SUMMARY

The first positive signs of recovery in commodity trade appeared with gradual opening of countries and intensification of immunisation process. The recovery of industrial production in the countries which are our trade partners was reflected in the increase of BH exports to those countries. The industrial production index growth in Italy, Serbia and Croatia was directly reflected in high growth rates of BH exports to these countries (Graphs 01 and 02). Furniture, base metals and machines and electric devices were mainly exported to the countries our trade partners, so a strong growth of exports of these product groups was recorded, resulting mainly from the low base (Graph 03). The export growth certainly stimulated a considerable growth of industrial production which exceeded the growth from the pre-pandemic period (Graph 04). The industrial production and exports growth impacted also the recovery of imports, the import growth rate still being lower than that of exports (Graph 05). Following a decrease of raw material prices in global markets and strong deflationary pressures which had marked the previous year, a growth of prices was recorded in the current year, being particularly obvious in April (Graph 06). Deflation has been recorded at the annual level since the beginning of the year, mainly due to low prices of transport and clothes in BH, yet, numerus indicators in global markets have pointed out increasing inflationary pressures (Graph 07). The Eurosystem balance sheet assets continued to increase, mainly impacted by the purchase of Eurosystem government securities (Graph 08). The recovery of BH economy also impacted the decrease of the number of the unemployed, i.e. the activation of earlier jobs, particularly those in service sector (Graph 09). The recovery of economy is also evident in the collection of indirect tax revenues, although the level from the same period of 2019 has not been reached yet (Graph 10). The revenue from VAT collection as the most important revenue from indirect taxes has increased since the beginning of the year resulting from the recovery of VAT on imports and also growth of the domestic VAT (Graph 11). Yet, the recovery of budget revenues was not sufficient to meet the spending of the entity governments, so a new debt was incurred, increasing the total liabilities of the government sector with commercial banks (Graph 12). In April, RS issued bonds on foreign capital market, while FBH issued one issue of seven year bonds on the local capital market (Graph 13). The banking sector feature was the foreign assets growth, brought about by the growth of non-residents' deposits, with foreign liabilities decreasing since the beginning of the year, while the situation stabilised in April (Graph 14). As early as in February, lending revived, with credit growth remaining quite low for a stronger economic recovery (Graph 15). Foreign exchange reserves increased in April (Graph 16). Reserve money increased, while monetary multipliers M1 and M2 did not oscillate significantly in the end of April (Graph 17). The growth of required reserve and excess reserves continued in April. In April 2021, the Governing Board made a Decision on amendment of the Decision on setting and maintaining required reserves and setting compensation on the reserve amount, related to different treatment of the bases in foreign currencies (Graph 18).

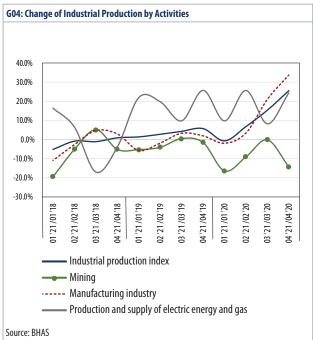

The first positive signs of recovery in commodity trade appeared with gradual opening of countries and intensification of immunisation process. Observing the main trade partners of BH, the industrial production index trend at the annual level, in cumulative terms for four months, was directly corresponding with the trend of BH exports to those countries. Exports to Italy recorded the highest growth rate, which was initiated by the industrial production growth of 20.1%, mainly resulting from a very low value in the base period of the previous year, due to the complete lockdown in Italy. Industrial production growth rates in Croatia and Serbia, over the observed period, amounting to 7.3% and 10.2% respectively, contributed significantly to high growth rates of exports from BH to those countries. The industrial production growth in Germany, in cumulative terms for the first four months, initiated the growth of exports to that country from BH by 17.4%. Over the observed period, the quantity growth of exports was considerable, although the price effect was not negligible either due to higher prices of stock exchange commodities in the current year compared to the previous year.

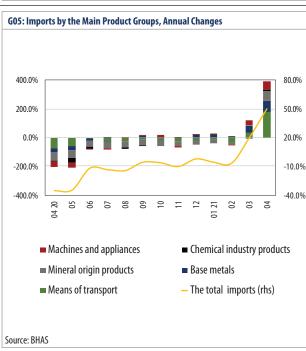

The exports to the main trade partners show that the demand for our products exported to Italy recorded the highest growth rate (41.9%). The exports to Croatia, Serbia and Slovenia, in cumulative terms for the first four months at the annual level, were increasing at the rates of 28.2%, 27.9% and 27.5% respectively. The exports to Austria and Germany were growing at slightly lower rates (19.2% and 17.4% respectively).

