INTRODUCTORY SUMMARY

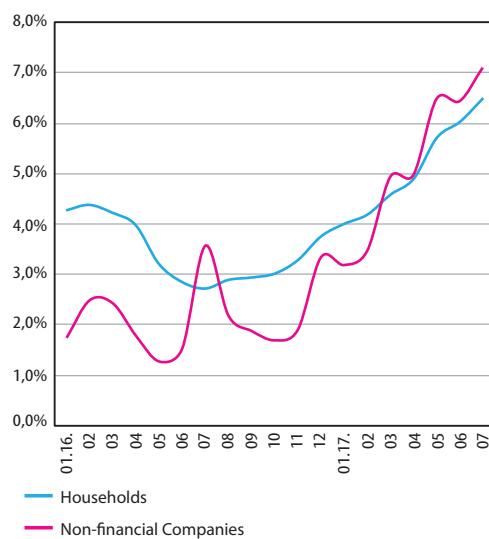

UniCredit Leasing d.o.o. Sarajevo has been merged with UniCredit banka dd Mostar since 01 July 2017. This status change has brought about the growth of the loans to non-financial companies, and also the growth of foreign liabilities of banks due to the takeover of the liabilities on the basis of the loans from non-residents (Graphs 01 and 02). The upward trend of the average required reserve due to the growth of deposits of domestic sectors was noticed in July (Graph 03). The CBBH foreign exchange reserves recorded a monthly increase due to a positive balance of KM purchase and sale recorded with commercial banks and government depositors with the CBBH (Graph 04). Seasonal demand for liquid assets, deposits in the local currency and cash outside banks almost entirely determined the trend of money supply in July (Graph 05). Household deposits, and also government deposits decreased over the observed period, while the growth of companies' deposits contributed to the growth of the total deposits (Graph 06).

Industrial output remained the same at the monthly level, with the simultaneous monthly decline of the general price level caused mainly by the decline of the prices of clothes and footwear, and also food and non-alcohol beverages (Graphs 07 and 08). The number of the unemployed in BH slightly increased at the monthly level in July (Graph 09). The euro appreciation trend in relation to US dollar has continued for seven successive months (Graph 10).

The deficit in foreign trade decreased in July compared to July of the previous year (Graph 11). Predominantly exporting groups of products, furniture and wood products, affected the improvement of the trade deficit, and observed by trade partners, the most significant decrease of the trade deficit was recorded in the exchange with Croatia (Graphs 12 and 13).

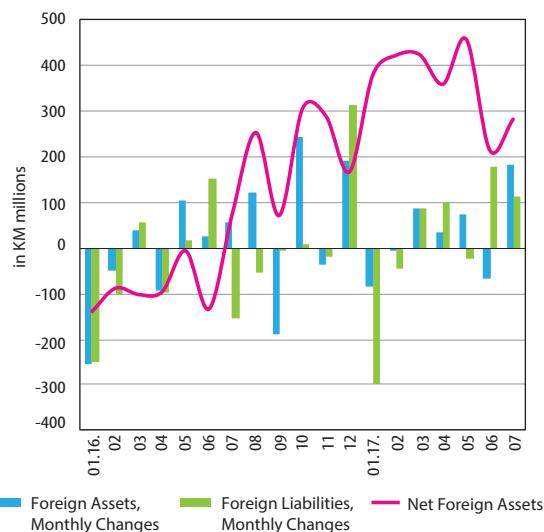

In July, a slight decrease of the liabilities on the basis of the issued securities of the general government was recorded at the monthly level, while a slight growth of loans was present in the previous two months (Graph 14). The monthly growth of the revenues from indirect taxes was mainly the result of the growth of customs duties, while the revenue on the basis of excise duties declined (Graph 15). Around half of the total planned amount of debt to be serviced in 2017 was serviced in the first seven months (Graph 16). During July, interbank payment system at the monthly level was decreased (Graph 17). At BH stock exchanges, a very low level of trading was recorded during the observed month (Graph 18).

