SUMMARY

The impact of the coronavirus pandemic considerably decreased the volume of foreign trade, which resulted in a two digit decline of exports and imports during the first five months at the annual level (Graphs 01 and 02). At the same time, industrial production declined considerably, which particularly applies to manufacturing industry (Graph 03). The effect of the corona crisis decreased tourism activities significantly, as well as the activities of transport and trade, which is evident in retail trade turnover having a record decrease over the previous months (Graph 04). At the annual level, a significant growth of unemployment was recorded (Graph 05). Due to the coronacrisis effects on lower spending by households, consumer prices declined (Graph 06). Deflationary pressure on general prices also comes from the category of transport, resulting from a decline of oil price in the global market (Graph 07). Real effective exchange rate depreciated at the annual level under the impact of a stronger decline of domestic consumer prices (Graph 08).

The complete halt of operations in many activities and restricted flow of goods and services slowed down the deposit growth at the annual level, and influenced the decline of lending (Graphs 09 and 10). In May, compared to April, the decrease of the most liquid component of monetary aggregates was recorded, the speed of money multiplication increased slightly (Graph 11). The decrease of the CBBH foreign exchange reserves at the monthly level was firstly caused by the decrease of banks' foreign liabilities, which made the balances in banks' accounts with the CBBH decrease as well. The currency board coverage remained above the minimum prescribed by law (Graph 12). Bank liquidity, observing the average balance in reserve accounts with the CBBH, did not significantly change due to the pandemic (Graph 13).

At the annual level, the growth of exposure of banking sector to the general government sector continued on the basis of loans and securities (Graph 14). The increased need to service the budget expenses brought about the issuing of debt securities in May (Graph 15). Since the outbreak of the pandemic, the government of the countries in the region adopted a number of measures to mitigate negative financial effects of the pandemic, which will increase considerably the budget deficit (Graph 16). In May, a decline of the indirect tax revenues continued, having started in the previous month, with the most significant contribution to the total decline coming from a decrease of the VAT revenues (Graphs 17 and 18).

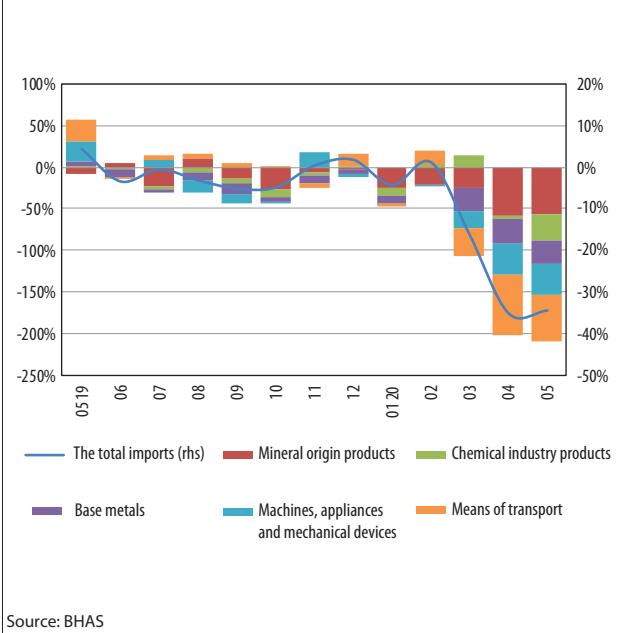

G01: Exports by the Main Product Groups, Annual Growth Rates

Source: BHAS

In May, exports decreased by 28.3% at the annual level, while the annual rate for cumulative five months was negative amounting to 16.0%. Comparing the annual rate in May and the annual rate in April, the signs of slow recovery are visible in some product groups, the exports of furniture, wood and wood products and to some extent the exports of machines and appliances. In the exports of base metals and mineral origin products, the annual rate in May was slightly lower compared to that recorded in April. In May, at the annual level, the exports of furniture decreased by 30.6%, wood and wood products by 19.0%, machines and appliances by 23.8%, while base metals recorded the highest decrease rate of 45.0%

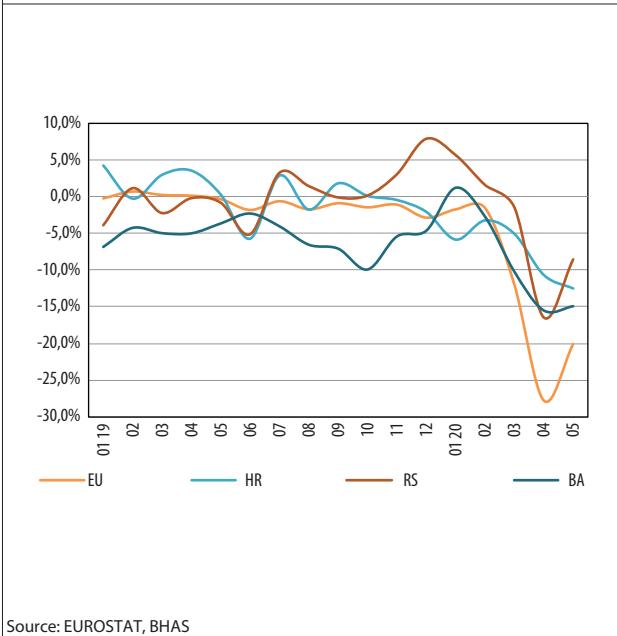

G02: Imports by the Main Product Groups, Annual Growth Rates

Source: BHAS

In May, imports decreased by 34.5% compared to the same month of the previous year, while the annual rate for cumulative five months was negative amounting to 19.2%. Following a 70% decline in April, a 50% decline at the annual level was recorded in the imports of vehicles in April. The other main import groups of products had almost the same downward rates as in April, so the signs of recovery by product groups are not visible yet. In May, the annual rate of decrease of the imports of mineral origin products amounted to 57.4%, and that of base metals was 28.2%.

