INTRODUCTORY SUMMARY

In April, the industrial production recorded the decline. The greatest contribution to this decline is caused by the decrease in production and distribution of electricity and gas (G01). The average nominal wages recorded the most pronounced growth in the last ten years, primarily in the health, trade, financial sector and manufacturing industry (G02). Inflation in BH is still low. Prices of food and non-alcoholic beverages recorded growth as the transport section, while the footwear and clothing section was exposed to strong deflationary pressures (G03). In April, Republika Srpska issued two issues, one of six-month T-bills and one of ten-year bond (G04). Very high turnover was achieved in both RTGS and Giro clearing (G05). In the euro zone, there was an increase in inflation as a result of the rise in energy prices, as well as the rise in core inflation, while the unemployment rate declined (G06). Loans to households continue to grow faster than loans to non-financial corporations (G07). The largest increase in deposits was registered with non-financial enterprises (G08). Net foreign assets decreased due to the decrease in deposits with correspondent banks (G09). The average reserve requirement recorded a continuous moderate increase, while the surplus of assets above the reserve requirement oscillates (G10). Foreign exchange reserves recorded slower growth compared to the previous period (G11). General Government indebtedness increased in the observed month (G12). Total indirect taxes recorded growth, with road tolls recording significant growth as a result of legislative changes (G 13 and 14). The nominal effective exchange rate appreciated, while the real effective exchange rate depreciated (G15). The trade deficit increased mostly as a result of a rise in oil and oil prices, as well as due to decrease in production caused by work stoppage of the Bosanski Brod Refinery (16). The most important part of the deficit, as in the previous period, is generated within five groups of products, and the most significant increase in the trade deficit was recorded with Germany and Croatia (G 17 and 18).

G01: Annual growth rate of industrial production by activity

Source: BHAS

In April, there was a decline in industrial production at monthly and annual levels. Observing the period January-April 2019, in relation to the same period of the previous year, the volume of industrial production decreased by 4.9%. The most significant contribution to the decline in industrial production in the first four months was recorded in the production and distribution of electricity and gas, with an annual decline in production of 16.2%. At the same time, mining and manufacturing also recorded a fall in production of 3.6% and 0.9%, respectively.

G02: Annual growth rate of average nominal wages

Source: BHAS

The average nominal net salary at the end of April amounted to KM 916 and in comparison with the same month of the previous year, it increased by 6.1%, which represents the most pronounced rise in the average nominal salary in the last ten years. At the end of April of the current year, observed at the annual level, the increase in wages was recorded in all activities. The highest growth in net wages was registered in health care (10.2%), trade (9.3%), arts and entertainment (9.1%), construction (9.0%), financial sector activities (8.9%), and the processing industry (8.1%).

G03: Contribution to annual rates of change in consumer prices

Source: BHAS

The upward trend in consumer prices since the beginning of 2017, on an annual basis, also continued in April of the current year. A positive contribution to the change in the annual rate of consumer prices was recorded in prices of food and non-alcoholic beverages (0.4 pp), and transport prices (0.3 pp). The contribution of the prices of other groups of products and services, cumulatively observed, was 0.1 pp in April, with the strong impact of the clothing and footwear section whose annual decline was 10.5%, which significantly slowed down the growth of core inflation.

G04: Issues of ten-year bonds of Republika Srpska

Source: BLSE

During April, Republika Srpska issued two issues, one of six-month T-bill and one issue of ten-year bonds with a total nominal value of KM 30 million. The demand for bond issue was extremely high, up to now the highest, exceeded the offer by 2.5 times. Bonds were sold with issue profits, because the coupon interest rate was 4%, and the yield rate to maturity was 3.25%; the nominal value of the issue was KM 30 million, and the realized value of the issue was KM 31.89 million. The period of low interest rates and postponing ECB interest rate growth enable cheaper borrowing, but also lead to the growth of the public debt of Republika Srpska.

G05: Turnover in RTGS

Source: CBBH

In April, extremely high turnover was achieved in both RTGS and Gyro clearing. With a growth rate of 31.1% (m / m 12), a total of 96.913 RTGS transactions had a turnover of KM 8.74 billion. Such a high growth rate of RTGS turnover above 30% is very rare and was last recorded in July and August 2014. The realized turnover in Gyro clearing of KM 1.583 billion is the second largest turnover in Gyro clearing. Monthly and annual growth rates in Gyro clearing are almost identical, 9.8% and 9.88%, respectively, and the share of Gyro clearing in total turnover was 15.33% in April.

