.

From February 1st, 2011 the required reserves rate on deposits and borrowed assets with contracted term of maturity up to one year was declined from 14% to 10%, while the required reserves rate on deposits and borrowed assets with contracted term of maturity over one year is not changed. From August 1st 2011, the remuneration rate is calculated by the weighted average interest rate which were earned by the Central Bank on deposits invested up to a month in the same period; 70% of this rate is calculated on the amount of required reserves while 90% of the same rate is calculated on the amount of excess reserves.

From July 1st, 2010 remuneration rate on the amount of required reserves is changed and calculated as an average of interest rates, which were earned by the Central bank on overnight deposits in the same period, while remuneration rate on the amount of excess reserves is not changed.

From January 1st, 2009 the required reserves rate is 14% on deposits and borrowed assets with contracted term of maturity up to one year and 10% on deposits and borrowed assets with contracted term of maturity over one year. From April 1st, 2009 remuneration rate is calculated as:- On the amount of required reserves is 0,5%,- On the amount of excess reserves on the rate calculated as an average of interest rates, which were earned by the Central bank on deposits invested up to u month. From May 1st, 2009 the required reserves rate is 7% on deposits and borrowed assets with contracted term of maturity over one year.

From January 1st, 2008 required reserves rate was increased from 15% to 18%.

From October 11th, 2008 required reserves rate was declined from 18% to 14%.

*The base for calculation of required reserves includes deposits and borrowed funds in domestic (in KM and KM with the currency clause) and other currency expressed in KM.

International investment position (IIP) for BH is compiled in accordance with the latest International Monetary Fund Methodology for compilation of Balance of payments and International investment position statistics, sixth edition (BPM6). Compilation of the International investment position includes also the regular revision of previously published data for the three years backwards in accordance with most recent available source data. Shortened versions of the applied methodological approach for the compilation of BH IIP statistics are available on the CBBH website.

Criteria for presenting country is the share of export of the country in total three-year BH export (2016, 2017, 2018).

Thus, all countries with share higher than 3,0% are separately presented, while the other countries are presented as sum in the column Other countries.