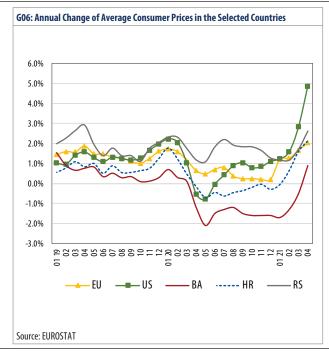

Export growth at the annual level has been recorded since the beginning of the year, with cumulative exports in the first four months amounting to KM 4.18 billion, which is a growth by 25.7% at the annual level. Due to the growth of demand in the countries which are BH main trade partners, exports of the main export product groups increased. In April, at the annual level, the exports of furniture increased by 136.0%, those of base metals by 85.3%, those of machines and appliances by 63.6% and those of mineral origin products by 31.3%. In April of the current year, the quantity growth of exports was considerable, although the price effect was not negligible either due to higher prices of stock exchange goods in the current year compared to the previous year.

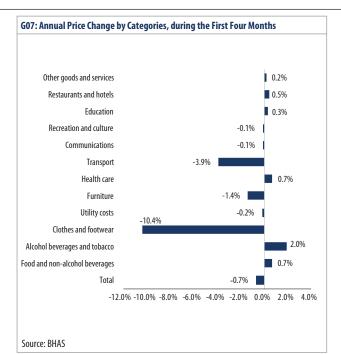

Following a continuous decline of industrial production during the previous two years, a strong growth of production was recorded during the current year, not only at annual level, but also compared to the same pre-pandemic periods. During the first four months of the current year, the growth of industrial production was 11.2% compared to the same period of the previous year. In this period, a strong output growth was recorded in manufacturing industry (13.6%), with the production of finished metal products (40.8%) standing out as an activity with the largest share in this industry, and production and supply of electric energy and gas (16.2%).

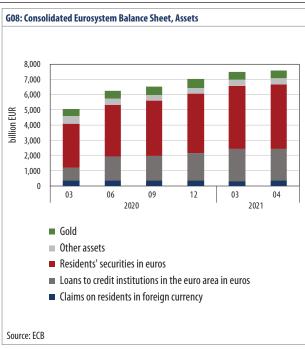

The import growth recorded in the previous month, at the annual level, stimulated by the industrial production growth, was continued in April. Cumulative import growth for the first four months of 2021 was 12.5%. The import growth in April, at the annual level was 49.8%. The strongest effect on such high growth rate of import value mainly came from the historical decline of the import value in the base period due to the decline of local demand and difficulties in the movement of goods, and also the growth of stock exchange goods prices in the current year, accompanied with the quantity increase of imports. The highest growth of imports in April, at the annual level, was recorded in the imports of means of transport by 176.3%, followed by base metals by 81.9%, mineral origin products by 65.8%, machines and appliances by 60.5%, chemical industry products by 8.9%.

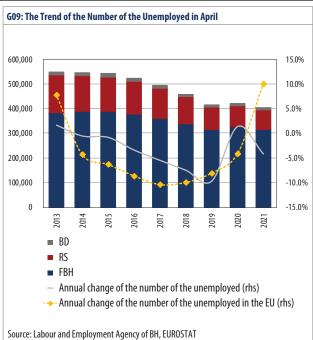

Following strong deflationary pressures on average consumer prices during the previous year, resulting from decreased prices of raw materials in global markets and delayed spending, a growth of prices was observed during the current year, particularly in April. The growth of average prices in the EU came close to the target inflation level, while in the USA, a considerable inflation was also observed at the annual level. Having in mind a strong base effect, such growth is expected to be temporary, yet, numerous indicators in global markets point out increasing inflationary pressures.

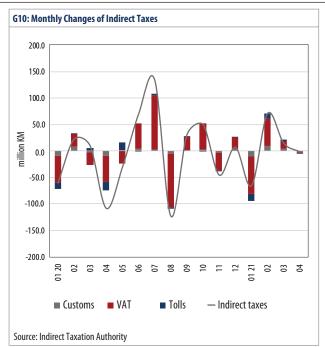

Although 0.9% inflation at the annual level was recorded in April, the feature of the first four months in the current year was 0.7% deflation compared to the same period of the previous year. Deflationary pressure on general prices mainly came from the categories of transport, and clothes and footwear, annulling the growth of the prices of food and beverages, alcohol beverages and tobacco and other domestic prices. Due to the low base effect from the previous year, firstly for transport prices, a faster inflation growth is expected in the months to come.

