INTRODUCTORY SUMMARY

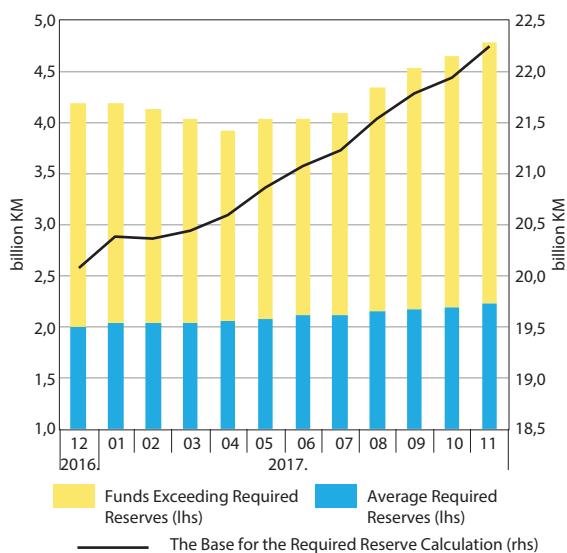

The high level of the foreign exchange reserves which was achieved during the third quarter due to a strong demand for the local currency was kept after the end of the tourist season. The foreign exchange reserves recorded a strong upward trend, due to the continuous growth of the deposits of domestic sectors, mainly those in the domestic currency (Graphs 01 and 02). The total deposits continued to grow, firstly due to the growth of the deposits of households and government sector, while lending activities recorded a slow growth (Graphs 03 and 04). The foreign assets and foreign liabilities of commercial banks recorded a decrease at the monthly level (Graph 05). Money supply in November recorded a slow monthly decrease, due to the decrease of quasi money (Graph 06). The debt of the general government sector with commercial banks recorded an annual growth (Graph 07). Since the beginning of 2017, a stronger growth of consumer prices was observed, which was particularly caused by the increase of the prices of food, non-alcohol beverages, and the prices of transport, which was also the feature of the main foreign trade partners (Graphs 08 and 09). In November, the appreciation trend of the nominal effective exchange rate was continued, but the real effective exchange rate measured by producer prices was higher than the REER measured by consumer prices (Graph 10). The indices of industrial turnover and industrial production recorded a significant increase at the annual level (Graph 11). A high export growth rate was also recorded due to the growth of the exports of all the main product groups (Graph 12), with the simultaneous high rate of the import growth (Graph 13). The revenues from the indirect tax collection increased, which resulted in the growth of the cumulative collection of indirect taxes compared to the same period of the previous year (Graph 14). The revenues based on customs duties recorded a high annual growth (Graph 15). After a short slow-down of the turnover growth in internal interbank payment system, a significant growth of turnover was resumed (Graph 16). A positive impact on the total trade came from a strong growth of tourists arrivals and nights (Graph 17). A low yield and high demand were the features of the public debt issues on the domestic stock exchanges (Graph 18).

Source: Tables 02 and 03

G02: The Base for the Required Reserve Calculation and the Reserve Account Balance

Source: Table 17

G03: Deposits, Monthly Changes

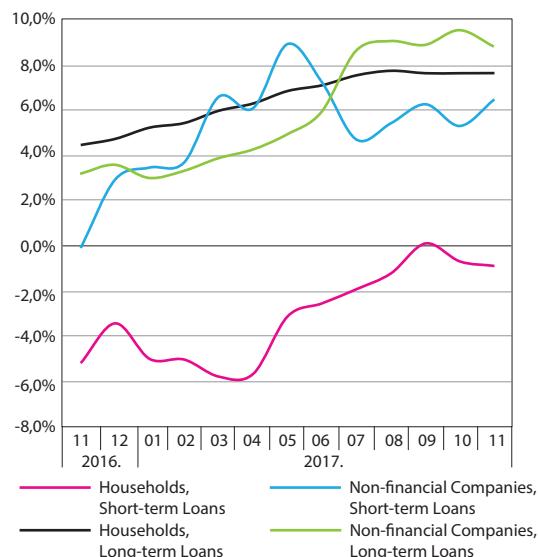

Source: Tables 10 and 11

The high level of the foreign exchange reserves which was recorded during the third quarter due to a strong demand for the local currency was kept after the end of the tourist season. Due to the negative values of the KM purchase and sale balance in November, the foreign exchange reserves recorded a small monthly decrease, and they were at the level of KM 10.3 billion.

The base for the required reserve calculation continued to record a strong upward trend. This increase was primarily the result of the continuous growth of deposits of the local sectors in the local currency. Foreign currency deposits also recorded a higher growth over the previous three months compared to the previous periods. The balance in reserve accounts amounted to KM 4.80 billion and a considerable monthly increase was recorded, particularly that of excess funds.

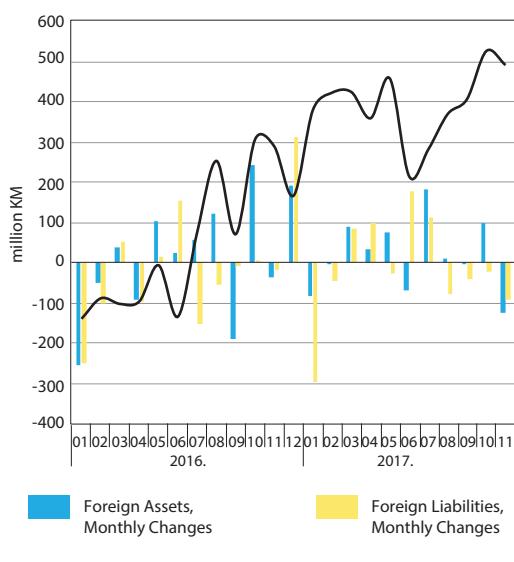

The total deposits in BH banking sector reached the level of KM 19.66 billion, which was a growth of 11.2% at the annual level. The increase of the total deposits in November at the monthly level was caused by the growth of the government deposits (KM 91.9 million) and household deposits (KM 38.4 million), while a decrease was recorded with non-financial companies (KM 20.3 million).

