APPENDIX	10

Introduction

The results of the Bank Lending Survey refer to changes in the third quarter of 2025 and expectations for the fourth quarter of 2025. A representative sample of banks consists of the eight largest banks in Bosnia and Herzegovina. The total of eight banks were surveyed in this round, and the response rate was 100%.

1. General information

The Survey questionnaire contains 16 standard questions about realized and expected changes on the supply and demand of loans: 12 questions refer to realized changes and 4 questions to future changes. The questions cover three categories of loans: loans or credit lines to corporates, housing loans to households, and consumer and non-purpose loans to households. For all the three categories, questions are asked about the credit standards that apply to loan approval, then about changes in loan approval terms, demand for loans, factors affecting the supply and demand for loans, as well as the percentage of rejected loan applications. Survey questions are generally formulated in terms of changes in the last three months and the expected changes in the next three months. Survey participants are asked to qualitatively indicate the degree of tightening or easing (for standards and terms) or the degree of reduction or increase (for demand), using the following five-point scale to report changes: (1) significant tightening/decrease, (2) moderate tightening/decrease, (3) basically no change, (4) moderate easing/increase or (5) substantial easing/increase.

The individual answers of the banks participating in the Survey were compiled and processed in order to provide a picture of the entire banking sector in Bosnia and Herzegovina.

The results of the Survey are presented in the form of a net percentage. The net percentage for the answers to questions about credit standards is defined as the difference between the sum of the shares of banks that answered that credit standards have been "substantially relaxed" and "moderately relaxed" and the sum of the shares of banks that answered that they have been "significantly tightened" and "moderately tightened".

A negative value of the net percentage indicates that the majority of banks have tightened credit standards ("net tightening"), while a positive value of the net percentage indicates that a majority of banks have relaxed credit standards ("net easing").

Likewise, the term "net demand" refers to the difference between the percentage of banks that answered that there was an increase in demand and the percentage of banks that answered that there was a decrease in demand for loans. Net demand will therefore be positive if a larger share of banks reported an increase in loan demand, while a negative net demand indicates that a larger share of banks reported a decline in loan demand.

In addition to the "net percentage" indicator, the CBBH also publishes the "diffusion index" as an alternative measure of banks' responses to the questions related to changes in credit standards and net demand. The diffusion index is constructed as follows: if the respondent answers "significantly", the answers are assigned a numerical value of 1, which is twice the value assigned to the answers "to a certain degree" (score 0.5). The interpretation of the diffusion index follows the same logic as the interpretation of the net percentage.

2. Corporates loans

2.1 Supply

2.1.1 Credit standards for corporates loans

In the third quarter of 2025, the net percentage points that credit standards have been slightly tightened for both short-term and long-term corporate loans (see Appendix, question 1).

* The net percentage does not measure the intensity of the change. A lower (higher) value of the net percentage shows that a larger number of banks tightened (eased) credit standards compared to the previous quarter. In all Graphs, the comparison is made in relation to the previous quarter.

The graph below shows the net percentage of contributions of factors which impacted a change of credit standards of banks applied in the process of approving loans and/or credit lines to corporates. (see Appendix, question 2).

2.1.2 Terms and conditions of approving the corporate loans

Regarding the terms of approving the corporate loans in the third quarter of 2025, the interest margin and the collateral requirements had a net tightening effect, while the maturity, commissions and fees, as well as the maximum loan amount remained unchanged compared to the previous quarter (see Appendix, question 3).

2.1.3 Share of rejected applications for corporates loans

In the third quarter of 2025, the net result from compiled responses shows that there has been a slight increase of the share of rejected applications for loans to corporates compared to the previous quarter (see Appendix, Question 4).

2.2 Demand for corporate loans and/or credit lines

The net result based on bank responses indicates that the demand for corporate loans continued to increase in the third quarter of 2025 (see Appendix, question 5).

The graph below shows the net contribution percentage of the factors that influenced the change of the corporate loans demand and/or credit lines (see Appendix, question 6).

Expectations for the fourth quarter of 2025

The net result from the collected responses of banks indicates credit standards for approval of loans to corporates remain unchanged in the fourth quarter of 2025 (see Appendix, Question 7).

At the same time, banks are expecting an increase of the corporates' demand for short-term and long-term loans and/or credit lines in the fourth quarter of 2025 (see Appendix, question 8).

3. Loans to households

3.1 Supply

3.1.1 Credit standards for loans to households

In the third quarter of 2025, the net percentage of the change indicates that there has been a slight easing of standards for approval of housing loans, while the standards for approval of consumer and non-purpose loans remained unchanged compared to the previous quarter (see Appendix, question 9).