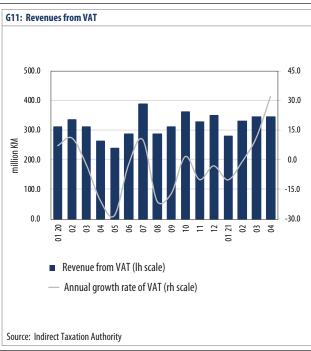

The strongest contribution to the growth of the broadest monetary aggregate of the euro area was again brought about by net purchases of government securities of the Eurosystem within the ECB asset purchase programme (APP) and the pandemic emergency purchase programme (PEPP). Therefore, the Eurosystem balance sheet amount increased in April 2021, and compared to the 2020 end, it was higher by 8.0%. The Governing Council will continue with the implementation of net purchases of securities within the pandemic emergency purchase programme (PEPP) in the total amount of EUR 1,850 billion, as well as refinancing operations for ensuring high liquidity within the third series of target longer term refinancing operations, at least until the end of March 2022.

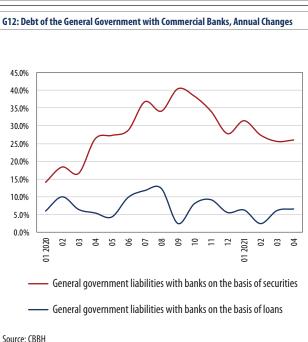

In April, the monthly downward trend of the number of the unemployed was continued, resulting from the recovery of economy and activation of jobs lost earlier, mainly from service sector. In April, a decline of the number of the unemployed at the annual level was recorded for the first time since the beginning of the pandemic. Comparing the trend of the number of the unemployed with the EU countries, a similar trend was observed in the pre-pandemic years, with the differences in the pandemic period mainly explicable by methodological differences, which are to disappear in the months to come.

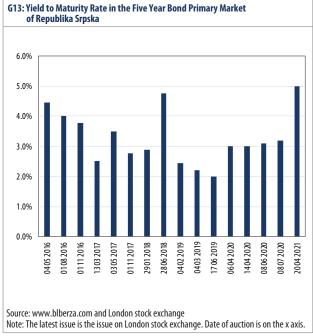

During the first four months, in cumulative terms, net revenues from indirect taxes amounted to KM 2.00 billion, representing a 2.1% growth at the annual level. At the monthly level, net revenues slightly decreased in April (-0.4%). Indirect tax revenues have not yet reached the pre-crisis level. Compared to April 2019, the collection of indirect taxes in April 2021 was lower by 2.8%, while in cumulative terms, for the first four months in 2021, the collection was lower by 1.0% in 2019.

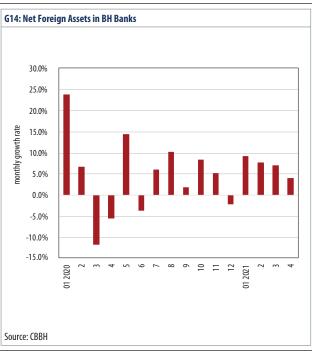

In the first four months, KM 1.29 billion was collected net on the basis of VAT, which is higher by KM 80.4 million (6.6%) compared to the same period of the previous year. Positive trends in the collection of VAT resulted from the recovery of VAT on imports, and also the growth of domestic VAT. Regarding reimbursements on VAT, they started to increase since February, which is related to the growth of exports since December 2020. The main generators of VAT reimbursements are exports, imports and investment, and having in mind the growth of imports and exports over the recent period, increased reimbursements on the basis of VAT are expected.

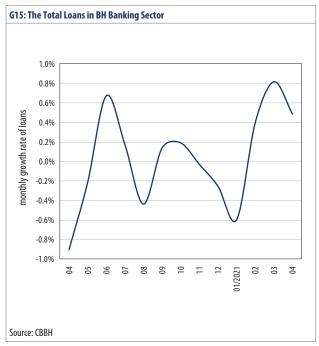

The budget revenues recovery was still insufficient to meet the entity government spending, which incurred additional debt in April. In April, in the international financial market, the Government of Republika Srpska issued EUR denominated five year bonds (around KM 600 million) at the coupon rate of 4.75%. On the other hand, the Federation of BH in April issued seven year bonds in the amount of KM 30 million in the domestic capital market. At April end, the total liabilities of the general government sector with commercial banks amounted to KM 3.30 billion, representing an annual growth in the amount of KM 509.8 million or 18.3%, while the monthly growth amounted to 6.4%. Banking sector exposure to the general government sector in the end of April was 9.5% of the total banking sector assets.