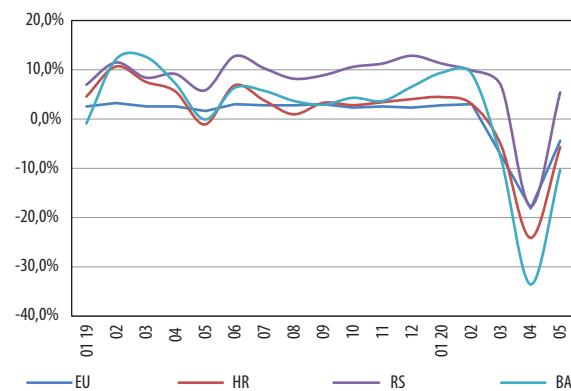

G03: The Annual Change of Industrial Production

Source: EUROSTAT, BHAS

After BH had recorded the strongest decline of industrial production in the region in the last year, resulting from the halt of the operations of some strategic companies and lower foreign demand, a slow industry recovery in the beginning of the year was interrupted by the coronavirus pandemic. Observing the period of the first five months, compared to the same period of the previous year, a decline of industrial production was 8.8%. A strong decline of manufacturing industry (13.7%) had the most significant contribution to the decrease of the overall industrial production.

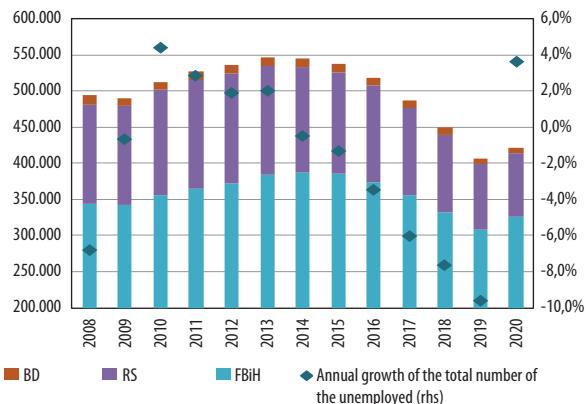

G04: Annual Change of Retail Trade

Source: EUROSTAT, BHAS

A continuous growth of the service sector activities during the previous years mainly determined a slow growth of the overall economic activity. The corona crisis impact reduced the activities of tourism, transport and trade, which is evident in retail trade turnover which had a record decline in the second quarter of the current year. Observing the first five month period in BH, the growth of turnover was recorded only in the activities of retail trade in food and beverages, and retail trade in cosmetic and medical products, while a significant decline of turnover was recorded in other activities.

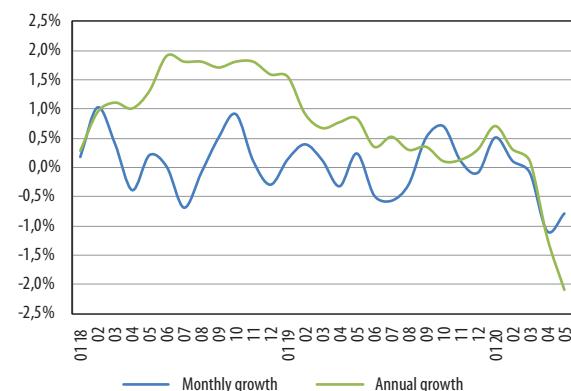

G05: The Number of the Unemployed in May 2020

Source: BH Labour and Employment Agency

Following the record increase of the number of the unemployed in April, the unemployment was stagnating on the monthly level in May, due to a gradual reactivation of economy. A significant growth of unemployment was recorded at the annual level, after the strongest decline of the number of the unemployed had been recorded in the same month of the previous year since the period of the global financial crisis.

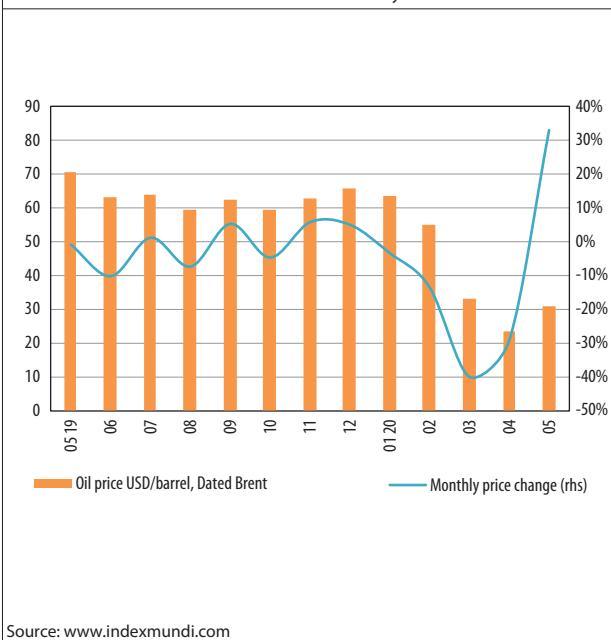

G06: Rates of Change of Average Consumer Prices

Source: BHAS

A considerable decline of consumer prices was recorded at the monthly and annual levels, due to the corona crisis effects on lower household spending. At the same time, deflationary pressure on general prices came also from the category of transport. Observing the first five month period, the annual decline of average consumer prices (0.4%) was mainly determined by a considerable decline of the prices of clothes and footwear and transport, which annulled the strong growth of the prices in the categories of alcohol beverages and tobacco and the prices of food and beverages.