G04: Loans, Annual Growth Rates

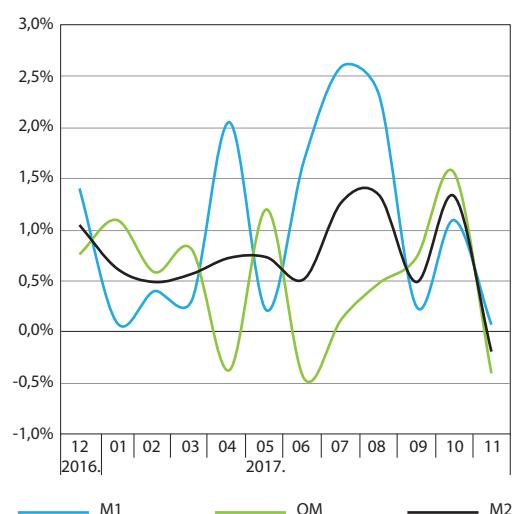

Source: Tables 12 and 13

G05: Foreign Assets and Foreign Liabilities of Commercial Banks

Source: Table 07

G06: Monthly Growth Rates of Monetary Aggregates

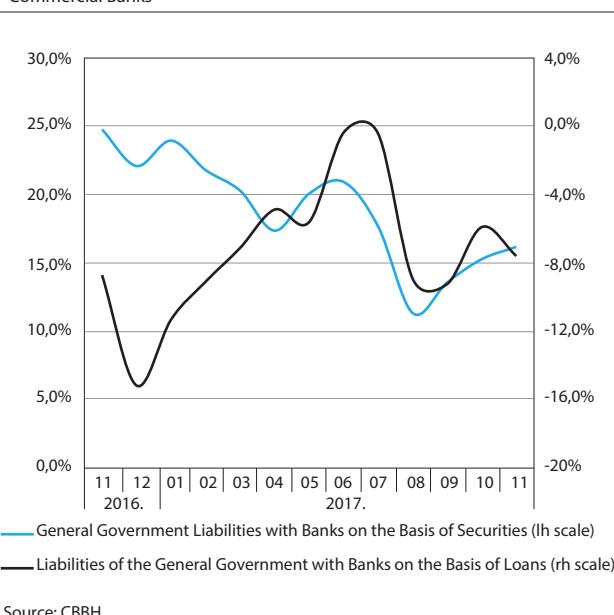

Source: Table 04

In the end of November, the total loans amounted to KM 18.26 billion, which was a growth of 6.5% at the annual level. The loans to non-financial companies recorded positive growth rates at the annual level, those being 6.5% for short-term and 8.8% for long-term loans. Long-term household loans stagnated at the level slightly below 8% since July, while the short-term loans extended to this sector still recorded negative growth rates.

The graph illustrates a decrease of the foreign assets and liabilities of commercial banks at the monthly level. The decrease of foreign assets was mainly caused by a decrease of deposits (KM 96.7 million) and foreign currency in the vault (KM 22.8 million). The decrease of foreign liabilities was slightly lower compared to the decrease of foreign assets over the observed month and it was mainly caused by the decrease of loans from non-residents (KM 84.3 million).

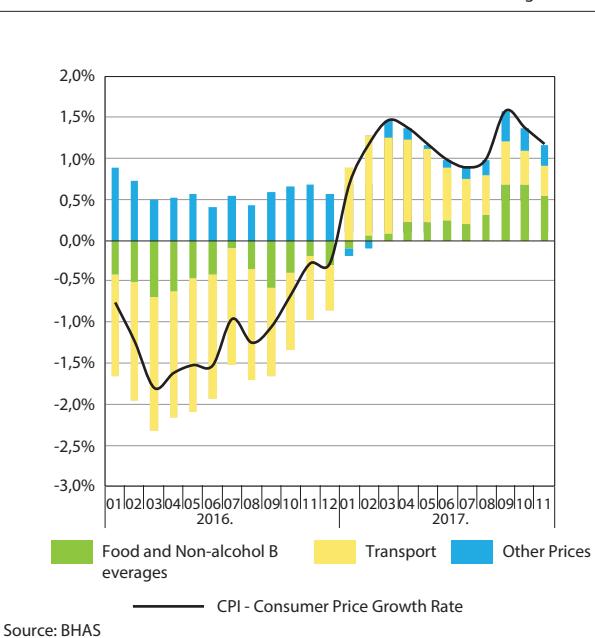

Broad money supply for the first time since the beginning of the year recorded a negative monthly rate of change, slightly below 0.0%. This was a result of the decrease of quasi money, while the monetary aggregate M1 continued to grow, at a slightly lower rate compared to the other part of the year.

G07: Annual Rates of Change of the General Government Liabilities with Commercial Banks

In November, the liabilities based on the issued securities of the general government increased at the monthly level, while at the same time, there was a decline of the liabilities on the basis of loans. In the end of November, the total debt of the general government sector on these two bases amounted to KM 2.25 billion, which was the annual growth of KM 99.6 million or 4.6%. The exposure of the banking sector to the general government sector was 8.0% of the total banking sector assets.

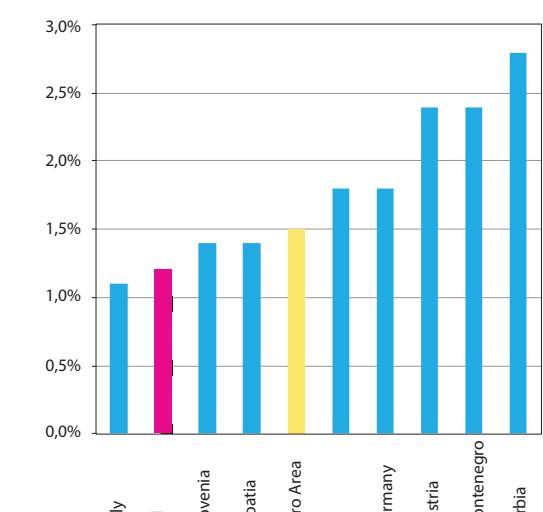

G08: Contribution to the Annual Rates of the Consumer Price Change

The several year long downward trend of consumer prices, at the annual level, was ended in the beginning of 2017, which was followed by a stronger growth of consumer prices.