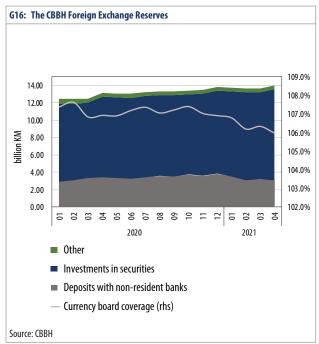

After the issue in June 2018 Republika Srpska again issued bonds in a foreign financial market in April 2021, this time on London stock exchange. The total nominal value of the five year bond issue was EUR 300 million, at the coupon rate of 4.75%. The issue was sold at the price of 296.75 million, with the achieved yield to maturity rate exceeding the coupon interest rate amounting to 5.0%. Compared to the average yield on BLSE in 2020, this rate is higher by almost 200 bp. In April, the Federation of Bosnia and Herzegovina issued one issue of seven year bonds at the yield to maturity rate (1.06%), which is lower than the previous issue from September 2020, which was a continuation of the downward trend of the yield having started in this market in May 2020.

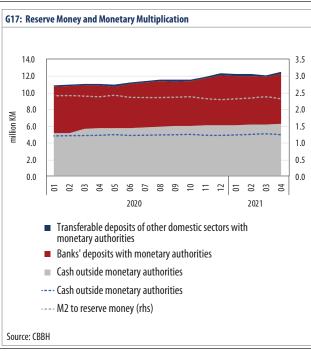

As in the previous months, in April 2021, net foreign assets reached its maximum value. In the end of April, the value of net foreign assets (KM 2.78 billion) was higher by 4.0% compared to the previous month, and higher by 91.5% compared to the same period of the previous year. In the part of assets of foreign exchange sub-balance sheet of banks with non-residents, the increase of net foreign assets was mainly affected by the growth of other deposits and other loans to non-residents. Banks' foreign liabilities have been decreasing since the beginning of the year, which also influenced the growth of net foreign assets. Stabilisation was observed in April, so the decline amounted to only 1.0%. Banks' foreign liabilities in the end of April amounted to KM 2.07 billion.

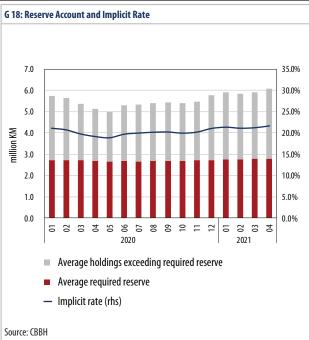

Revival of credit growth, having started in February, continued in April 2021. Monthly credit growth was mainly contributed by the household sector and sector of non-financial private companies, although annual growth rates of this sector remained negative. Both sectors which are crucial for banks' lending, in the reporting period recorded a credit growth of 0.6%, with the total loans increase being 0.5% (m/m-1). At the annual level, the total loans were higher by 1.3%, and in addition to household loans, loans to non-financial public companies also affected the credit growth.

Compared to the previous month, during April 2021, foreign exchange reserves increased by KM 394.2 million, so, in the end of April, the foreign exchange reserves amounted to KM 14.03 billion. Banks showed a significant demand for the local currency which resulted in a positive balance of KM purchase and sale. The purchase and sale balance with commercial banks and internal depositors was positive in the amount of KM 416.06 million. Foreign debt repayment in April accounted for KM 52.61 million. Currency board coverage for April was 105.96%.

Although reserve money was decreasing during the first three months in 2021, the monthly growth in the amount of KM 418.47 million was recorded in April. The major contribution to this growth came from the increase of deposits with monetary authorities in the amount of KM 322.3 million. In the end of April, reserve money amounted to KM 12.54 billion, which was higher by 13.13% compared to the same period of the previous year. The upward trend of monetary aggregate M2 was present in April, mainly under the influence of the growth of cash outside monetary authorities and transferable deposits in the local currency. Taking into account a stronger growth of reserve money and trends of money supply components, monetary multipliers M1 and M2 did not record any significant oscillations in the end of April.

Compared to the end of March 2020, the required reserve base increased by KM 119.22 million. In April, excess reserves amounted to KM 3.26 billion, exceeding the level from the pre-crisis period. The total balance of reserve accounts in the end of April amounted to KM 6.05 billion, being higher by 18.52% compared to the same period last year. Such growth indicates that the system is stable with depositors' confidence still existing, despite the third wave of the pandemic. Compared to March 2020, the implicit rate also increased in April, amounting to 21.7%. In April 2021, the Governing Board made a Decision on amendment of the Decision on setting and maintaining required reserves and setting compensation on the reserve amount, related to different treatment of the bases in foreign currencies. This decision will be applied from 01 June 2021. The CBBH has kept the required reserve rate unchanged.