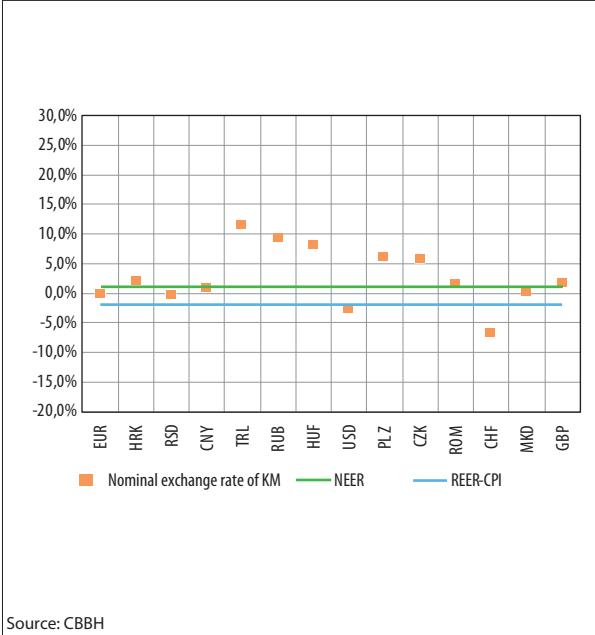

G07: Trend of Oil Price in the Global Market in May 2020

Source: www.indexmundi.com

Since the beginning of the crisis caused by the coronavirus pandemic, the oil price was oscillating in the global market. A lower demand for this energy source and the storage problem made the price go down to a very low level in April, followed by the recovery as early as in May. So, in May, the average oil price amounted to 31.2 USD/Barrel, which was a price increase by 33.0% compared to the previous month.

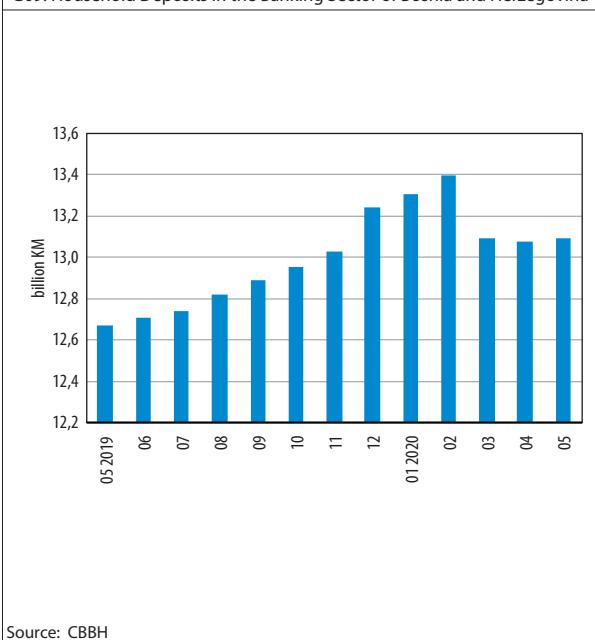

G08: Annual Changes in Foreign Exchange Rate, May 2020

Source: CBBH

Nominal effective exchange rate (NEER) in May 2020 appreciated compared to the same month of the previous year by 1.0%, while the real effective exchange rate of KM (REER) in May, at the annual level depreciated by 1.9%. The appreciation of NEER was brought about by the nominal appreciation of KM against the currencies of developing countries, resulting from the trend of EUR (our peg currency) to US dollar (the currencies are in the order of the significance of a country in trade).

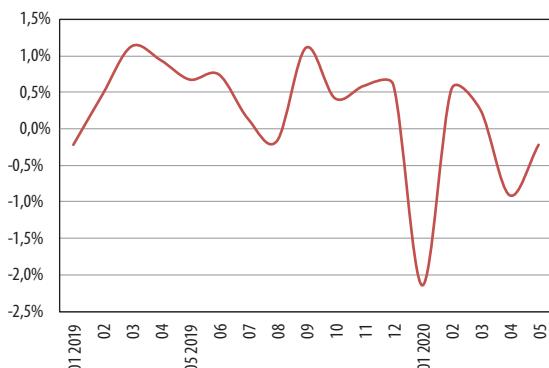

G09: Household Deposits in the Banking Sector of Bosnia and Herzegovina

Source: CBBH

Following a significant decline of household deposits during March and the decline of some kinds of household deposits during April, the total level of household deposits in May stabilized. The total deposits in the end of May amounted to KM 13.09 billion and they slightly increased compared to April. Compared to the situation prior to the pandemic, sight deposits in foreign currencies decreased most, local currency long-term deposits and foreign currency long-term deposits by 2% (KM 51.5 million KM), 3.7% (KM 41.5 million) and 4.2% (KM 175 million) respectively (May 2020/February 2020).

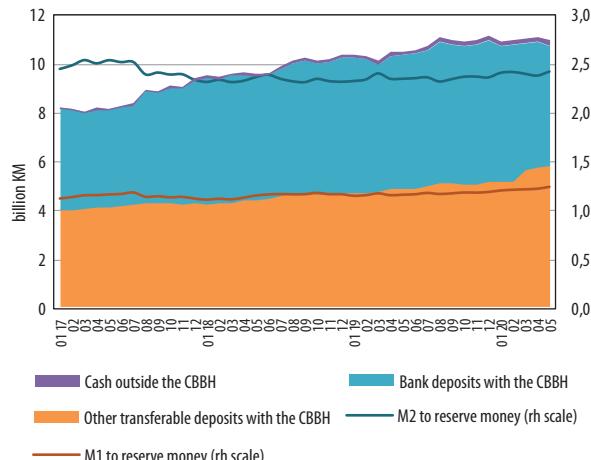

G10: Monthly Rates of Credit Growth in Bosnia and Herzegovina

Source: CBBH

In May, both the annual and monthly growth of loans decreased considerably, with the annual growth rate being also affected by changes in the loan bookkeeping, which took place in January 2020. The loan balance in May, KM 20.26 billion was affected by these new regulations and also by more cautious lending policy of banks, and also decrease of demand for loans. Loans have a significant role in private sector financing and the continuing impact of the pandemic on the demand for goods and services is one of the factors influencing a significant slowdown of lending.