G06: Economy of the euro zone

Source: ECB

Inflation in the euro zone was unexpectedly increased after 1.4% (03/2019), to 1.7% in April. The main causes of inflation growth are the increase in energy prices (5.4%), but also the rise in core inflation from 1% (03/2019) to 1.3% in April. The unemployment rate continued to fall and in April it reached 7.7%, which was the unemployment in the pre-crisis period (February 2007). Despite the positive economic trends at the beginning of 2019, the ECB reiterated at its April meeting that its reference interest rates will remain at the current level by at least the end of 2019. Positive price and economic dynamics in the euro area are favorable for the conjunction in BH.

G07: Loans, annual growth rates

Source: CBBH

Total loans placed in BH at the end of April amounted to KM 19.93 billion, which represents an increase of 6.1% annually. The increase in total loans resulted from a more intensive increase in loans to households (7.4%) and enterprises (4.2%) compared to the same period last year.

G08: Deposits, monthly changes

Source: CBBH

Total deposits increased by KM 244.4 million per month and thus reached the level of 22.25 billion KM in April. The largest increase on monthly level was registered with nonfinancial companies. In addition, household deposits and household sectors also continue to grow.

G09: Foreign assets and liabilities of commercial banks

Source: Table 07

Net foreign assets decreased by KM 242.8 million at monthly level, as a result of the decrease in foreign assets and the increase in foreign liabilities. Foreign assets declined mainly due to the decrease of deposits with correspondent banks, while the increase in foreign liabilities was largely caused by an increase in deposits by non-residents.

G10: Reserve account balance

Source: CBBH

The average reserve requirement recorded a continuous moderate increase in the observed period of 12 months, with the exception of the third month, when a slight decrease was recorded. The surplus of assets above the required reserves recorded certain oscillations, with a growth of 2.3% on the monthly level in the fourth month. Thus, the total reserves account balance amounted to KM 5.47 billion.

G11: Monthly changes in primary money and its components

Source: CBBH

The primary money at the end of the month amounts to KM 10.47 billion. In addition, the monthly growth in banks' deposits with monetary authorities was recorded, after a decrease recorded in the previous month. On the other hand, there was an increase in cash outside monetary authorities, which is usual for this period of the year. However, if observing the end of the previous year, cash increased by KM 124.6 million.

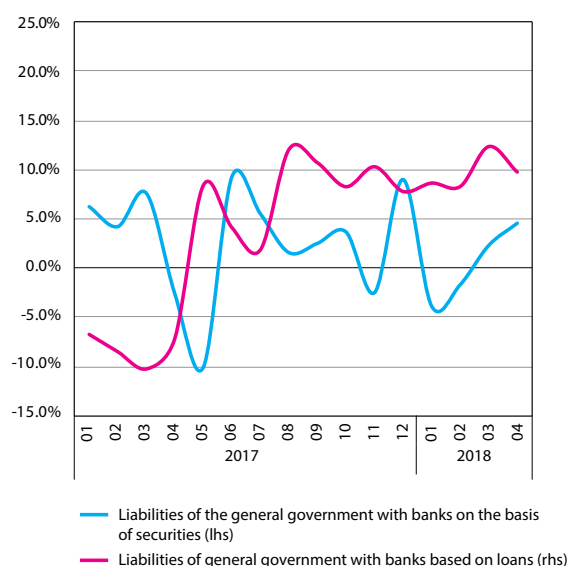

G12: Gross foreign exchange reserves of the CBBH and annual rates of change

Source: Table 03

In April, the gross foreign reserves of the CBBH increased annually by KM 810.0 million or 7.3%. The foreign exchange reserves of the CBBH have slightly slowed growth in 2019, but at the end of the month they are at a record level of KM 11.79 billion. Thus, the increased demand for domestic currency by banks and their clients, primarily the households and the economy sector, continued in this month.