Note: Brief notes on methodology can be found below each table, while more detailed ones are available at www.cbbh.ba

Notes applicable for tables 4, 5, 7, 8, 9, 10, 11, 12, 13.

Since 01 July 2017, the status change of the merger of subsidiary company UniCredit Leasing d.o.o. Sarajevo to the company Unicredit Bank d.d. Mostar has taken place. Accordingly, Unicredit Leasing d.o.o. Sarajevo has stopped existing as of 30 June 2017 and the data on the merged company are presented within the report on UniCredit Bank d.d. Mostar, starting from the report for July 2017.

The revised data for the period January 2006 – November 2015 are based on the active sub-balance of the banks with majority state owned capital from the Federation of BH, with the passive sub-balance excluded. Through such supplement of statistics, the users are provided with higher analytical usefulness of data and objective indicators on the current operations of banks in BH. Passive sub-balance includes the liabilities based on foreign loans and old foreign exchange savings of citizens until 31 March 1992 and it does not reflect the current operations of the bank, so this sub-balance in the privatization process will be taken over by the Ministry of Finance of FBH according to the Law on Initial Balance Sheets of Banks and the Law on Privatization, as it has been done for the previously privatized banks. The performed revision mainly influenced the decrease of loans to public companies in a foreign currency, decrease of foreign liabilities, decrease of other items of assets and liabilities on the basis of old foreign exchange savings, and in considerably lower amounts, on items of loans to the Entity Government, fixed assets, non-residents' deposits, shares and capital.

The data on the "complete" balance sheet, with the included passive sub-balance, are still available at: http://statistics.cbbh.ba:4444/Panorama/novaview/SimpleLogin_bs.aspx

In November 2014, two banks have realized the sale and transfer of part of the loan portfolio which resulted with increase in reserves with monetary authorities in the amount of 64 million KM and a decrease in the following items: claims of non-financial private enterprises 260 million KM, foreign liabilities 101 million KM and other items (net) 95 million KM.

Due to the application of International Accounting Standards (IAS) and the International Financial Reporting Standards applied in BH Federation banks and the transfer of money flows in December 2011 data, the following changes have occurred at the assets side: decrease of loans by KM 155 million, an increase in other assets by KM 10 million, at the liabilities side: decrease of liabilities to non-residents in the amount of KM624 million, an increase in loan loss provisions by KM 472 million and other liabilities increased by KM 7 million.

In February 2011, one bank from BH Federation reclassified deposits in the amount of around KM 80 million, from the deposits of public companies to the Entities' governments deposits, in line with the IMF recommendations.

By order of the FBH Banking Agency, in June 2010, one bank made a reclassification of about KM 300 million of claims based on securities on domestic institutional sectors to the claims on non-residents. In December 2010, the same bank made this reclassification, retroactively, in the respective amounts for the period from August 2009 when the error occurred, until May 2010. The above reclassification was reflected in the increase in foreign assets and decrease in other items net.

One bank from FBH made a reclassification of financial instruments in the foreign assets amounting to about KM 40 million for the period January - August 2010. Claims on non-residents based on loans were reclassified in claims on non-residents on the basis of securities, which resulted in changes in the short- term and long-term foreign assets.

By order of the Banking Agency of Republika Srpska, one bank made a reclassification of financial instruments on the liabilities side, for the period of September 2008 - November 2010, i.e. decrease in time and savings deposits of non-bank financial institutions and government sector, and the increase in loans from the same sectors, respectively in the appropriate amounts, by months, ranging from KM 50 - 150 million.

According to new regulations of the RS Banking Agency, published in the Official Gazette of RS no.136/10, which have defined a new way of recording claims classified in category "E", accounting and recording of interest on non-performing assets and calculation of general and special provisions, RS banks, in the data for December 2010 implemented the mentioned regulations, by transferring these items from off-balance records into balance sheet. The correction was reflected on the assets side, as increase of loans in the amount of KM 144 million, and increase of due interest in the amount of KM 36 million, and on the liabilities side, as increase in provisions for loan losses amounting to KM 180 million within the capital account.

Notes:

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Gross foreign reserves consist of balance sheet positions of short-term foreign assets of the CBBH (gold, CBBH SDR holdings, foreign exchange in the CBBH vault, transferable deposits in foreign currency with non-resident banks and other) and investment in securities according to the CBBH Investment Committee Decision from July 2006. Net foreign reserves represent a difference between gross foreign reserves and liabilities to non-residents. Monetary liabilities of the CBBH include money outside monetary authorities and deposits of residents with monetary authorities. Net foreign assets of CBBH represent a difference between net foreign exchange reserves and monetary liabilities of the CBBH.