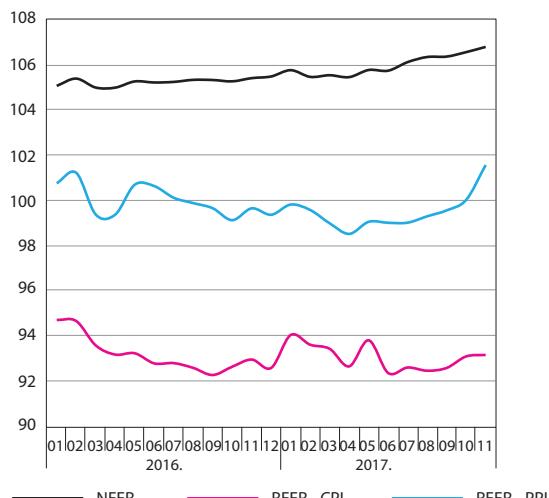

The positive contribution to the change of the annual rate of consumer prices was recorded with the prices of food and non-alcohol beverages (0.6 pp), and transport prices (0.4 pp). The contribution of the prices of other groups of products and services, in summary, in November was 0.2 pp, firstly due to a significant increase of the average prices in the section of alcohol beverages and tobacco, the growth of which was 5.9% in November.

G09: The Annual Inflation Rate of the Main Trading Partners of Bosnia and Herzegovina

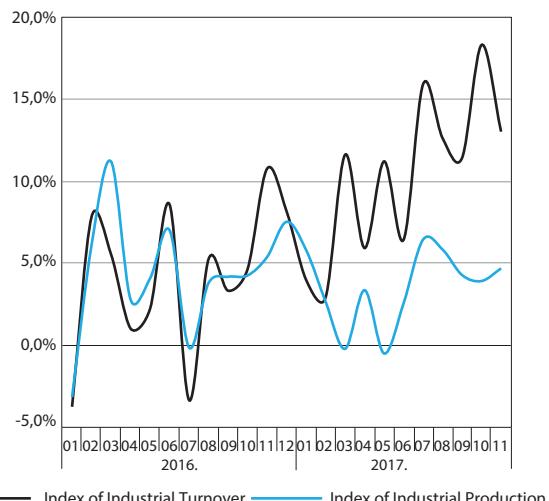

In six out of seven key BH trading partners, the inflation (m/m-12) in November was higher than in Bosnia and Herzegovina. The strongest impact on the inflation in the euro area (1.5%) was that of the energy prices (the annual growth of 4.7%), while the price of transport in BH, where the share of energy is the largest, increased by only 2.8%. The growth of price competitiveness due to a lower inflation rate compared to Serbia and Croatia was partly compensated by a strong euro appreciation of 4.2% (m/m-12). Serbia, with the inflation rate of 2.8% is within the range determined as targeted 3% inflation, with the permitted volatility of +/-1.5%. The introduction of additional excise duties and tolls will bring the local inflation closer to the inflation in the region.

G10: Nominal and Real Effective Exchange Rate of KM (NEER and REER)