G11: Reserve Money and Speed of Money Multiplication

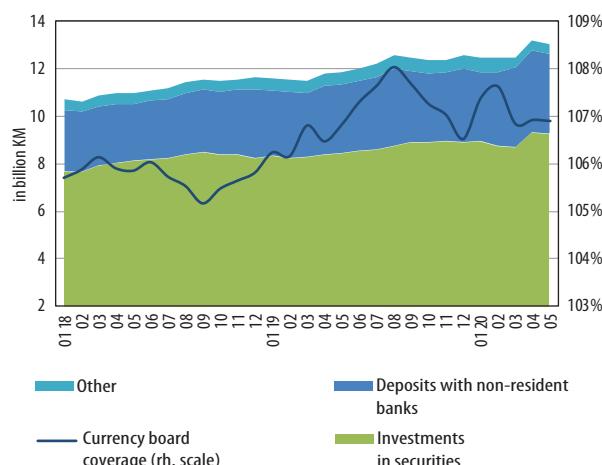

Source: CBBH

The same as in April, in May, banks' deposits with the CBBH recorded a monthly decrease. Unlike April, decrease of banks' deposits (KM 186.7 million, or 3.66%) was not annulled by the increase of cash outside the CBBH. In other words, commercial banks settled their due liabilities to non-residents primarily by decreasing their deposits with the CBBH. Consequently, reserve money decreased (by KM 145.1 million or 1.31%) compared to April.

As in May, compared to April, the decrease of the most liquid component of monetary aggregates was recorded, the rate of money multiplication slightly increased.

G12: The CBBH Foreign Exchange Reserves

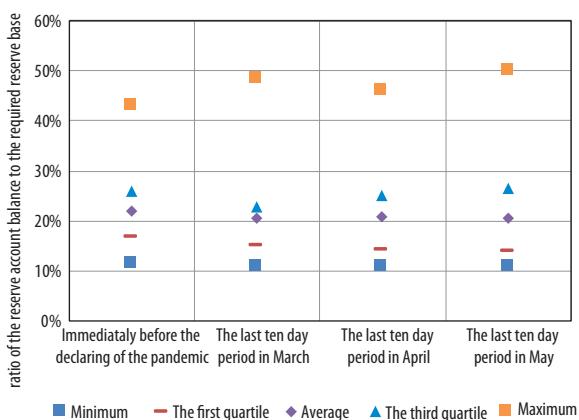

Source: CBBH

Note: The currency board coverage was calculated as a ratio of monetary liabilities to net foreign exchange reserves.

At the monthly level, the CBBH foreign exchange reserves decreased by KM 118.3 million (-0.90%), to the level of KM 13.06 billion in the end of May. The decrease was primarily caused by the decrease of foreign liabilities of banks, which also made balances in banks' accounts with the CBBH decrease. Due to the decrease of the CBBH liabilities, the foreign exchange reserves decreased as well.

The CBBH foreign exchange reserves remained primarily in the form of investments in securities. The currency board coverage is still significantly above the minimum 100% as defined by the law.

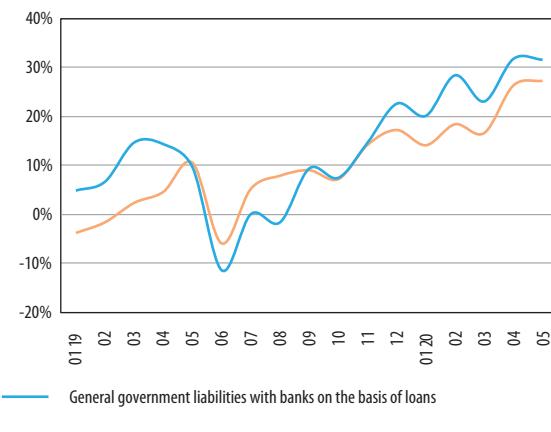

G13: Banks' Reserve Accounts with the CBBH

Source: CBBH.

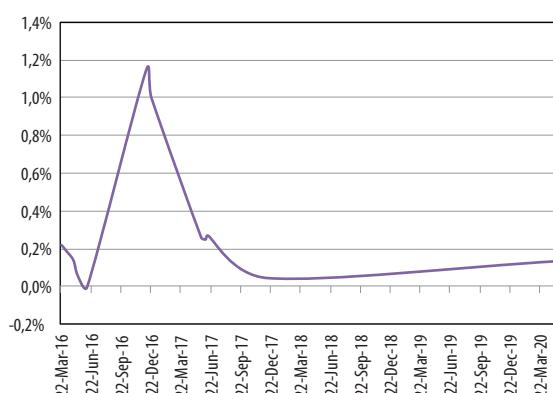

Note: Razvojna banka FBiH has not been included.

G14: General Government Debt with Commercial Banks, Annual Growth Rates

Source: CBBH

G15: Issues of Six Month Treasury Bills of the Federation of Bosnia and Herzegovina

Source: SASE

Bank liquidity, observing the average balance in reserve account with the CBBH, did not significantly change compared to the period before the pandemic, or compared to April. The implicit required reserve rate, for the entire system, shown as the average value in the graph, was above 20% in the end of May as well.

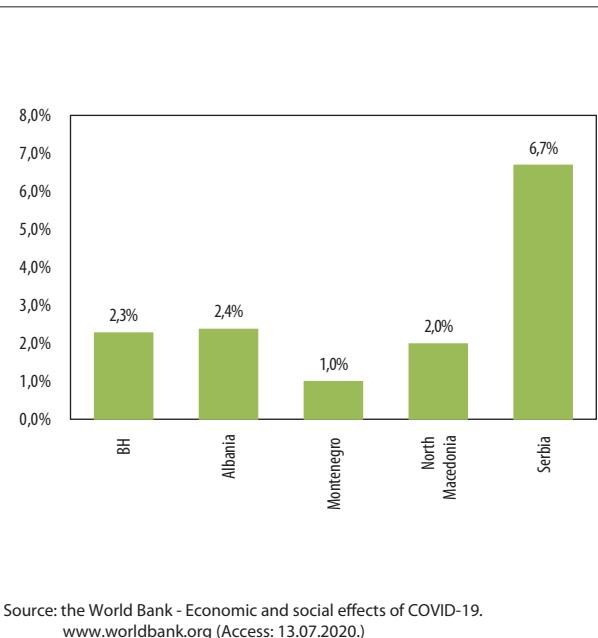

The first quartile level remained slightly lower compared to the period before the declaring of the pandemic, but it should be taken into account that the reserve accounts with the CBBH are only a part of highly liquid bank assets. There are still no signs that bank liquidity significantly decreased compared to the beginning of March.