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

The currency outside monetary authorities is taken from the CBBH Balance Sheet and it consists of cash outside the central bank (monetary authorities). Deposits of commercial banks are commercial banks' funds in accounts at the CBBH. Transferable deposits of other domestic sectors with monetary authorities are deposits of other domestic sectors (except central government deposits). The central government consists of BH Institutions, Entity governments, Entity Social Security Funds and those of Brčko District. Social security funds on Entity level (from Federation of BH: Pension Fund, Health Care Fund of FBH, Employment Fund of FBH, and from Republika Srpska: Pension and Disability Insurance Fund of RS, Health Care Fund of RS, Employment Fund of RS and Fund for Child Protection of RS) are classified on the central government level.

Cash outside banks is taken over from the CBBH Balance Sheet (Table 6) and represents cash in circulation outside the central bank (monetary authorities) and cash outside commercial banks. Transferable deposits in the domestic currency are taken from the Monetary Survey (Table 5). They consist of deposits of non-central government (cantons and municipalities), deposits of public and private companies, other financial institutions and deposits of other domestic sectors (households, non-profit institutions and other unclassified sectors). Other deposits in the domestic currency, transferable and other deposits in foreign currency are taken over from the Monetary Survey (Table 5). They consist of deposits of non- central government (cantons and municipalities), deposits of public and private companies, other financial institutions and deposits of other domestic sectors (households, non-profit institutions and other unclassified sectors).

Reserve money (primary money or monetary base) is entirely taken from the CBBH Balance Sheet (Table 6). It consists of cash outside monetary authorities, deposits of commercial banks and deposits of other domestic sectors (except for deposits of the central government) with monetary authorities. According to national definition, money supply comprises all transferable and other deposits of domestic nonbank and nongovernment sectors, as well deposits of local government in domestic and foreign currency. Deposits of entity Social Security Funds are included into the central government on Entity level and by that they are excluded from money supply or monetary aggregates. Monetary aggregate M1 comprises cash outside banks and transferable deposits in domestic currency of all domestic sectors (except for deposits of the central government). Monetary aggregate QM is defined in the same way as the corresponding item in the Monetary Survey (Table 5). It consists of other deposits in domestic currency, transferable and other deposits in a foreign currency of all domestic sectors (except for deposits of the central government). Money supply M2 comprises monetary aggregates, M1 and QM.

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports and in accordance with the recommendations of the IMF Manual and Guidelines for the 2016 compilation of monetary and financial statistics.

 $Monetary\ data\ updated\ according\ to\ the\ MMF\ methodology\ (Monetary\ and\ Financial\ Statistics\ Manual,\ 2000),\ from\ January\ 2006.$

The Monetary Survey presents the consolidated data from the Balance Sheet of CBBH - monetary authorities (Table 6) and the Consolidated Balance Sheet of Commercial Banks of Bosnia and Herzegovina (Table 7). Foreign assets (net) represent the difference between total foreign assets of the CBBH - monetary authorities and commercial banks of BH and total foreign liabilities of the CBBH -monetary authorities and commercial banks of BH. Domestic loans represent commercial banks' claims on all domestic sectors, but it should be noted that claims on central government are presented in net amounts, i.e. they are reduced by the deposits of central government with the CBBH and with BH commercial banks. The central government consists of BH Institutions, Entity governments, Entity Social Security Funds and those of Brčko District. According to new methodology, Social Security Funds are classified on the central government level as Entities' off-budget funds, which has a direct impact on the data about net claims on the central government in Monetary Survey.

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports and in accordance with the recommendations of the IMF Manual and Guidelines for the 2016 compilation of monetary and financial statistics.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Money M1 comprises currency outside banks, transferable deposits in the domestic currency of all domestic sectors (except for deposits of central government). Quasi money QM comprises other deposits in the domestic currency, transferable and other deposits in foreign currency of all domestic sectors (except for deposits of the central government). Money supply M2 comprises monetary aggregates, money M1 and quasi money QM. Other liabilities include securities, loans, shares and other equity and other items (net). According to a new methodology, loans are presented as separate financial instruments on the side of liabilities (with which the calculated interest is added), and also shares and other equity. Other items (net) are unallocated items of liabilities reduced by the unallocated items of assets. Other items (net) also comprise restricted deposits, counter-items of funds and government lending funds.