Source: Table 18

Since 01 July 2017, the subsidiary company Unicredit Leasing d.o.o. Sarajevo has merged with UniCredit banka dd Mostar which increased the balance sheet sum of UniCredit banka. In the assets, the largest increase was recorded in the loans to non-financial companies (KM 125 million). So, the loans to this sector increased by 7.1% at the annual level according to statistics data, while their increase amounted to 5.5% at the annual level without the effect of the mentioned status change. With the household sector, the growth of loans was significantly lower due to the mentioned status change and it amounted to around KM 7.5 million.

In July 2017, the increase of foreign assets was recorded (6.8%) and that of foreign liabilities (4.6%) of commercial banks at the monthly level. The items which contributed to the increase of foreign assets were foreign currency in banks' vaults and deposits with non-residents, while the loans to non-residents decreased. The status change of the merger of UniCredit Leasing with UniCredit banka as of 1 July resulted in the increase of loans from non-residents in the amount of around KM 134 million.

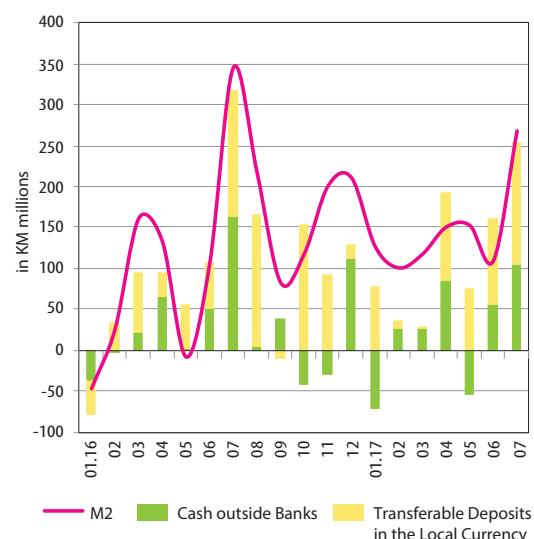

Significant amounts were still recorded in the balances of reserve accounts. So, the average balance of required reserve in July amounted to KM 2.12 billion, while the average excess funds amounted to KM 1.98 billion. The upward trend of the average required reserve was observed which was due to the growth of domestic sector deposits.

G04: Monthly Changes of Gross Foreign Exchange Reserves, Banks' Deposits with Monetary Authorities and Monthly Values of the Balance of KM Purchase and Sale