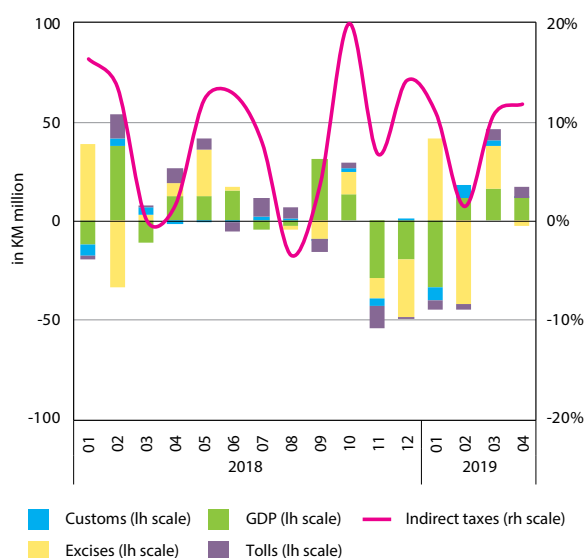

G13: Liabilities of general government with commercial banks, annual changes

Source: CBBH

In April, there was an increase in liabilities on an annual basis, both on the basis of the issued government securities and on the basis of loans. At the end of April, the general indebtedness of the general government sector on these two bases amounted to KM 2.38 billion, representing the annual growth of liabilities in the amount of KM 150.9 million or 6.8%. The exposure of the banking sector to the general government sector at the end of April was 7.5% of the assets of the banking sector.

G14: Monthly changes by types of indirect taxes and annual growth rate of total indirect taxes

Source: ITA

In April, annual revenue growth was recorded in the amount of KM 65.3 million (13.6%). Net effects for the first four months of 2019 amounted to KM 156.9 million. The main generator of this growth is VAT. Positive movements were also made in collecting the excise taxes on oil derivatives and tolls. Revenues from excise duties on tobacco products declined by 8.2%.

G15: Tolls, annual growth rate

Source: BLSE and SASE

In April, a positive trend of toll collection was continued. In April, KM 53.8 million was collected on this basis, which is KM 2.9 million more than in the same period of the previous year. At the same time, in the first four months, KM 191.0 million was collected, which is KM 31.5 million more than in the previous year and clearly indicates the positive effects of legislative changes.

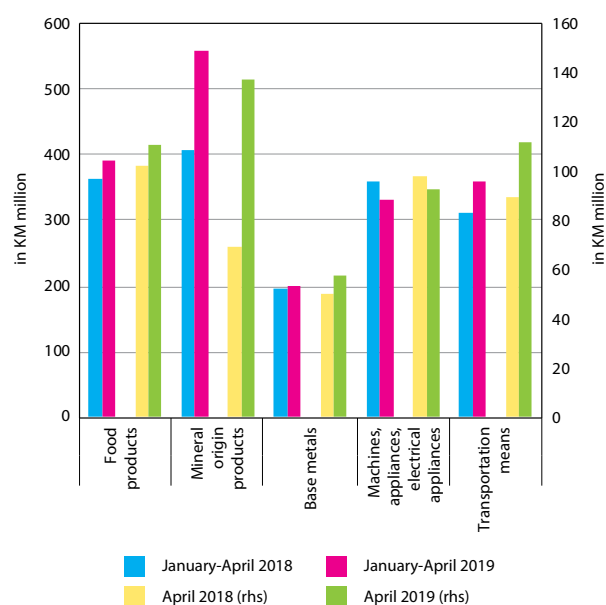

G16: Nominal and real effective exchange rate of KM (NEER and REER)

Source: CBBH

The nominal effective exchange rate of the KM (NEER) appreciated by 81 bp compared to April of the previous year. The appreciation of the NEER is caused by the nominal appreciation of KM against the currencies of developing countries, and as a consequence of the euro volatility (our anchor currency) against the US dollar. On the other hand, the REER-CPI depreciated by 94bp annually.

G17: Trade deficit by product groups

Source: BHAS

The trade deficit increased by KM 324.1 million (14.0%) for the first four months of 2019. The most significant part of the deficit, as in the previous period, is generated within five groups of products. The increase in oil and oil products' prices, as well as the decline in the production, due to the delay in the Bosanska Brod Refinery operations, in relation to the previous year, has most affected the deepening of the trade deficit. Furthermore, the deficit is deepened in the trade of transportation means and food products.

In April, there are not significantly different trends in trade exchange in relation to the cumulative from the previous four months, except in the case of products of mineral origin.