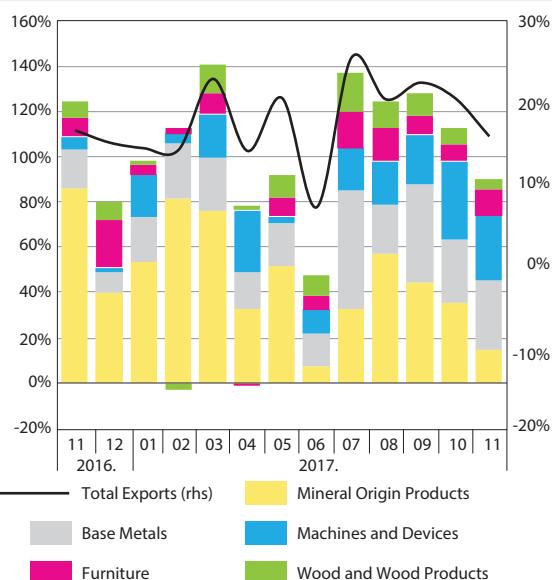

Source: CBBH

G11: The Annual Growth Rate of Industrial Turnover and Industrial Production

Source: BHAS

G12: Exports by the Main Product Groups, Annual Growth Rates

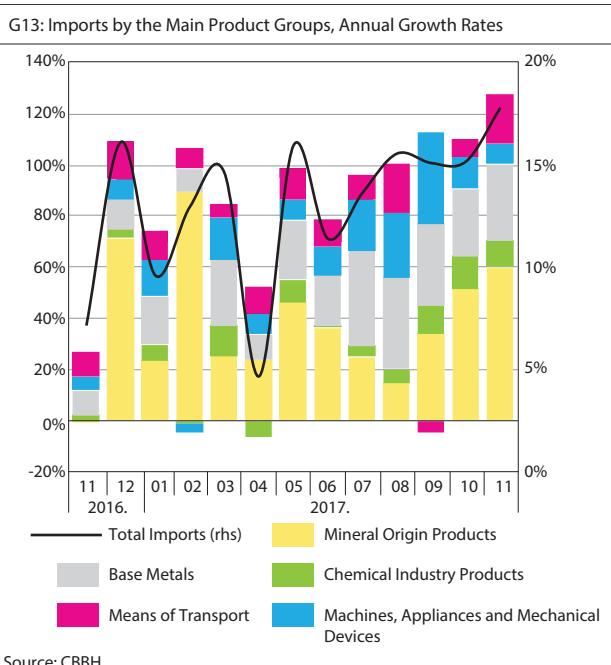

Source: CBBH

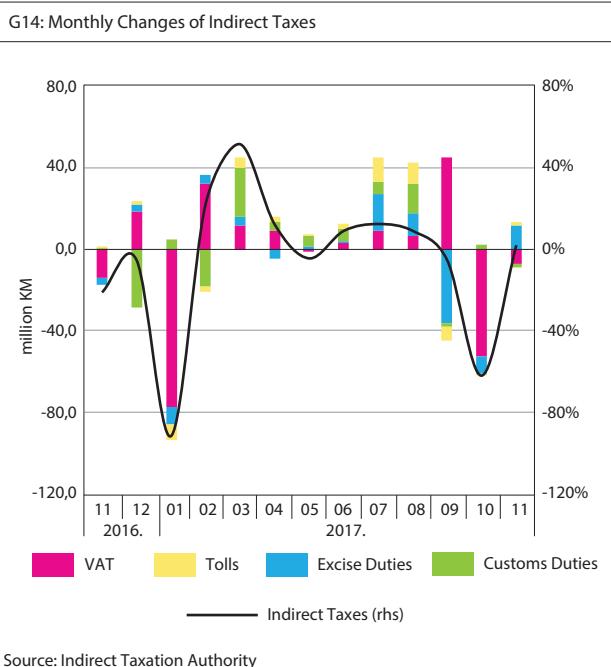

In November, the growth trend continued (appreciation) of the nominal effective exchange rate (NEER). In November, NEER recorded the most significant appreciation against Turkish lira (28.6%), US dollar (8.6%) and Swiss franc (8.2%). At the annual level, NEER appreciated by 1.37 pp. The real effective exchange rate (REER) measured by producer prices was higher than the REER measured by consumer prices. The REER measured by producer prices recorded a growth trend in the second half of 2017. In November, the REER-PPI was higher by 1.91pp compared to the same month of the previous year. The REER-CPI also recorded an upward trend in the second half of the year, although at a lower intensity. At the annual level, REER -CPI appreciated by 21bp.

The index of industrial turnover indicates that the value of industrial turnover followed a similar trend as the industrial production index, with a visible brief time lag of industrial production in relation to sale. The total sale in the local market in eleven months recorded the annual growth (5.0%), however the growth of the sale in foreign market was stronger (16.6%). Observing the structure of the annual growth rate of industrial production, in November, the growth was recorded in manufacturing industry (8.1%) and mining (10.5%), while the distribution and production of electric energy and gas recorded a decline (-7.6%).

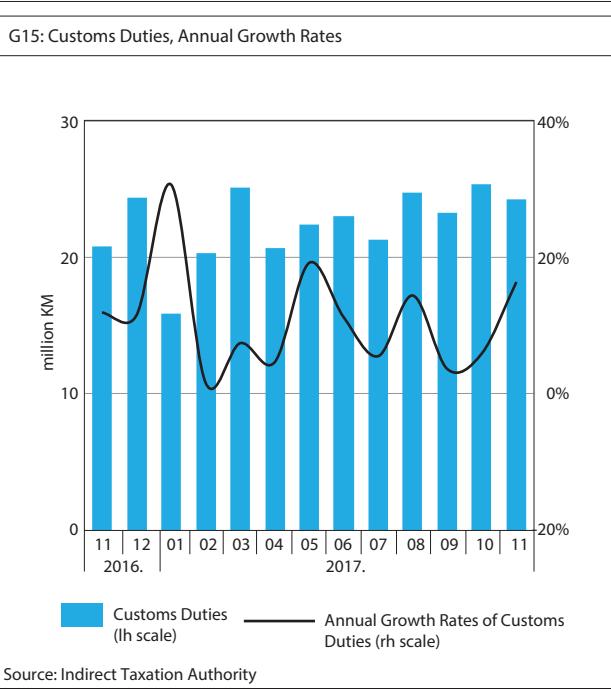

The annual export growth rate in November amounted to 15.8%. The exports of base metals, and machines, appliances and electric devices increased by one third. The exports of the mineral origin products increased at the rate of 14.5%, while the exports of furniture increased at the annual level by 11.5%. In the first eleven months of 2017, the total of KM 10.2 billion of goods value was exported, which was higher by 18.0% than in the same period of the previous year. In this period, the most significant increase was recorded in the exports of the mineral origin products (41.4%).

In November, the import growth rate amounted to 17.8%. The most significant growth was recorded with the group of products which are mainly under the impact of the trends of prices in the global markets, oil and oil products and base metals. So, in November, the imports of oil and oil derivatives increased by two thirds, while the imports of base metals increased by one third. In the first eleven months, the imports at the annual level increased by 13.5%, however, the growth rate of the mineral origin products, which mainly relates to oil and oil products, amounted to 39.1%.

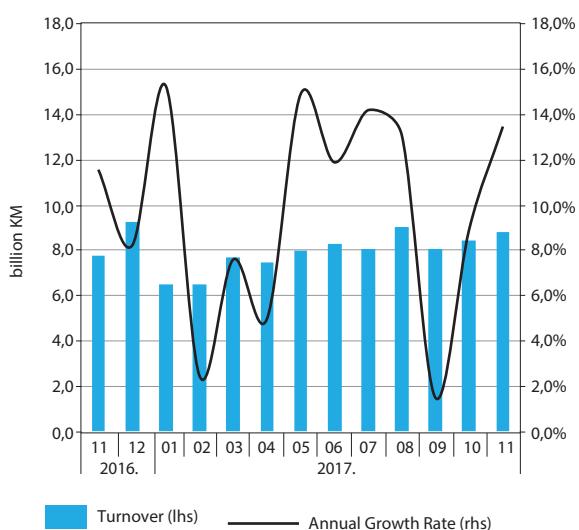

Following a significant decline of the revenues from indirect taxes at the monthly level, due to the high amount of reimbursements in the previous month, a slow growth was recorded in November. The highest contribution to the revenue stabilization at the monthly level came from excise duties the growth of which was recorded in the amount of KM 12 million. The total collected revenues from indirect taxes in eleven months amounted to KM 5.31 billion, and, compared to the previous year, they increased by 5.4%.