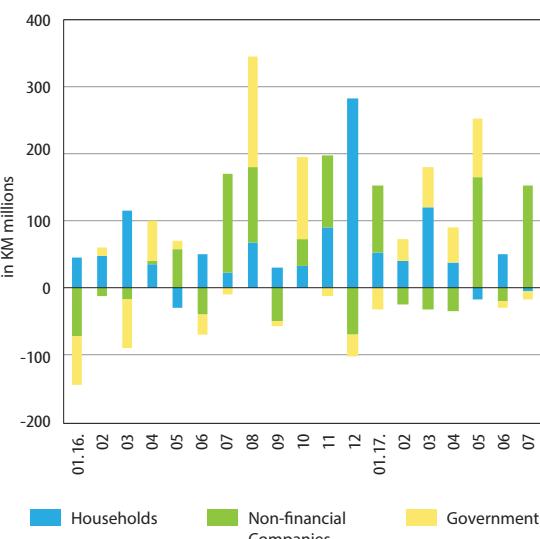

Source: Tables 02, 03 and 04

G05: Monthly Changes of Components M1 and Broad Money Supply

Source: Table 04

G06: Deposits

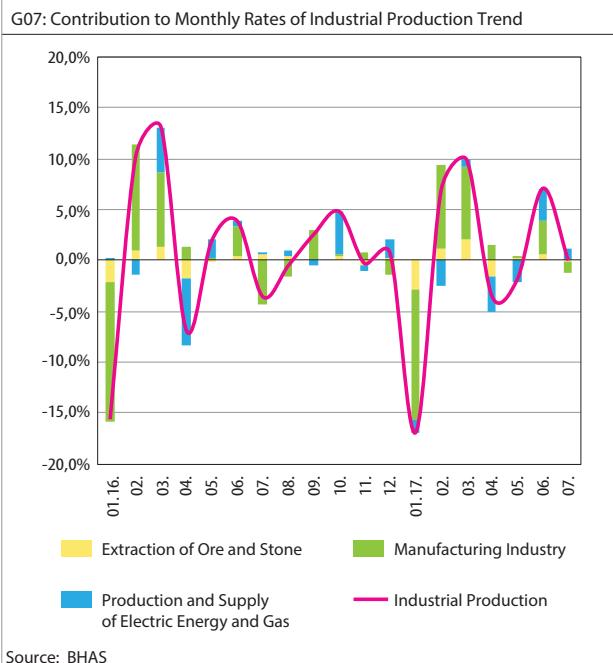

Source: Tables 10 and 11

Due to seasonal factors, an increased demand for domestic currency was present. So, the CBBH foreign exchange reserves recorded a monthly increase in the amount of KM 114.8 million, due to a positive balance of KM purchase and sale recorded with commercial banks and government depositors with the CBBH. Banks' deposits with monetary authorities recorded at the same time a stagnation compared to the previous month.

Seasonal demand for liquid assets, deposits in the local currency and cash outside banks almost entirely determined the money supply trend in July. The impact of quasi money components was almost negligible. Such impact of monetary aggregate M1 on the trend of the overall money supply is usually present during summer months, due to the vacation season.

In the end of July, the total deposits amounted to KM 18.6 billion, which was a growth of 10.3% at the annual level. The increase of the total deposits in July at the monthly level was brought about by the growth of deposits of non-financial companies. Household deposits, and also government deposits recorded a decrease in the observed period, by KM 3.2 million and by KM 13.4 million, respectively. The growth of deposits of companies amounted to KM 152.8 million in July at the monthly level.

In July of the current year, the industrial output remained the same at the monthly level, while a significant growth of industrial production (6.4%) was recorded at the annual level. In the period January -July 2017, compared to the same period of the previous year, the growth of the industrial output was recorded by 6.5%.

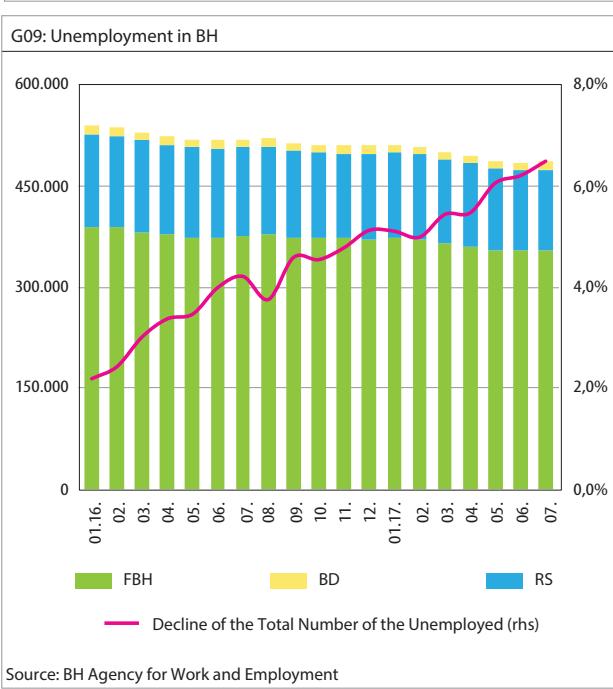

Observing the structure of the annual growth rate in July, a growth was recorded in the industrial areas of manufacturing industry (8.0%), mining (6.5%), and production and distribution of electric energy and gas (1.9%).

The monthly decline of the prices in July amounted to 0.4%, which was a continuation of the monthly downward trend of the prices which was present since the beginning of the second quarter of the current year. The annual inflation rate amounted to 0.9% and compared to the previous month, it was lower by 10 basis points.