Over the last calculation period in May, the average required reserve amounted to KM 2.65 billion, while the average excess reserves amounted to KM 2.30 billion. The required reserve policy remained the same.

In May, the growth of exposure of banking sector to the general government sector on the basis of securities continued. The annual growth rate in the end of the month amounted to 27.2%, this being the highest growth at the annual level over the last three years. Due to the COVID-19 pandemic, the rate of collection of budget revenues is lower, and the entity governments are forced to issue securities in capital market, in order to compensate the insufficient funds in the budget. Commercial bank exposure to the general government sector on the basis of loans slowed down, so, in the end of May, the annual growth rate on this basis was 4.4%. In the end of May, the total debt of the general government sector on these two bases was KM 2.86 billion, which was the annual growth of the liabilities in the amount of KM 423.2 million or 17.4%. Banking sector exposure to the general government sector in the end of May was 8.8% of the total banking sector assets.

As different from Republika Srpska which did not have public debt issues during May, the Federation of Bosnia and Herzegovina issued debt financial instruments even twice. Both issues were successful, and the total of KM 80 mil. was collected. Public debt was issued on a period of 6 months (KM 60 mil.) and the period of seven years (KM 20 mil.). The features of the issues in May were the decline of demand and the growth of yield to maturity rates in the primary market, however the decline of demand was stronger in the market of six month treasury bills. The growth of the yield rates in the primary market of the entity public debt resulted from the growth of the risks of financing the entity budgets due to a significant decrease of the tax base.

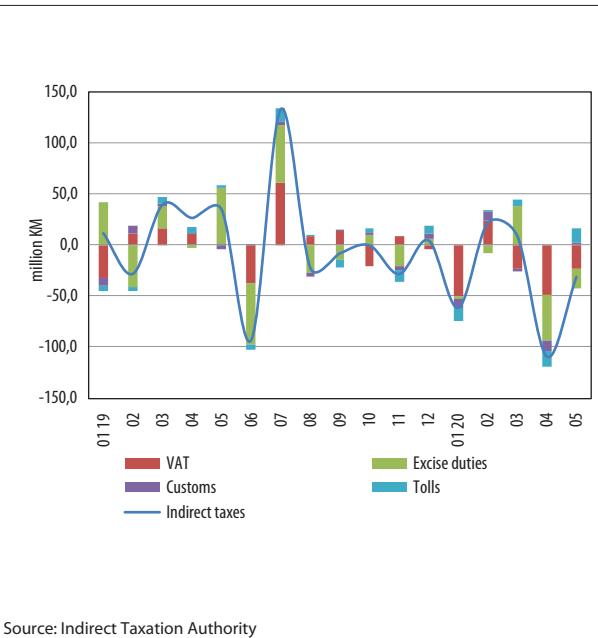

G16: Measures to Mitigate Negative Effects of the COVID-19 Pandemic as % of GDP

Source: the World Bank - Economic and social effects of COVID-19.
www.worldbank.org (Access: 13.07.2020.)

Since the outbreak of the COVID-19 pandemic, the governments of the countries in the region adopted a number of measures to mitigate the negative financial effects of the COVID-19 pandemic. Most countries decided to provide financial support to facilitate undisturbed cash flows of economic entities in the times of restriction and lockdown in economies. Significant funds were planned for the help to health systems (for the procurement of equipment and tests), as well as social care for employees. The governments of the entities in BH planned to allocate funds in their budgets in the amount of 2.3 % of GDP for these purposes.

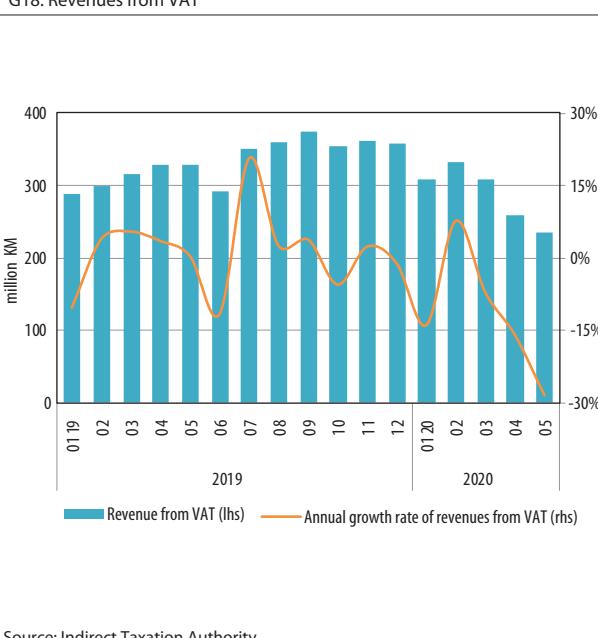

G17: Monthly Changes of Indirect Taxes

Source: Indirect Taxation Authority

In May, the decline of the indirect tax revenues, which had started in the previous month, was continued. Negative trends in the collection of revenues were a direct consequence of the COVID-19 pandemic. The decrease of imports resulted in a significant decline of the revenues on the basis of import duties. The monthly decline of indirect tax revenues amounted to KM 21.0 million. The largest contribution to such decline came from the main components, VAT and excise duties. The total collected revenues from indirect taxes for the first five months amounted to KM 2.35 billion and compared to the previous year, they declined by 9.3%. In the first five months of 2020, the Indirect Taxation Authority carried out reimbursements to legal persons in the amount of KM 528 million, which was lower by KM 99 million compared to the same period of the previous year.

G18: Revenues from VAT

Source: Indirect Taxation Authority

In May, a trend of significant decrease of VAT revenues at the annual level continued. The COVID-19 pandemic, among other, had a strong impact on the decrease of final consumption, which brought about a decrease of the revenues on the basis of VAT in internal transactions. During the first five months, a considerable decline of VAT revenues was recorded compared to the same period of the previous year. In the mentioned period, KM 1.45 billion was collected on the basis of VAT, which was a decline of KM 116.8 million (7.5%) compared to the same period of the previous year.

Notes applicable for tables 4, 5, 7, 8, 9, 10, 11, 12, 13.