Reserve money (primary money or monetary base) is comprised of cash outside monetary authorities, deposits of commercial banks and deposits of other domestic sectors (except for the central government) with monetary authorities. Cash outside banks represents cash in circulation outside the Central Bank (monetary authorities) and cash outside commercial banks. The CBBH foreign liabilities are comprised of short-term liabilities towards non-residents, deposits of non-residents and other short-term liabilities towards non-residents and liabilities towards the IMF (Accounts 1 and 2).

Deposits of central government with the CBBH are transferable and other deposits of BH Institutions, Entity Governments, Entity Social Security Funds and those of Brčko District in the local currency. Shares and other equity comprise the equity, current year result, general and special reserves and adjustment/revaluation. Other items (net) are unallocated items of liabilities reduced by the unallocated items of assets.

Notes:

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports and in accordance with the recommendations of the IMF Manual and Guidelines for the 2016 compilation of monetary and financial statistics.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Consolidated balance sheet of commercial banks includes consolidated balance sheets of commercial banks covered by Main Unit Sarajevo, Main Unit Mostar and Main Bank of Republika Srpska CBBH and it represents consolidation of mutual claims and liabilities among the commercial banks. Banks' reserves consist of cash in the banks' vaults and banks' deposits with the Central Bank of Bosnia and Herzegovina. Foreign assets of commercial banks include: foreign currency in the vaults, transferable and other deposits with non-residents in foreign currency, loans to non-residents, securities of non-residents in foreign currency, and other claims on non-residents.

Claims on general government include claims on all levels of government: the central government (BH Institutions, Entity governments, Entity social security funds and Brčko District) and non-central governments (canton and municipality governments). Claims on other domestic sectors include claims on public non-financial enterprises, private non-financial enterprises, other financial institutions and claims on other domestic sectors (households, non-profit institutions and other unclassified sectors).

Notes:

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports and in accordance with the recommendations of the IMF Manual and Guidelines for the 2016 compilation of monetary and financial statistics.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Central government deposits include transferable and other deposits in domestic and foreign currency of BH Institutions, Entity governments, Entity social security funds and those of Brčko District. Transferable and other deposits of other domestic sectors in domestic and foreign currency represent banks liabilities towards non-central government (canton and municipality governments), public non -financial enterprises, private non-financial enterprises, other financial institutions and other domestic sectors (households, non-profit institutions and other unclassified sectors). Foreign liabilities of commercial banks include banks liabilities to non-residents based on transferable and other deposits, loans, securities, trade loans and advance payments and other accounts payable. According to a new methodology, loans are presented as a separate financial instrument on the side of liabilities, with which the calculated interest is added.

Shares and other equity include equity, retained earnings, current year result, general and special reserves and adjustment /revaluation. Other items (net) are unallocated items of liabilities reduced by the unallocated items of assets. Restricted deposits are also included in other items (net).

Notes:

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

By order of FBA in March 2010, loans to households with currency clause with one bank were reclassified, from loans in EUR to loans in KM.

Notes

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Deposits of domestic institutional sectors represent liabilities of commercial banks towards all institutional sectors. Deposits on the BH level represent deposits with commercial banks covered by Main Unit Sarajevo, Main Unit Mostar and Main Bank of Republika Srpska CBBH Banja Luka. Sight deposits represent liabilities of commercial banks related to transaction accounts and sight deposits in domestic and foreign currency.

Notes:

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Loans to domestic institutional sectors represent claims of commercial banks on all institutional sectors. Loans at the BH level include loans extended by commercial banks covered by Main Unit Sarajevo, Main Unit Mostar and Main Bank of Republika Srpska CBBH Banja Luka. The total of claims on all leves of government and funds (short-term and long- term) are shown in Table of short-term loans (columns 3,4,5,6,7) in total amount, because source data do not provide a maturity structure of claims for governments and funds. Short – terms loans represent claims of commercial banks on all domestic institutional sectors up to one year, in domestic and foreign currency.

Notes:

Revised data for February 2021

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Total claims on all levels of government and funds (short-term and long- term) are shown in Table of short-term loans (columns 3,4,5,6,7) in the total amount, because the source data do not provide the maturity structure of claims for governments and funds. Long – terms loans represent claims of commercial banks on all domestic institutional sectors over one year in domestic and foreign currency.

Since 01 July 2017, the status change of the merger of subsidiary company UniCredit Leasing d.o.o. Sarajevo to the company Unicredit Bank d.d. Mostar has taken place. Accordingly, Unicredit Leasing d.o.o. Sarajevo has stopped existing as of 30 June 2017 and the data on the merged company are presented within the report on UniCredit Bank d.d. Mostar, starting from the report for July 2017.