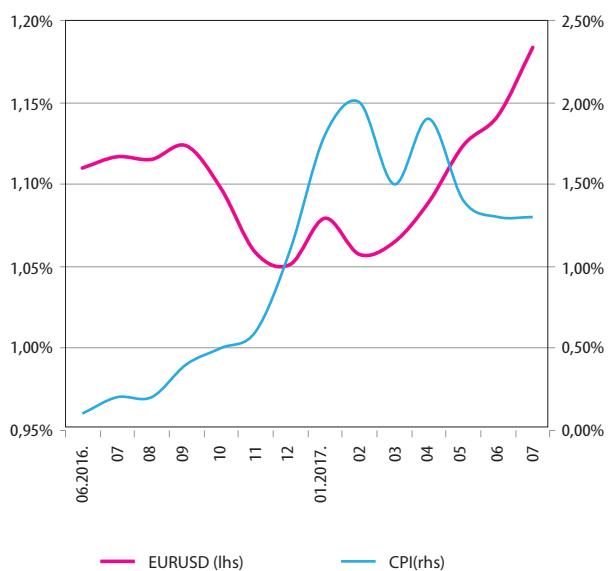

In July, the strongest impact on the monthly decline of the general price level came from the section of clothes and footwear (-6.9%), and food and non-alcohol beverages (-0.9%). At the same time, the most significant growth was recorded in the section of alcohol beverages and tobacco (1.5%).

Observed at the annual basis, the growth of the general price level was mainly determined by the growth of the prices in the sections related to alcohol beverages and tobacco (the annual growth rate of the prices was 6.4%), transport (the annual growth rate of the prices was 4.3%), and food and non-alcohol beverages (the annual growth rate of the prices was 0.6%).

At the annual level, in July, according to administrative data, the downward trend of the number of the unemployed in BH was continued which was particularly emphasised since the beginning of 2014 as a result of the increased employment, due to the growth of economic activities and the increased control of the working status of employees. The number of the unemployed decreased by 33,756 persons or 6.5%. At the monthly level, the number of the unemployed slightly increased by 421 persons.

Source: BHAS

In July 2017, the trend of euro appreciation against US dollar (EURUSD) was continued. The exchange rate appreciated for seven successive months, in July by 3.64%, and it reached the value of 1.18. The appreciation was a result of the expectations that the ECB could soon decrease the degree of the expansionariness of monetary policy, either through the growth of interest rates or through a decrease of the monthly purchase of foreign assets. The expectations were encouraged by a low and declining unemployment rate in the euro area (9.14 % in 07/2017) and also the continued growth of GDP of the euro area (Q2/2017/Q2/2016 = 0.6%). The inflation in the euro area for two successive months was at the level of 1.3%, in February it was 2%, but in long term it is expected to converge with the target inflation. It additionally stimulates the expectations regarding the change of the direction of the ECB monetary policy and it increases a demand for euro.

In July, a deficit in the amount of KM 554.7 million was recorded in foreign trade. Compared to the same month of the previous year, the trade deficit decreased by KM 13.7 million or 2.4%. The value of exported goods in July amounted to KM 970.9 million, so at the annual level, exports increased by one fourth (KM 196.7 million). On the other hand, the value of the total imports in July amounted to KM 1.52 billion, so imports increased by KM 183.0 million or 13.6% at the annual level. However, observing the trade deficit in the first seven months of 2017 compared to the same period of the previous year, the trade deficit deepened by KM 179.8 million or 4.7%. The trade deficit in the first seven months of 2017 amounted to KM 3.95 billion.

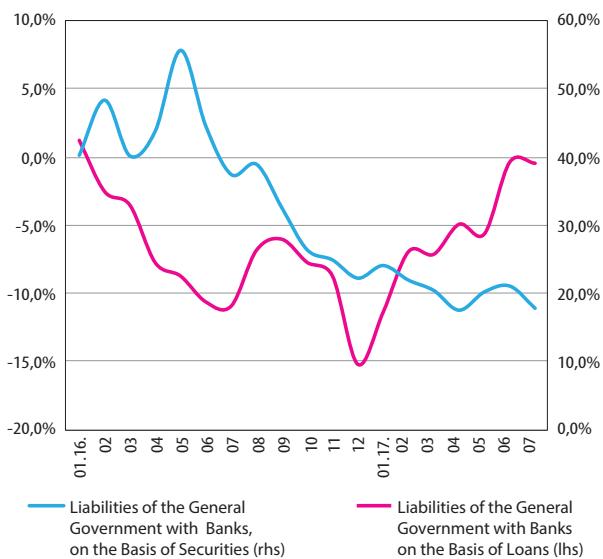

Observing the trade deficit by the main product groups, the most significant contribution to the trade deficit deepening in July was recorded in the exchange of the mineral origin products. The exports of this product group increased by one third, while imports increased by one fourth, however, the nominal growth of the imports exceeded the growth of the exports. A negative effect on the deficit growth came also from the other predominantly importing groups of products: means of transport, machines and appliances and electric devices and plastics. Predominantly exporting product groups continued to record a growth of exports, which had a positive reflection on the trade deficit.