Since 01 July 2017, the status change of the merger of subsidiary company UniCredit Leasing d.o.o. Sarajevo to the company Unicredit Bank d.d. Mostar has taken place. Accordingly, UniCredit Leasing d.o.o. Sarajevo has stopped existing as of 30 June 2017 and the data on the merged company are presented within the report on UniCredit Bank d.d. Mostar, starting from the report for July 2017.

The revised data for the period January 2006 – November 2015 are based on the active sub-balance of the banks with majority state owned capital from the Federation of BH, with the passive sub-balance excluded. Through such supplement of statistics, the users are provided with higher analytical usefulness of data and objective indicators on the current operations of banks in BH. Passive sub-balance includes the liabilities based on foreign loans and old foreign exchange savings of citizens until 31 March 1992 and it does not reflect the current operations of the bank, so this sub-balance in the privatization process will be taken over by the Ministry of Finance of FBH according to the Law on Initial Balance Sheets of Banks and the Law on Privatization, as it has been done for the previously privatized banks. The performed revision mainly influenced the decrease of loans to public companies in a foreign currency, decrease of foreign liabilities, decrease of other items of assets and liabilities on the basis of old foreign exchange savings, and in considerably lower amounts, on items of loans to the Entity Government, fixed assets, non-residents' deposits, shares and capital.

The data on the „complete“ balance sheet, with the included passive sub-balance, are still available at: http://statistics.cbbh.ba:4444/Panorama/novaview/SimpleLogin_bs.aspx

In November 2014, two banks have realized the sale and transfer of part of the loan portfolio which resulted with increase in reserves with monetary authorities in the amount of 64 million KM and a decrease in the following items: claims of non-financial private enterprises 260 million KM, foreign liabilities 101 million KM and other items (net) 95 million KM.

Due to the application of International Accounting Standards (IAS) and the International Financial Reporting Standards applied in BH Federation banks and the transfer of money flows in December 2011 data, the following changes have occurred at the assets side: decrease of loans by KM 155 million, an increase in other assets by KM 10 million, at the liabilities side: decrease of liabilities to non-residents in the amount of KM 624 million, an increase in loan loss provisions by KM 472 million and other liabilities increased by KM 7 million.

In February 2011, one bank from BH Federation reclassified deposits in the amount of around KM 80 million, from the deposits of public companies to the Entities' governments deposits, in line with the IMF recommendations.

By order of the FBH Banking Agency, in June 2010, one bank made a reclassification of about KM 300 million of claims based on securities on domestic institutional sectors to the claims on non-residents. In December 2010, the same bank made this reclassification, retroactively, in the respective amounts for the period from August 2009 when the error occurred, until May 2010. The above reclassification was reflected in the increase in foreign assets and decrease in other items net.

One bank from FBH made a reclassification of financial instruments in the foreign assets amounting to about KM 40 million for the period January - August 2010. Claims on non-residents based on loans were reclassified in claims on non-residents on the basis of securities, which resulted in changes in the short- term and long- term foreign assets.

By order of the Banking Agency of Republika Srpska one bank made a reclassification of financial instruments on the liabilities side, for the period of September 2008 - November 2010, i.e. the decrease in time and savings deposits of non-bank financial institutions and government sector, and the increase in loans from the same sectors, respectively, in the appropriate amounts, by months, ranging from 50 - 150 million KM.

In accordance with new regulations of the RS Banking Agency, published in the Official Gazette of RS, no.136/10, which has regulated a new manner of recording receivables classified in category "E", accounting and bookkeeping of interest on non-performing assets and calculation of general and special provisions, RS banks, in the data for December 2010, implemented the mentioned regulations, by transferring these items from off-balance records into balance sheet. The correction was reflected on the assets side, as increase of loans in the amount of about KM 144 million, and increase of due interest in the amount of KM 36 million, and on the liabilities side, as increase in provisions for loan losses amounting to about KM 180 million within the capital account.

Notes:

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Gross foreign reserves consist of balance sheet positions of short-term foreign assets of the CBBH (gold, CBBH SDR holdings, foreign exchange in the CBBH vault, transferable deposits in foreign currency with non-resident banks and other) and investment in securities according to the CBBH Investment Committee Decision from July 2006. Net foreign reserves represent a difference between gross foreign reserves and liabilities to non-residents. Monetary liabilities of the CBBH include money outside monetary authorities and deposits of residents with monetary authorities. Net foreign assets of CBBH represent a difference between net foreign exchange reserves and monetary liabilities of the CBBH.

Notes:

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports and in accordance with the recommendations of the IMF Manual and Guidelines for the 2016 compilation of monetary and financial statistics.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

The currency outside monetary authorities is taken from the CBBH Balance Sheet and it consists of cash outside the central bank (monetary authorities). Deposits of commercial banks are commercial banks' funds in accounts at the CBBH. Transferable deposits of other domestic sectors with monetary authorities are deposits of other domestic sectors (except central government deposits). The central government consists of BH Institutions, Entity governments, Entity Social Security Funds and those of Brčko District. Social security funds on Entity level (from Federation of BH: Pension Fund, Health Care Fund of FBH, Employment Fund of FBH, and from Republika Srpska: Pension and Disability Insurance Fund of RS, Health Care Fund of RS, Employment Fund of RS and Fund for Child Protection of RS) are classified on the central government level.

Cash outside banks is taken over from the CBBH Balance Sheet (Table 6) and represents cash in circulation outside the central bank (monetary authorities) and cash outside commercial banks. Transferable deposits in the domestic currency are taken from the Monetary Survey (Table 5). They consist of deposits of non-central government (cantons and municipalities), deposits of public and private companies, other financial institutions and deposits of other domestic sectors (households, non-profit institutions and other unclassified sectors). Other deposits in the domestic currency, transferable and other deposits in foreign currency are taken over from the Monetary Survey (Table 5). They consist of deposits of non-central government (cantons and municipalities), deposits of public and private companies, other financial institutions and deposits of other domestic sectors (households, non-profit institutions and other unclassified sectors).