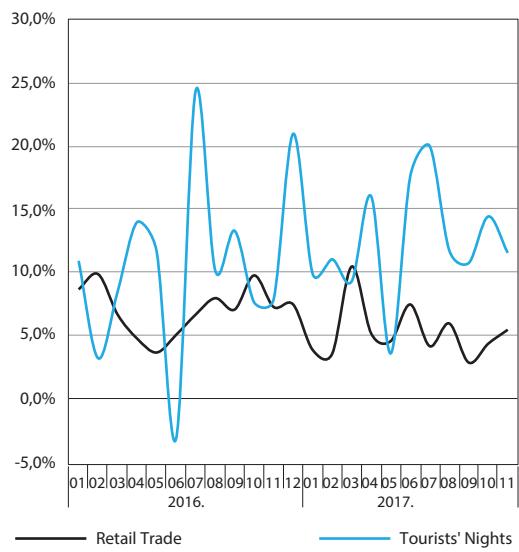

In November, the growth of the revenues from customs duties was recorded at the annual level. During the year, positive trends were recorded in the collection of the revenues from customs duties with strong monthly oscillations. Although the decline in the revenues was expected on this basis due to the implementation of the Stabilization and Association Agreement, the growth of the revenues, resulted also from the recovery of the imports of goods from the third countries, and also the imports of goods from the EU, for which customs duties are still paid. In eleven months, KM 246.2 million was collected, which was higher by 10.0% compared to the same period of the previous year.

Source: SASE. Note: The auction date is presented on x axis.

In November 2017, the total of 3.4 million transactions amounted to KM 8.78 billion. The turnover in November 2017 was lower by 4.91% compared to the highest turnover recorded in December 2016 (KM 9.23 billion). The turnover in RTGS accounted for 83.97% of the turnover, while the turnover in Giro Clearing accounted for 16.03% of the total turnover. After a significant slow-down of the growth of the turnover value in September 2017, the turnover at the annual level increased again at two digit rates. Compared to the same month of the previous year, the total turnover increased by 13.5%, while compared to the previous month, the growth was 4.07%. At the annual level, the turnover in RTGS and Giro Clearing in November 2017 was higher by 15.06% and 5.92% respectively.

In November, the real index of retail trade recorded the growth of 5.4% compared to the same month of 2016. The strongest impact on the growth of the total turnover was recorded in retail trade in non-food products, where the annual growth was 7.6%. Also, the annual growth of the overall trade was recorded in retail trade in food, beverages and tobacco products (4.6%), and retail trade in motor fuels (2.1%). The positive impact on the overall trade, as well as the general economic activity, came from a significant increase of tourists' arrivals and nights. The annual increase of tourist nights in the first eleven months of 2017 was 12.6%.

In November, the Federation of Bosnia and Herzegovina issued the three issues of public debt in the total nominal value of KM 60 million. In addition to two issues of 12 m treasury bills, one issue of 9m treasury bills was also issued. Despite the yield to maturity rate which is close to zero in the primary market (0.0098%) the demand for the issue of 9 m T-bills was quite high which could be related to a negative remuneration on the funds exceeding required reserves which had been introduced by the CBBH on 01 July 2016. The yield rate on 12m treasury bills was also low, amounting to 0.03% i.e. 0.017%.

Notes applicable for tables 4, 5, 7, 8, 9, 10, 11, 12, 13.

-The revised data for the period January 2006 – November 2015 are based on the active sub-balance of the banks with majority state owned capital from the Federation of BH, with the passive sub-balance excluded. Through such supplement of statistics, the users are provided with higher analytical usefulness of data and objective indicators on the current operations of banks in BH. Passive sub-balance includes the liabilities based on foreign loans and old foreign exchange savings of citizens until 31 March 1992 and it does not reflect the current operations of the bank, so this sub-balance in the privatization process will be taken over by the Ministry of Finance of FBH according to the Law on Initial Balance Sheets of Banks and the Law on Privatization, as it has been done for the previously privatized banks. The performed revision mainly influenced the decrease of loans to public companies in a foreign currency, decrease of foreign liabilities, decrease of other items of assets and liabilities on the basis of old foreign exchange savings, and in considerably lower amounts, on items of loans to the Entity Government, fixed assets, non-residents' deposits, shares and capital.

The data on the „complete“ balance sheet, with the included passive sub-balance, are still available at: http://statistics.cbbh.ba:4444/Panorama/novaview/SimpleLogin_bs.aspx

- In November 2014, two banks have realized the sale and transfer of part of the loan portfolio which resulted with increase in reserves with monetary authorities in the amount of 64 million KM and a decrease in the following items: claims of non-financial private enterprises 260 million KM, foreign liabilities 101 million KM and other items (net) 95 million KM. (napomena uz tabelle T

-Due to the application of International Accounting Standards (IAS) and the International Financial Reporting Standards applied in BH Federation banks and the transfer of money flows in December 2011 data, the following changes have occurred at the assets side: decrease of loans by KM 155 million, an increase in other assets by KM 10 million, at the liabilities side: decrease of liabilities to non-residents in the amount of KM 624 million, an increase in loan loss provisions by KM 472 million and other liabilities increased by KM 7 million.

- In February 2011, one bank from BH Federation reclassified deposits in the amount of around KM 80 million, from the deposits of public companies to the Entities' governments deposits, in line with the IMF recommendations.

- By order of the FBH Banking Agency, in June 2010, one bank made a reclassification of about KM 300 million of claims based on securities on domestic institutional sectors to the claims on non-residents. In December 2010, the same bank made this reclassification, retroactively, in the respective amounts for the period from August 2009 when the error occurred, until May 2010. The above reclassification was reflected in the increase in foreign assets and decrease in other items net.

- One bank from FBH made a reclassification of financial instruments in the foreign assets amounting to about KM 40 million for the period January - August 2010. Claims on non-residents based on loans were reclassified in claims on non-residents on the basis of securities, which resulted in changes in the short- term and long- term foreign assets.

- By order of the Banking Agency of Republika Srpska one bank made a reclassification of financial instruments on the liabilities side, for the period of September 2008 - November 2010, i.e.. the decrease in time and savings deposits of non-bank financial institutions and government sector, and the increase in loans from the same sectors, respectively, in the appropriate amounts, by months, ranging from 50 - 150 million KM.