G18: Trade deficit by main trading partners

Source: BHAS

The graph illustrates trade deficits with five countries with which BH recorded the largest volume of trade in the first four months of 2019. The foreign trade deficit for the first four months of the year was most significantly increased with Germany and Croatia.

In April, there are not significantly different trends in trade exchange compared to the cumulative from the previous four months.

Note: Brief notes on methodology can be found below each table, while more detailed ones are available at www.cbbh.ba

Notes applicable for tables 4, 5, 7, 8, 9, 10, 11, 12, 13.

-Since 01 July 2017, the status change of the merger of subsidiary company UniCredit Leasing d.o.o. Sarajevo to the company Unicredit Bank d.d. Mostar has taken place. Accordingly, Unicredit Leasing d.o.o. Sarajevo has stopped existing as of 30 June 2017 and the data on the merged company are presented within the report on UniCredit Bank d.d. Mostar, starting from the report for July 2017.

-The revised data for the period January 2006 – November 2015 are based on the active sub-balance of the banks with majority state owned capital from the Federation of BH, with the passive sub-balance excluded. Through such supplement of statistics, the users are provided with higher analytical usefulness of data and objective indicators on the current operations of banks in BH. Passive sub-balance includes the liabilities based on foreign loans and old foreign exchange savings of citizens until 31 March 1992 and it does not reflect the current operations of the bank, so this sub-balance in the privatization process will be taken over by the Ministry of Finance of FBH according to the Law on Initial Balance Sheets of Banks and the Law on Privatization, as it has been done for the previously privatized banks. The performed revision mainly influenced the decrease of loans to public companies in a foreign currency, decrease of foreign liabilities, decrease of other items of assets and liabilities on the basis of old foreign exchange savings, and in considerably lower amounts, on items of loans to the Entity Government, fixed assets, non-residents' deposits, shares and capital. The data on the „complete“ balance sheet, with the included passive sub-balance, are still available at: http://statistics.cbbh.ba:4444/Panorama/novaview/SimpleLogin_bs.aspx

- In November 2014, two banks have realized the sale and transfer of part of the loan portfolio which resulted with increase in reserves with monetary authorities in the amount of 64 million KM and a decrease in the following items: claims of non-financial private enterprises 260 million KM, foreign liabilities 101 million KM and other items (net) 95 million KM. (napomena uz tabelu T

-Due to the application of International Accounting Standards (IAS) and the International Financial Reporting Standards applied in BH Federation banks and the transfer of money flows in December 2011 data, the following changes have occurred at the assets side: decrease of loans by KM 155 million, an increase in other assets by KM 10 million, at the liabilities side: decrease of liabilities to non-residents in the amount of KM 624 million, an increase in loan loss provisions by KM 472 million and other liabilities increased by KM 7 million.

- In February 2011, one bank from BH Federation reclassified deposits in the amount of around KM 80 million, from the deposits of public companies to the Entities' governments deposits, in line with the IMF recommendations.

- By order of the FBH Banking Agency, in June 2010, one bank made a reclassification of about KM 300 million of claims based on securities on domestic institutional sectors to the claims on non-residents. In December 2010, the same bank made this reclassification, retroactively, in the respective amounts for the period from August 2009 when the error occurred, until May 2010. The above reclassification was reflected in the increase in foreign assets and decrease in other items net.

- One bank from FBH made a reclassification of financial instruments in the foreign assets amounting to about KM 40 million for the period January - August 2010. Claims on non-residents based on loans were reclassified in claims on non-residents on the basis of securities, which resulted in changes in the short-term and long-term foreign assets.

- By order of the Banking Agency of Republika Srpska one bank made a reclassification of financial instruments on the liabilities side, for the period of September 2008 - November 2010, i.e. the decrease in time and savings deposits of non-bank financial institutions and government sector, and the increase in loans from the same sectors, respectively, in the appropriate amounts, by months, ranging from 50 - 150 million KM.