Reserve money (primary money or monetary base) is entirely taken from the CBBH Balance Sheet (Table 6). It consists of cash outside monetary authorities, deposits of commercial banks and deposits of other domestic sectors (except for deposits of the central government) with monetary authorities. According to national definition, money supply comprises all transferable and other deposits of domestic nonbank and nongovernment sectors, as well deposits of local government in domestic and foreign currency. Deposits of entity Social Security Funds are included into the central government on Entity level and by that they are excluded from money supply or monetary aggregates. Monetary aggregate M1 comprises cash outside banks and transferable deposits in domestic currency of all domestic sectors (except for deposits of the central government). Monetary aggregate QM is defined in the same way as the corresponding item in the Monetary Survey (Table 5). It consists of other deposits in domestic currency, transferable and other deposits in a foreign currency of all domestic sectors (except for deposits of the central government). Money supply M2 comprises monetary aggregates, M1 and QM.

Notes:

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports.

Monetary data updated according to the MMF methodology (Monetary and Financial Statistics Manual, 2000), from January 2006

The Monetary Survey presents the consolidated data from the Balance Sheet of CBBH - monetary authorities (Table 6) and the Consolidated Balance Sheet of Commercial Banks of Bosnia and Herzegovina (Table 7). Foreign assets (net) represent the difference between total foreign assets of the CBBH - monetary authorities and commercial banks of BH and total foreign liabilities of the CBBH - monetary authorities and commercial banks of BH. Domestic loans represent commercial banks' claims on all domestic sectors, but it should be noted that claims on central government are presented in net amounts, i.e. they are reduced by the deposits of central government with the CBBH and with BH commercial banks. The central government consists of BH Institutions, Entity governments, Entity Social Security Funds and those of Brčko District. According to new methodology, Social Security Funds are classified on the central government level as Entities' off-budget funds, which has a direct impact on the data about net claims on the central government in Monetary Survey.

Notes:

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports and in accordance with the recommendations of the IMF Manual and Guidelines for the 2016 compilation of monetary and financial statistics.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Money M1 comprises currency outside banks, transferable deposits in the domestic currency of all domestic sectors (except for deposits of central government). Quasi money QM comprises other deposits in the domestic currency, transferable and other deposits in foreign currency of all domestic sectors (except for deposits of the central government). Money supply M2 comprises monetary aggregates, money M1 and quasi money QM. Other liabilities include securities, loans, shares and other equity and other items (net). According to a new methodology, loans are presented as separate financial instruments on the side of liabilities (with which the calculated interest is added), and also shares and other equity. Other items (net) are unallocated items of liabilities reduced by the unallocated items of assets. Other items (net) also comprise restricted deposits, counter-items of funds and government lending funds.

Note:

Monetary data updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000), from January 2006.

The CBBH (monetary authorities) foreign assets comprise gold, foreign currency in the CBBH vault, foreign currency deposits with foreign banks, SDR holdings, foreign securities and other. Claims on domestic sectors consist of claims on employees of the CBBH for the extended long-term loans and claims on commercial banks on the basis of settlement accounts.

Reserve money (primary money or monetary base) is comprised of cash outside monetary authorities, deposits of commercial banks and deposits of other domestic sectors (except for the central government) with monetary authorities. Cash outside banks represents cash in circulation outside the Central Bank (monetary authorities) and cash outside commercial banks. The CBBH foreign liabilities are comprised of short-term liabilities towards non-residents, deposits of non-residents and other short-term liabilities towards non-residents and liabilities towards the IMF (Accounts 1 and 2).

Deposits of central government with the CBBH are transferable and other deposits of BH Institutions, Entity Governments, Entity Social Security Funds and those of Brčko District in the local currency. Shares and other equity comprise the equity, current year result, general and special reserves and adjustment/revaluation. Other items (net) are unallocated items of liabilities reduced by the unallocated items of assets.

Notes:

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Consolidated balance sheet of commercial banks includes consolidated balance sheets of commercial banks covered by Main Unit Sarajevo, Main Unit Mostar and Main Bank of Republika Srpska CBBH and it represents consolidation of mutual claims and liabilities among the commercial banks. Banks' reserves consist of cash in the banks' vaults and banks' deposits with the Central Bank of Bosnia and Herzegovina. Foreign assets of commercial banks include: foreign currency in the vaults, transferable and other deposits with non-residents in foreign currency, loans to non-residents, securities of non-residents in foreign currency, and other claims on non-residents.

Claims on general government include claims on all levels of government: the central government (BH Institutions, Entity governments, Entity social security funds and Brčko District) and non-central governments (canton and municipality governments). Claims on other domestic sectors include claims on public non-financial enterprises, private non-financial enterprises, other financial institutions and claims on other domestic sectors (households, non-profit institutions and other unclassified sectors).

Notes:

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports and in accordance with the recommendations of the IMF Manual and Guidelines for the 2016 compilation of monetary and financial statistics.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Central government deposits include transferable and other deposits in domestic and foreign currency of BH Institutions, Entity governments, Entity social security funds and those of Brčko District. Transferable and other deposits of other domestic sectors in domestic and foreign currency represent banks liabilities towards non-central government (canton and municipality governments), public non-financial enterprises, private non-financial enterprises, other financial institutions and other domestic sectors (households, non-profit institutions and other unclassified sectors). Foreign liabilities of commercial banks include banks liabilities to non-residents based on transferable and other deposits, loans, securities, trade loans and advance payments and other accounts payable. According to a new methodology, loans are presented as a separate financial instrument on the side of liabilities, with which the calculated interest is added.

Shares and other equity include equity, retained earnings, current year result, general and special reserves and adjustment/revaluation. Other items (net) are unallocated items of liabilities reduced by the unallocated items of assets. Restricted deposits are also included in other items (net).

Notes:

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Total deposits represent liabilities of commercial banks of BH towards all domestic institutional sectors in domestic and foreign currency. Total loans represent claims of commercial banks of BH on all institutional sectors, in domestic and foreign currency.