- In accordance with new regulations of the RS Banking Agency, published in the Official Gazette of RS, no.136/10, which has regulated a new manner of recording receivables classified in category "E", accounting and bookkeeping of interest on non-performing assets and calculation of general and special provisions, RS banks , in the data for December 2010, implemented the mentioned regulations, by transferring these items from off-balance records into balance sheet. The correction was reflected on the assets side, as increase of loans in the amount of about KM 144 million, and increase of due interest in the amount of KM 36 million, and on the liabilities side, as increase in provisions for loan losses amounting to about KM 180 million within the capital account.

By order of the Banking Agency of Republika Srpska, one bank made a reclassification of financial instruments on the liabilities side, for the period of September 2008 - November 2010, i.e. decrease in time and savings deposits of non-bank financial institutions and government sector, and the increase in loans from the same sectors, respectively in the appropriate amounts, by months, ranging from KM 50 - 150 million.

According to new regulations of the RS Banking Agency, published in the Official Gazette of RS no.136/10, which have defined a new way of recording claims classified in category "E", accounting and recording of interest on non-performing assets and calculation of general and special provisions , RS banks, in the data for December 2010 implemented the mentioned regulations, by transferring these items from off-balance records into balance sheet. The correction was reflected on the assets side, as increase of loans in the amount of KM 144 million, and increase of due interest in the amount of KM 36 million, and on the liabilities side, as increase in provisions for loan losses amounting to KM 180 million within the capital account.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Notes:

Gross foreign reserves consist of balance sheet positions of short-term foreign assets of the CBBH (gold, CBBH SDR holdings, foreign exchange in the CBBH vault, transferable deposits in foreign currency with non-resident banks and other) and investment in securities according to the CBBH Investment Committee Decision from July 2006. Net foreign reserves represent a difference between gross foreign reserves and liabilities to non-residents. Monetary liabilities of the CBBH include money outside monetary authorities and deposits of residents with monetary authorities. Net foreign assets of CBBH represent a difference between net foreign exchange reserves and monetary liabilities of the CBBH.

Revised data for period January - October 2017.

Since 01 July 2017, the status change of the merger of subsidiary company UniCredit Leasing d.o.o. Sarajevo to the company Unicredit Bank d.d. Mostar has taken place. Accordingly, Unicredit Leasing d.o.o. Sarajevo has stopped existing as of 30 June 2017 and the data on the merged company are presented within the report on UniCredit Bank d.d. Mostar, starting from the report for July 2017.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Notes:

The currency outside monetary authorities is taken from the CBBH Balance Sheet and it consists of cash outside the central bank (monetary authorities). Deposits of commercial banks are commercial banks' funds in accounts at the CBBH. Transferable deposits of other domestic sectors with monetary authorities are deposits of other domestic sectors (except central government deposits). The central government consists of BH Institutions, Entity governments, Entity Social Security Funds and those of Brčko District. Social security funds on Entity level (from Federation of BH: Pension Fund, Health Care Fund of FBH, Employment Fund of FBH, and from Republika Srpska: Pension and Disability Insurance Fund of RS, Health Care Fund of RS, Employment Fund of RS and Fund for Child Protection of RS) are classified on the central government level.

Cash outside banks is taken over from the CBBH Balance Sheet (Table 6) and represents cash in circulation outside the central bank (monetary authorities) and cash outside commercial banks. Transferable deposits in the domestic currency are taken from the Monetary Survey (Table 5). They consist of deposits of non-central government (cantons and municipalities), deposits of public and private companies, other financial institutions and deposits of other domestic sectors (households, non-profit institutions and other unclassified sectors). Other deposits in the domestic currency, transferable and other deposits in foreign currency are taken over from the Monetary Survey (Table 5). They consist of deposits of non-central government (cantons and municipalities), deposits of public and private companies, other financial institutions and deposits of other domestic sectors (households, non-profit institutions and other unclassified sectors).

Reserve money (primary money or monetary base) is entirely taken from the CBBH Balance Sheet (Table 6). It consists of cash outside monetary authorities, deposits of commercial banks and deposits of other domestic sectors (except for deposits of the central government) with monetary authorities. According to national definition, money supply comprises all transferable and other deposits of domestic nonbank and nongovernment sectors, as well deposits of local government in domestic and foreign currency. Deposits of entity Social Security Funds are included into the central government on Entity level and by that they are excluded from money supply or monetary aggregates. Monetary aggregate M1 comprises cash outside banks and transferable deposits in domestic currency of all domestic sectors (except for deposits of the central government). Monetary aggregate QM is defined in the same way as the corresponding item in the Monetary Survey (Table 5). It consists of other deposits in domestic currency, transferable and other deposits in a foreign currency of all domestic sectors (except for deposits of the central government). Money supply M2 comprises monetary aggregates, M1 and QM.

Revised data for period January - October 2017.

Since 01 July 2017, the status change of the merger of subsidiary company UniCredit Leasing d.o.o. Sarajevo to the company Unicredit Bank d.d. Mostar has taken place. Accordingly, Unicredit Leasing d.o.o. Sarajevo has stopped existing as of 30 June 2017 and the data on the merged company are presented within the report on UniCredit Bank d.d. Mostar, starting from the report for July 2017.

Monetary data updated according to the MMF methodology (Monetary and Financial Statistics Manual, 2000), from January 2006

Notes:

The Monetary Survey presents the consolidated data from the Balance Sheet of CBBH - monetary authorities (Table 6) and the Consolidated Balance Sheet of Commercial Banks of Bosnia and Herzegovina (Table 7). Foreign assets (net) represent the difference between total foreign assets of the CBBH - monetary authorities and commercial banks of BH and total foreign liabilities of the CBBH - monetary authorities and commercial banks of BH. Domestic loans represent commercial banks' claims on all domestic sectors, but it should be noted that claims on central government are presented in net amounts, i.e. they are reduced by the deposits of central government with the CBBH and with BH commercial banks. The central government consists of BH Institutions, Entity governments, Entity Social Security Funds and those of Brčko District. According to new methodology, Social Security Funds are classified on the central government level as Entities' off-budget funds, which has a direct impact on the data about net claims on the central government in Monetary Survey.