- In accordance with new regulations of the RS Banking Agency, published in the Official Gazette of RS, no.136/10, which has regulated a new manner of recording receivables classified in category "E", accounting and bookkeeping of interest on non-performing assets and calculation of general and special provisions, RS banks, in the data for December 2010, implemented the mentioned regulations, by transferring these items from off-balance records into balance sheet. The correction was reflected on the assets side, as increase of loans in the amount of about KM 144 million, and increase of due interest in the amount of KM 36 million, and on the liabilities side, as increase in provisions for loan losses amounting to about KM 180 million within the capital account.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Notes: Gross foreign reserves consist of balance sheet positions of short-term foreign assets of the CBBH (gold, CBBH SDR holdings, foreign exchange in the CBBH vault, transferable deposits in foreign currency with non-resident banks and other) and investment in securities according to the CBBH Investment Committee Decision from July 2006. Net foreign reserves represent a difference between gross foreign reserves and liabilities to non-residents. Monetary liabilities of the CBBH include money outside monetary authorities and deposits of residents with monetary authorities. Net foreign assets of CBBH represent a difference between net foreign exchange reserves and monetary liabilities of the CBBH.

Revised data for period December 2018 – February 2019.

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Notes:

The currency outside monetary authorities is taken from the CBBH Balance Sheet and it consists of cash outside the central bank (monetary authorities). Deposits of commercial banks are commercial banks' funds in accounts at the CBBH. Transferable deposits of other domestic sectors with monetary authorities are deposits of other domestic sectors (except central government deposits). The central government consists of BH Institutions, Entity governments, Entity Social Security Funds and those of Brčko District. Social security funds on Entity level (from Federation of BH: Pension Fund, Health Care Fund of FBH, Employment Fund of FBH, and from Republika Srpska: Pension and Disability Insurance Fund of RS, Health Care Fund of RS, Employment Fund of RS and Fund for Child Protection of RS) are classified on the central government level.

Cash outside banks is taken over from the CBBH Balance Sheet (Table 6) and represents cash in circulation outside the central bank (monetary authorities) and cash outside commercial banks. Transferable deposits in the domestic currency are taken from the Monetary Survey (Table 5). They consist of deposits of non-central government (cantons and municipalities), deposits of public and private companies, other financial institutions and deposits of other domestic sectors (households, non-profit institutions and other unclassified sectors). Other deposits in the domestic currency, transferable and other deposits in foreign currency are taken over from the Monetary Survey (Table 5). They consist of deposits of non-central government (cantons and municipalities), deposits of public and private companies, other financial institutions and deposits of other domestic sectors (households, non-profit institutions and other unclassified sectors).

Reserve money (primary money or monetary base) is entirely taken from the CBBH Balance Sheet (Table 6). It consists of cash outside monetary authorities, deposits of commercial banks and deposits of other domestic sectors (except for deposits of the central government) with monetary authorities. According to national definition, money supply comprises all transferable and other deposits of domestic nonbank and nongovernment sectors, as well deposits of local government in domestic and foreign currency. Deposits of entity Social Security Funds are included into the central government on Entity level and by that they are excluded from money supply or monetary aggregates. Monetary aggregate M1 comprises cash outside banks and transferable deposits in domestic currency of all domestic sectors (except for deposits of the central government). Monetary aggregate QM is defined in the same way as the corresponding item in the Monetary Survey (Table 5). It consists of other deposits in domestic currency, transferable and other deposits in a foreign currency of all domestic sectors (except for deposits of the central government). Money supply M2 comprises monetary aggregates, M1 and QM.

Revised data for period December 2018 – February 2019.

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports.

Monetary data updated according to the MMF methodology (Monetary and Financial Statistics Manual, 2000), from January 2006

Notes:

The Monetary Survey presents the consolidated data from the Balance Sheet of CBBH - monetary authorities (Table 6) and the Consolidated Balance Sheet of Commercial Banks of Bosnia and Herzegovina (Table 7). Foreign assets (net) represent the difference between total foreign assets of the CBBH - monetary authorities and commercial banks of BH and total foreign liabilities of the CBBH - monetary authorities and commercial banks of BH. Domestic loans represent commercial banks' claims on all domestic sectors, but it should be noted that claims on central government are presented in net amounts, i.e. they are reduced by the deposits of central government with the CBBH and with BH commercial banks. The central government consists of BH Institutions, Entity governments, Entity Social Security Funds and those of Brčko District. According to new methodology, Social Security Funds are classified on the central government level as Entities' off-budget funds, which has a direct impact on the data about net claims on the central government in Monetary Survey

Revised data for period December 2018 – February 2019.