Notes:

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports and in accordance with the recommendations of the IMF Manual and Guidelines for the 2016 compilation of monetary and financial statistics.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

By order of FBA in March 2010, loans to households with currency clause with one bank were reclassified, from loans in EUR to loans in KM.

Notes:

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Deposits of domestic institutional sectors represent liabilities of commercial banks towards all institutional sectors. Deposits on the BH level represent deposits with commercial banks covered by Main Unit Sarajevo, Main Unit Mostar and Main Bank of Republika Srpska CBBH Banja Luka. Sight deposits represent liabilities of commercial banks related to transaction accounts and sight deposits in domestic and foreign currency.

Notes:

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Loans to domestic institutional sectors represent claims of commercial banks on all institutional sectors. Loans at the BH level include loans extended by commercial banks covered by Main Unit Sarajevo, Main Unit Mostar and Main Bank of Republika Srpska CBBH Banja Luka. The total of claims on all levels of government and funds (short-term and long-term) are shown in Table of short-term loans (columns 3,4,5,6,7) in total amount, because source data do not provide a maturity structure of claims for governments and funds. Short – terms loans represent claims of commercial banks on all domestic institutional sectors up to one year, in domestic and foreign currency.

Notes:

Since 01 July 2017, the status change of the merger of subsidiary company UniCredit Leasing d.o.o. Sarajevo to the company Unicredit Bank d.d. Mostar has taken place. Accordingly, Unicredit Leasing d.o.o. Sarajevo has stopped existing as of 30 June 2017 and the data on the merged company are presented within the report on UniCredit Bank d.d. Mostar, starting from the report for July 2017.

* Interest rates in table for revolving loans and credit cards and their amounts refer to the outstanding amounts.

IRF – initial rate fixation

... insufficient data to be published

The interest rate on the revolving loans and credit cards, includes data on credit cards with loan facility. Considering that credit cards with loan facility imply an interest free deferred payment (0% ir), they are not published.

No data for interest rates on loans in foreign currency on the basis of credit cards and overdrafts to Households.

Notes:

Since 01 July 2017, the status change of the merger of subsidiary company UniCredit Leasing d.o.o. Sarajevo to the company Unicredit Bank d.d. Mostar has taken place. Accordingly, Unicredit Leasing d.o.o. Sarajevo has stopped existing as of 30 June 2017 and the data on the merged company are presented within the report on UniCredit Bank d.d. Mostar, starting from the report for July 2017.

* Interest rates in table for revolving loans and credit cards and their amounts refer to the outstanding amounts.

IRF – initial rate fixation

... insufficient data to be published

The interest rate on the revolving loans and credit cards, includes data on credit cards with loan facility. Considering that credit cards with loan facility imply an interest free deferred payment (0% ir), they are not published.

No data for interest rates on loans in foreign currency on the basis of credit cards and overdrafts to non-financial corporations.

Notes:

From 1 July 2016, the required reserves rate applied by the CBBH to the base for calculation of required reserves is 10%.

From 1 July 2016, the CBBH applies the new rates for the calculation of fees to the funds in the banks' reserves accounts : in the accounting period, the Central Bank does not charge a fee on the amount of required reserves in commercial banks' reserves accounts, and on the amount of excess reserves, the CBBH charges the fee at the rate equal to 50% of the rate applied to commercial banks' deposits (deposit facility rate) by the European Central Bank.

Since 01 May 2015, the Central Bank has calculated the compensation for a bank on the amount of the bank's funds in the reserve account with the Central Bank in the calculation period, as it follows:

- on the reserve requirement amount – the average of EONIA recorded in the same period on the market reduced by 10 basis points, or minimum zero,
- on the amount of the funds exceeding the reserve requirement – zero rate of compensation.

The zero rate of compensation on the reserve requirement is applied in case the average EONIA decreased by 10 basis points has a negative value.

From 1 September 2014, the remuneration rate has been calculated on the basis of the weighted average interest rate which was earned by the Central Bank of BH on the market in the same period on deposits invested up to a month ; and 70% is calculated on the amount of required reserve or minimum 0, while 90% of the mentioned rate is calculated on the amount of excess reserves or minimum 0.

From 1 February, 2011, the required reserves rate on deposits and borrowed assets with contracted term of maturity up to one year was declined from 14% to 10%,while the required reserves rate on deposits and borrowed assets with contracted term of maturity over one year is not changed.

From 1 August 2011, the remuneration rate is calculated by the weighted average interest rate which were earned by the Central Bank on deposits invested up to a month in the same period; 70% of this rate is calculated on the amount of required reserves while 90% of the same rate is calculated on the amount of excess reserves.

From 1 July 2010, remuneration rate on the amount of required reserves is changed and calculated as an average of interest rates, which were earned by the Central bank on overnight deposits in the same period,while remuneration rate on the amount of excess reserves is not changed.

From 1 January, 2009, the required reserves rate is 14% on deposits and borrowed assets with contracted term of maturity up to one year and 10% on deposits and borrowed assets with contracted term of maturity over one year.

From 1 April 2009, remuneration rate is calculated as:- On the amount of required reserves is 0,5%,- On the amount of excess reserves on the rate calculated as an average of interest rates, which were earned by the Central bank on deposits invested up to u month.

From 1 May 2009, the required reserves rate is 7% on deposits and borrowed assets with contracted term of maturity over one year.

From 1 January 2008, required reserves rate was increased from 15% to 18%.

From 11 October 2008, required reserves rate was declined from 18% to 14%.

*The base for calculation of required reserves includes deposits and borrowed funds in domestic (in KM and KM with the currency clause) and other currency expressed in KM.

Notes:

Consumer Price Index with temporary reductions of prices is a type of Consumer Price Index, in calculation of which, we take in account the reductions in prices of certain goods and services, in accordance with the EU Regulation, No 2602/2000.

Notes:

Criteria for presenting country is the share of export of the country in total three-year BH export (2016,2017,2018).

Thus, all countries with share higher than 3,0% are separately presented, while the other countries are presented as sum in the column "Other countries".