Revised data for period January - October 2017.

Since 01 July 2017, the status change of the merger of subsidiary company UniCredit Leasing d.o.o. Sarajevo to the company Unicredit Bank d.d. Mostar has taken place. Accordingly, Unicredit Leasing d.o.o. Sarajevo has stopped existing as of 30 June 2017 and the data on the merged company are presented within the report on UniCredit Bank d.d. Mostar, starting from the report for July 2017.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Notes:

Money M1 comprises currency outside banks, transferable deposits in the domestic currency of all domestic sectors (except for deposits of central government). Quasi money QM comprises other deposits in the domestic currency, transferable and other deposits in foreign currency of all domestic sectors (except for deposits of the central government). Money supply M2 comprises monetary aggregates, money M1 and quasi money QM. Other liabilities include securities, loans, shares and other equity and other items (net). According to a new methodology, loans are presented as separate financial instruments on the side of liabilities (with which the calculated interest is added), and also shares and other equity. Other items (net) are unallocated items of liabilities reduced by the unallocated items of assets. Other items (net) also comprise restricted deposits, counter-items of funds and government lending funds.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Notes:

The CBBH (monetary authorities) foreign assets comprise gold, foreign currency in CBBH vault, foreign currency deposits with foreign banks, SDR holdings, foreign securities and other. Claims on domestic sectors consist of claims on employees of CBBH for the long-term loans and claims on commercial banks on the basis of settlement accounts. Reserve money (primary money or monetary base) is comprised of cash outside monetary authorities, deposits of commercial banks and deposits of other domestic sectors (except for the central government) with monetary authorities. Cash outside banks represents cash in circulation outside the central bank (monetary authorities) and cash outside commercial banks. The CBBH foreign liabilities are comprised of short-term liabilities towards non-residents, deposits of non-residents and other short-term liabilities towards non-residents and liabilities towards the IMF (Account 1 and 2). Deposits of central government with CBBH are transferable and other deposits of BH Institutions, Entity governments, Entity social security funds and those of Brčko District in domestic currency. Shares and other equity are comprised of equity, current year result, general and special reserves and revaluation/adjustment. Other items (net) are unallocated items of liabilities reduced by the unallocated items of assets.

Revised data for period January - October 2017.

Since 01 July 2017, the status change of the merger of subsidiary company UniCredit Leasing d.o.o. Sarajevo to the company Unicredit Bank d.d. Mostar has taken place. Accordingly, Unicredit Leasing d.o.o. Sarajevo has stopped existing as of 30 June 2017 and the data on the merged company are presented within the report on UniCredit Bank d.d. Mostar, starting from the report for July 2017.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Notes:

Consolidated balance sheet of commercial banks includes consolidated balance sheets of commercial banks covered by Main Unit Sarajevo, Main Unit Mostar, Main Bank RS, Brčko District (from July 2001 until November 2002), NBRS (until December 1998) and the NBBH (until November 2002). Mutual claims and liabilities among the commercial banks have been consolidated. Banks' reserves consist of cash in the banks' vaults and banks' deposits with the Central Bank of Bosnia and Herzegovina. Foreign assets of commercial banks include: foreign currency in the vaults, transferable and other deposits with non-residents in foreign currency, loans to non-residents, securities of non-residents in foreign currency, and other claims on non-residents.

Claims on general government include claims on all levels of government: the central government (BH Institutions, Entity governments, Entity social security funds and Brčko District) and non-central governments (canton and municipality governments). Claims on other domestic sectors include claims on public non-financial enterprises, private non-financial enterprises, other financial institutions and claims on other domestic sectors (households, non-profit institutions and other unclassified sectors). Balance sheets of commercial banks of Federation of BH in addition to active sub-balance sheets include data from passive sub-balance sheets as well. Passive sub-balance sheets include liabilities arising from foreign loans and frozen foreign currency deposits of citizens, which occurred until 31 March 1992. These liabilities will be taken over, in the process of privatisation, by Ministry of Finance of Federation of BH in accordance with the entity Law on Opening Balance Sheets of Enterprises and Banks and Law on Privatisation.

Revised data for period January - October 2017.

Since 01 July 2017, the status change of the merger of subsidiary company UniCredit Leasing d.o.o. Sarajevo to the company Unicredit Bank d.d. Mostar has taken place. Accordingly, Unicredit Leasing d.o.o. Sarajevo has stopped existing as of 30 June 2017 and the data on the merged company are presented within the report on UniCredit Bank d.d. Mostar, starting from the report for July 2017.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Notes:

Central government deposits include transferable and other deposits in domestic and foreign currency of BH Institutions, Entity governments, Entity social security funds and those of Brčko District. Transferable and other deposits of other domestic sectors in domestic and foreign currency represent banks liabilities towards non-central government (canton and municipality governments), public non-financial enterprises, private non-financial enterprises, other financial institutions and other domestic sectors (households, non-profit institutions and other unclassified sectors). Foreign liabilities of commercial banks include banks liabilities to non-residents based on transferable and other deposits, loans, securities, trade loans and advance payments and other accounts payable. According to a new methodology, loans are presented as a separate financial instrument on the side of liabilities, with which the calculated interest is added.

Shares and other equity include equity, retained earnings, current year result, general and special reserves and adjustment/revaluation. Other items (net) are unallocated items of liabilities reduced by the unallocated items of assets. Restricted deposits are also included in other items (net).

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Notes:

By order of FBA in March 2010, loans to households with currency clause with one bank were reclassified, from loans in EUR to loans in KM.

From September 2004, change in structure of loans by currency is result of implementation of recommendations of IMF Mission for monetary and financial statistics in BH from May 2004. According to that, all loans in KM which include currency clause (indexed to euro), should be classified as loans in KM (domestic currency).