IRF – initial rate fixation

The interest rate on the revolving loans and credit cards, includes data on credit cards with loan facility. Considering that credit cards with loan facility imply an interest free deferred payment (0% ir), they are not published.

No data for interest rates on loans in foreign currency on the basis of credit cards and overdrafts to non-financial corporations.

^{*} Interest rates in table for revolving loans and credit cards and their amounts refer to the outstending amounts.

^{...} insufficient data to be published

Since 01 July 2017, the status change of the merger of subsidiary company UniCredit Leasing d.o.o. Sarajevo to the company Unicredit Bank d.d. Mostar has taken place. Accordingly, Unicredit Leasing d.o.o. Sarajevo has stopped existing as of 30 June 2017 and the data on the merged company are presented within the report on UniCredit Bank d.d. Mostar, starting from the report for July 2017.

IRF – initial rate fixation

The interest rate on the revolving loans and credit cards, includes data on credit cards with loan facility. Considering that credit cards with loan facility imply an interest free deferred payment (0% ir), they are not published.

No data for interest rates on loans in foreign currency on the basis of credit cards and overdrafts to non-financial corporations.

^{*} Interest rates in table for revolving loans and credit cards and their amounts refer to the outstending amounts.

Notes:

From July 1st, 2016 the required reserves rate applied by the CBBH to the base for calculation of required reserves is 10%. From 1 July 2016, the CBBH applies the new rates for the calculation of fees to the funds in the banks' reserves accounts: in the accounting period, the Central Bank does not charge a fee on the amount of required reserves in commercial banks' reserves accounts, and on the amount of excess reserves, the CBBH charges the fee at the rate equal to 50% of the rate applied to commercial banks' deposits (deposit facility rate) by the European Central Bank.

Since May 1st, 2015 the Central Bank has calculated the compensation for a bank on the amount of the bank's funds in the reserve account with the Central Bank in the calculation period, as it follows:

- -on the reserve requirement amount the average of EONIA recorded in the same period on the market reduced by 10 basis points, or minimum zero.
- -on the amount of the funds exceeding the reserve requirement zero rate of compensation.

The zero rate of compensation on the reserve requirement is applied in case the average EONIA decreased by 10 basis points has a negative value.

From September 1st, 2014 the remuneration rate has been calculated on the basis of the weighted average interest rate which was earned by the Central Bank of BH on the market in the same period on deposits invested up to a month. and 70% is calculated on the amount of required reserve or minimum 0, while 90% of the mentioned rate is calculated on the amount of excess reserves or minimum 0.

From August 1st, 2011 the remuneration rate is calculated by the weighted average interest rate which were earned by the Central Bank on deposits invested up to a month in the same period. 70% of this rate is calculated on the amount of required reserves while 90% of the same rate is calculated on the amount of excess reserves.

From February 1st, 2011 the required reserves rate on deposits and borrowed assets with contracted term of maturity up to one year was declined from 14% to 10%, while the required reserves rate on deposits and borrowed assets with contracted term of maturity over one year is not changed.

From July 1st, 2010 remuneration rate on the amount of required reserves is changed and calculated as an average of interest rates, which were earned by the Central bank on overnight deposits in the same period, while remuneration rate on the amount of excess reserves is not changed.

From May 1st, 2009 the required reserves rate is 7% on deposits and borrowed assets with contracted term of maturity over one year.

From April 1st, 2009 remuneration rate is calculated as:

- -On the amount of required reserve is 0,5%.
- -On the amount of excess reserves on the rate calculated as an average of interest rates, which were earned by the Central bank on deposits invested up to one month.

From January 1st, 2009 the required reserves rate is 14% on deposits and borrowed assets with contracted term of maturity up to one year and 10% on deposits and borrowed assets with contracted term of maturity over one year.

From October 11th, 2008 required reserves rate was declined from 18% to 14%.

From January 1st, 2008 required reserves rate was increased from 15% to 18%.

*The base for calculation of required reserves includes deposits and borrowed funds in domestic (in KM and KM with the currency clause) and other currency expressed in KM.

Notes:

Criteria for presenting country is the share of export of the country in total three-year BH export (2016,2017,2018).

 $Thus, all \ countries \ with \ share \ higher \ than \ 3,0\% \ are \ separately \ presented, \ while \ the \ other \ countries \ are \ presented \ as \ sum \ in \ the \ column \ Other \ countries.$

Criteria for presenting country is the share of import of the country in total three-year BH import (2016,2017,2018).
Thus, all countries with share higher than 3,0% are separately presented, while the other countries are presented as sum in the column Other countries