The graph below shows a net percentage of contributions of the factors impacting a change of bank credit standards applied in the process of approval of loans to households (see Appendix, question 10).

3.1.2 Terms and conditions of approving loans to households

Related to the terms and conditions on loans to households in the third quarter of 2025, interest margin, commissions and fees had the net easing effect, while collateral requirements, maturity and maximum loan amounts remained unchanged compared to the previous quarter (see Appendix, question 11).

3.1.3 Share of rejected applications for loans to households

In the third quarter of 2025, the net result from compiled responses indicates that there was no change of the share of rejected applications for approval of loans to households compared to the previous quarter (see Appendix, question 12).

3.2 Demand on loans to households

The net result based on bank survey shows that households' demand on housing, consumer and non-purpose loans continued to increase in the third quarter of 2025, too. The growth in demand for housing loans was more evident compared to consumer and non-purpose loans (see Appendix, question 13).

The graph below shows the net percentage of the contributions of the factors that influenced a change in demand on loans to households (see Appendix, question 14).

Expectations for the fourth quarter of 2025

The results of the survey analysis show that the net percentage of the answers is positive, which indicates banks' expectation that the credit standards for approving housing loans to households in the fourth quarter of 2025 will be relaxed (see Appendix, question 15).

Banks have an optimistic view of household demand for consumer and non-purpose loans, so increased demand is expected in the fourth quarter of 2025, while in regard to housing loans it is projected that demand will remain unchanged (see Appendix, question 16).

APPENDIX

Consolidated answers of banks for the third quarter of 2025, related to the questions from the Survey questionnaire

I. Loans and credit lines to corporates

- Over the past three months, how have your bank's credit standards as applied to the approval of loans and/or credit lines to corporates, changed?

(in per cent)

Periods	Overall		Short-term loans		Long-term loans	
	Net percentage	Diffusion index	Net percentage	Diffusion index	Net percentage	Diffusion index
Q3 2021	-13	-6	-13	-6	-13	-6
Q4 2021	0	0	0	0	0	0

Q2 2025	-13	-6	0	0	0	0	-13	-6	0	0
Q3 2025	-13	-6	0	0	0	0	-13	-6	0	0

4. Over the past three months (apart from normal seasonal fluctuations), has the share of loan applications, that were rejected by your bank, decreased, remained unchanged or increased in relation to the total amount of loan applications?*

(in per cent)

Periods	Share of rejected applications	
	Net percentage	Diffusion index
Q3 2021	0	0
Q4 2021	0	0
Q1 2022	14	7
Q2 2022	0	0
Q3 2022	14	7
Q4 2022	-14	-7
Q1 2023	14	7
Q2 2023	13	6
Q3 2023	13	6
Q4 2023	0	0
Q1 2024	-13	-6
Q2 2024	0	0
Q3 2024	13	6
Q4 2024	0	0
Q1 2025	0	0
Q2 2025	0	0
Q3 2025	13	6

*Since the second quarter of 2021, there were changes in the analysis of the share of rejected loan applications compared to previous quarters. Instead of the number of rejected loan applications, an information on the change of the amount of rejected loans applications during the observed quarter is provided.

5. Over the past three months (apart from normal seasonal fluctuations), how has the demand on loans and/or credit lines to corporates changed at your bank?

(in per cent)

12. Over the past three months (apart from normal seasonal fluctuations), has the share of household loan applications, that were rejected at your bank, decreased, remained unchanged or increased compared to the total number of loan applications of households?*

(in per cent)

Periods	Share of rejected applications	
	Net percentage	Diffusion index
Q3 2021	13	6
Q4 2021	13	6
Q1 2022	-14	-7
Q2 2022	0	0
Q3 2022	14	7
Q4 2022	0	0
Q1 2023	0	0
Q2 2023	25	13
Q3 2023	25	13
Q4 2023	13	6
Q1 2024	13	6
Q2 2024	0	0
Q3 2024	0	0
Q4 2024	13	6
Q1 2025	0	0
Q2 2025	0	0
Q3 2025	0	0

* Since the second quarter of 2021, there were changes in the analysis of the share of rejected loan applications, compared to previous quarters. Instead of the number of rejected loan applications, an information on the change of the amount of rejected loans applications during the observed quarter is provided.

13. Over the past three months (apart from normal seasonal fluctuations), how has the demand for households loans changed at your bank?

(in per cent)

Periods	Overall		Loans for housing purchase		Consumer and non-purpose loans	
	Net percentage	Diffusion index	Net percentage	Diffusion index	Net percentage	Diffusion index