Data on structure of deposits and loans by currency in Republika Srpska until September 1999 are not available, so for this period the total amount of deposits and loans in RS is included in the column Total.

Revised data for period January - October 2017.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Notes:

Deposits of domestic institutional sectors represent liabilities of commercial banks towards all institutional sectors. Deposits on the BH level represent deposits with commercial banks covered by Main Unit Sarajevo, Main Unit Mostar, Main Bank RS, Brčko Branch (from July 2001 until November 2002), deposits with NBRs (until December 1998), deposits with NBBH (until November 2002) and deposits with the Payment Bureaus Sarajevo and Mostar (until November 1999). Sight deposits represent liabilities of commercial banks related to transaction accounts and sight deposits in domestic and foreign currency.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Notes:

Loans to domestic institutional sectors represent claims of commercial banks on all institutional sectors. Loans at the BH level include loans extended by commercial banks covered by Main Unit Sarajevo, Main Unit Mostar, Main Bank RS, Brčko Branch (from July 2001 until November 2002), loans with NBRS (until December 1998) and NBBH (until November 2002). The total of claims on all levels of government and funds (short-term and long-term) are shown in Table of short-term loans (columns 3,4,5,6,7) in total amount, because source data do not provide a maturity structure of claims for governments and funds. Short – terms loans represent claims of commercial banks on all domestic institutional sectors up to one year, in domestic and foreign currency. Claims on BH Institutions have been reclassified since April 2010.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Notes:

Total claims on all levels of government and funds (short-term and long- term) are shown in Table of short-term loans (columns 3,4,5,6,7) in the total amount, because the source data do not provide the maturity structure of claims for governments and funds. Long – terms loans represent claims of commercial banks on all domestic institutional sectors over one year in domestic and foreign currency.

Notes:

Since 01 July 2017, the status change of the merger of subsidiary company UniCredit Leasing d.o.o. Sarajevo to the company Unicredit Bank d.d. Mostar has taken place. Accordingly, Unicredit Leasing d.o.o. Sarajevo has stopped existing as of 30 June 2017 and the data on the merged company are presented within the report on UniCredit Bank d.d. Mostar, starting from the report for July 2017.

* Interest rates in table for revolving loans and credit cards and their amounts refer to the outstanding amounts.

IRF – initial rate fixation

... insufficient data to be published

The interest rate on the revolving loans and credit cards, includes data on credit cards with loan facility. Considering that credit cards with loan facility imply an interest free deferred payment (0% ir), they are not published.

No data for interest rates on loans in foreign currency based on credit cards and overdrafts to households.

Notes:

From 1 July 2016, the required reserves rate applied by the CBBH to the base for calculation of required reserves is 10%. From 1 July 2016, the CBBH applies the new rates for the calculation of fees to the funds in the banks' reserves accounts : in the accounting period, the Central Bank does not charge a fee on the amount of required reserves in commercial banks' reserves accounts, and on the amount of excess reserves, the CBBH charges the fee at the rate equal to 50% of the rate applied to commercial banks' deposits (deposit facility rate) by the European Central Bank.

Since 01 May 2015, the Central Bank has calculated the compensation for a bank on the amount of the bank's funds in the reserve account with the Central Bank in the calculation period, as it follows:

- on the reserve requirement amount – the average of EONIA recorded in the same period on the market reduced by 10 basis points, or minimum zero,
- on the amount of the funds exceeding the reserve requirement – zero rate of compensation.

The zero rate of compensation on the reserve requirement is applied in case the average EONIA decreased by 10 basis points has a negative value.

From 1 September 2014, the remuneration rate has been calculated on the basis of the weighted average interest rate which was earned by the Central Bank of BH on the market in the same period on deposits invested up to a month ; and 70% is calculated on the amount of required reserve or minimum 0, while 90% of the mentioned rate is calculated on the amount of excess reserves or minimum 0.

From February 1st, 2011 the required reserves rate on deposits and borrowed assets with contracted term of maturity up to one year was declined from 14% to 10%,while the required reserves rate on deposits and borrowed assets with contracted term of maturity over one year is not changed. From August 1st 2011. the remuneration rate is calculated by the weighted average interest rate which were earned by the Central Bank on deposits invested up to a month in the same period; 70% of this rate is calculated on the amount of required reserves while 90% of the same rate is calculated on the amount of excess reserves.

From July 1st, 2010 remuneration rate on the amount of required reserves is changed and calculated as an average of interest rates, which were earned by the Central bank on overnight deposits in the same period,while remuneration rate on the amount of excess reserves is not changed.

From January 1st, 2009 the required reserves rate is 14% on deposits and borrowed assets with contracted term of maturity up to one year and 10% on deposits and borrowed assets with contracted term of maturity over one year.From April 1st, 2009 remuneration rate is calculated as:- On the amount of required reserves is 0,5%;- On the amount of excess reserves on the rate calculated as an average of interest rates, which were earned by the Central bank on deposits invested up to u month. From May 1st, 2009 the required reserves rate is 7% on deposits and borrowed assets with contracted term of maturity over one year.

From January 1st, 2008 required reserves rate was increased from 15% to 18%. From October 11th, 2008 required reserves rate was declined from 18% to 14%.

*The base for calculation of required reserves includes deposits and borrowed funds in domestic and other currency expressed in KM.

Notes:

The share of BH exports to the country in total BH exports for 2010 was used as a criterion for presenting the country of exports. Thus, all countries with higher share of exports than 4% of the total BH exports for 2010 are separately presented, while the other countries are presented in the column "Other Countries".

Until February 12, 2007, the data on exports to Serbia and Montenegro were presented as exports to Serbia, but since then Serbia and Montenegro have been presented separately.

Notes:

The share of BH imports from the country in total BH imports for 2010 was used as a criterion for presenting the country of imports. Thus, all countries with higher share of imports than 3% of total BH imports for 2010 are separately presented, while the other countries are presented in the column "Other Countries".

Until February 12, 2007, the data on imports from Serbia included imports from Montenegro as well, while since then imports from Montenegro has been included in the column "Other Countries".