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Notes:

Money M1 comprises currency outside banks, transferable deposits in the domestic currency of all domestic sectors (except for deposits of central government) . Quasi money QM comprises other deposits in the domestic currency, transferable and other deposits in foreign currency of all domestic sectors (except for deposits of the central government). Money supply M2 comprises monetary aggregates, money M1 and quasi money QM. Other liabilities include securities, loans, shares and other equity and other items (net). According to a new methodology, loans are presented as separate financial instruments on the side of liabilities (with which the calculated interest is added), and also shares and other equity. Other items (net) are unallocated items of liabilities reduced by the unallocated items of assets. Other items (net) also comprise restricted deposits, counter-items of funds and government lending funds.

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Notes:

The CBBH (monetary authorities) foreign assets comprise gold, foreign currency in CBBH vault, foreign currency deposits with foreign banks, SDR holdings, foreign securities and other. Claims on domestic sectors consist of claims on employees of CBBH for the long-term loans and claims on commercial banks on the basis of settlement accounts. Reserve money (primary money or monetary base) is comprised of cash outside monetary authorities, deposits of commercial banks and deposits of other domestic sectors (except for the central government) with monetary authorities. Cash outside banks represents cash in circulation outside the central bank (monetary authorities) and cash outside commercial banks. The CBBH foreign liabilities are comprised of short-term liabilities towards non-residents, deposits of non-residents and other short-term liabilities towards non-residents and liabilities towards the IMF (Account 1 and 2). Deposits of central government with CBBH are transferable and other deposits of BH Institutions, Entity governments, Entity social security funds and those of Brčko District in domestic currency. Shares and other equity are comprised of equity, current year result, general and special reserves and revaluation/ adjustment. Other items (net) are unallocated items of liabilities reduced by the unallocated items of assets.

Revised data for period December 2018 – February 2019.

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Notes:

Consolidated balance sheet of commercial banks includes consolidated balance sheets of commercial banks covered by Main Unit Sarajevo, Main Unit Mostar and Main Bank of Republika Srpska CBBH and it represents consolidation of mutual claims and liabilities among the commercial banks. Banks' reserves consist of cash in the banks' vaults and banks' deposits with the Central Bank of Bosnia and Herzegovina. Foreign assets of commercial banks include: foreign currency in the vaults, transferable and other deposits with non-residents in foreign currency, loans to non-residents, securities of non-residents in foreign currency, and other claims on non-residents.

Claims on general government include claims on all levels of government: the central government (BH Institutions, Entity governments, Entity social security funds and Brčko District) and non-central governments (canton and municipality governments). Claims on other domestic sectors include claims on public non-financial enterprises, private non-financial enterprises, other financial institutions and claims on other domestic sectors (households, non-profit institutions and other unclassified sectors).

Revised data for period December 2018 – February 2019.

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Notes:

Central government deposits include transferable and other deposits in domestic and foreign currency of BH Institutions, Entity governments, Entity social security funds and those of Brčko District. Transferable and other deposits of other domestic sectors in domestic and foreign currency represent banks liabilities towards non-central government (canton and municipality governments), public non-financial enterprises, private non-financial enterprises, other financial institutions and other domestic sectors (households, non-profit institutions and other unclassified sectors). Foreign liabilities of commercial banks include banks liabilities to non-residents based on transferable and other deposits, loans, securities, trade loans and advance payments and other accounts payable. According to a new methodology, loans are presented as a separate financial instrument on the side of liabilities, with which the calculated interest is added.

Shares and other equity include equity, retained earnings, current year result, general and special reserves and adjustment/revaluation. Other items (net) are unallocated items of liabilities reduced by the unallocated items of assets. Restricted deposits are also included in other items (net).

	04	11,743.8	10,514.2	22,258.0	4,496.9	15,442.9	19,939.8

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Notes:

Total deposits represent liabilities of commercial banks of BH towards all domestic institutional sectors in domestic and foreign currency. Total loans represent claims of commercial banks of BH on all institutional sectors, in domestic and foreign currency.

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports.
Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Notes:

By order of FBA in March 2010, loans to households with currency clause with one bank were reclassified, from loans in EUR to loans in KM.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Notes:

Deposits of domestic institutional sectors represent liabilities of commercial banks towards all institutional sectors. Deposits on the BH level represent deposits with commercial banks covered by Main Unit Sarajevo, Main Unit Mostar and Main Bank of Republika Srpska CBBH Banja Luka. Sight deposits represent liabilities of commercial banks related to transaction accounts and sight deposits in domestic and foreign currency.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Notes:

Loans to domestic institutional sectors represent claims of commercial banks on all institutional sectors. Loans at the BH level include loans extended by commercial banks covered by Main Unit Sarajevo, Main Unit Mostar and Main Bank of Republika Srpska CBBH Banja Luka. The total of claims on all levels of government and funds (short-term and long-term) are shown in Table of short-term loans (columns 3,4,5,6,7) in total amount, because source data do not provide a maturity structure of claims for governments and funds. Short-term loans represent claims of commercial banks on all domestic institutional sectors up to one year, in domestic and foreign currency.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Notes:

Total claims on all levels of government and funds (short-term and long-term) are shown in Table of short-term loans (columns 3,4,5,6,7) in the total amount, because the source data do not provide the maturity structure of claims for governments and funds. Long-term loans represent claims of commercial banks on all domestic institutional sectors over one year in domestic and foreign currency.

Notes:

From 1 July 2016, the required reserves rate applied by the CBBH to the base for calculation of required reserves is 10%. From 1 July 2016, the CBBH applies the new rates for the calculation of fees to the funds in the banks' reserves accounts : in the accounting period, the Central Bank does not charge a fee on the amount of required reserves in commercial banks' reserves accounts, and on the amount of excess reserves, the CBBH charges the fee at the rate equal to 50% of the rate applied to commercial banks' deposits (deposit facility rate) by the European Central Bank. Since 01 May 2015, the Central Bank has calculated the compensation for a bank on the amount of the bank's funds in the reserve account with the Central Bank in the calculation period, as it follows:

- on the reserve requirement amount – the average of EONIA recorded in the same period on the market reduced by 10 basis points, or minimum zero,
- on the amount of the funds exceeding the reserve requirement – zero rate of compensation.

The zero rate of compensation on the reserve requirement is applied in case the average EONIA decreased by 10 basis points has a negative value.

From 1 September 2014, the remuneration rate has been calculated on the basis of the weighted average interest rate which was earned by the Central Bank of BH on the market in the same period on deposits invested up to a month ; and 70% is calculated on the amount of required reserve or minimum 0, while 90% of the mentioned rate is calculated on the amount of excess reserves or minimum 0.

From February 1st, 2011 the required reserves rate on deposits and borrowed assets with contracted term of maturity up to one year was declined from 14% to 10%, while the required reserves rate on deposits and borrowed assets with contracted term of maturity over one year is not changed. From August 1st 2011, the remuneration rate is calculated by the weighted average interest rate which were earned by the Central Bank on deposits invested up to a month in the same period; 70% of this rate is calculated on the amount of required reserves while 90% of the same rate is calculated on the amount of excess reserves.

From July 1st, 2010 remuneration rate on the amount of required reserves is changed and calculated as an average of interest rates, which were earned by the Central bank on overnight deposits in the same period, while remuneration rate on the amount of excess reserves is not changed.

From January 1st, 2009 the required reserves rate is 14% on deposits and borrowed assets with contracted term of maturity up to one year and 10% on deposits and borrowed assets with contracted term of maturity over one year. From April 1st, 2009 remuneration rate is calculated as:- On the amount of required reserves is 0,5%,- On the amount of excess reserves on the rate calculated as an average of interest rates, which were earned by the Central bank on deposits invested up to a month. From May 1st, 2009 the required reserves rate is 7% on deposits and borrowed assets with contracted term of maturity over one year.

From January 1st, 2008 required reserves rate was increased from 15% to 18%. From October 11th, 2008 required reserves rate was declined from 18% to 14%.

*The base for calculation of required reserves includes deposits and borrowed funds in domestic and other currency expressed in KM.

Notes:

Criteria for presenting country is the share of export of the country in total three-year BH export (2016,2017,2018).

Thus, all countries with share higher than 3,0% are separately presented, while the other countries are presented as sum in the column "Other countries".

Notes:

Criteria for presenting country is the share of import of the country in total three-year BH import (2016,2017,2018).

Thus, all countries with share higher than 3,0% are separately presented, while the other countries are presented as sum in the column "Other countries".