G13: Deepening/Decrease of Trade Deficit by the Main Trade Partners

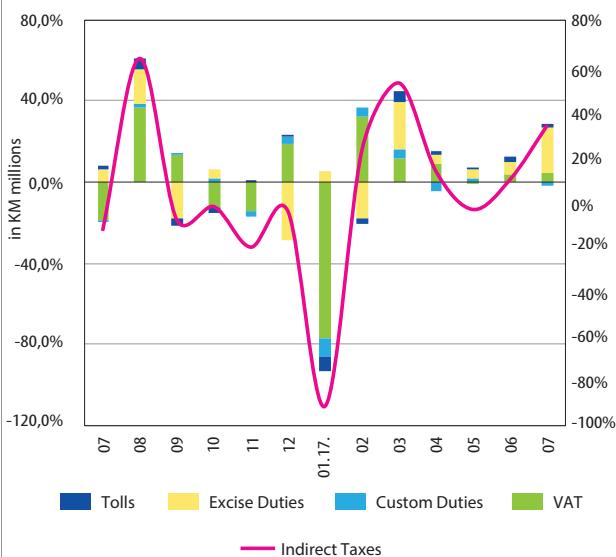

Source: CBBH

G14: Debt of the General Government with Commercial Banks, Annual Growth Rates

Source: CBBH

G15: Monthly Changes of Indirect Taxes

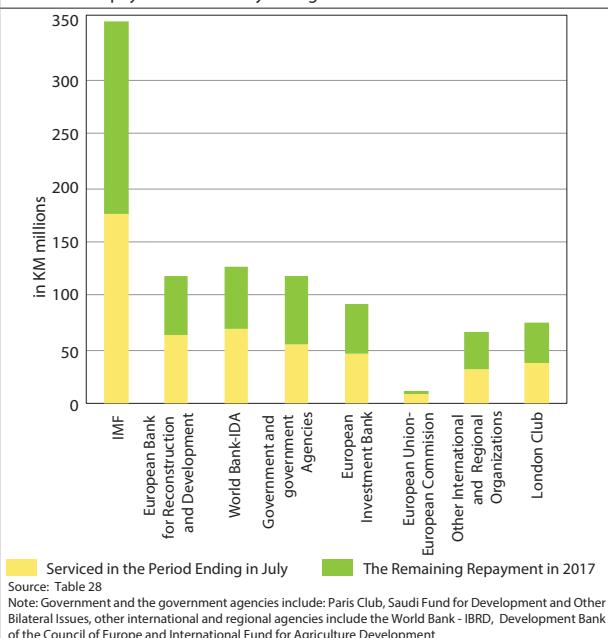

Source: ITA

Observing the trade deficit by the geographic distribution of imports and exports, the largest contribution to the decrease of trade deficit in July was recorded in the exchange with Croatia (KM 30.8 million). The exports to Croatia increased by one fourth, while at the same time the imports decreased by 4.6%. The trade deficit with Slovenia decreased by KM 16.3 million, due to a significantly higher growth of exports compared to the increase of the imports from that country. The largest contribution to the deepening of the trade deficit was recorded in the exchange with China, due to the constant import growth.

In July, a slight decrease of the liabilities on the basis of the issued securities of the general government at the monthly level was recorded, while a slight growth of loans was recorded in the previous two months. In the end of July, the total debt of the general government sector on the two mentioned bases amounted to KM 2.31 billion, which was a growth of KM 190.0 million or 8.9% at the annual level. The banking sector exposure to the general government sector was 8.5% of the total banking sector assets.

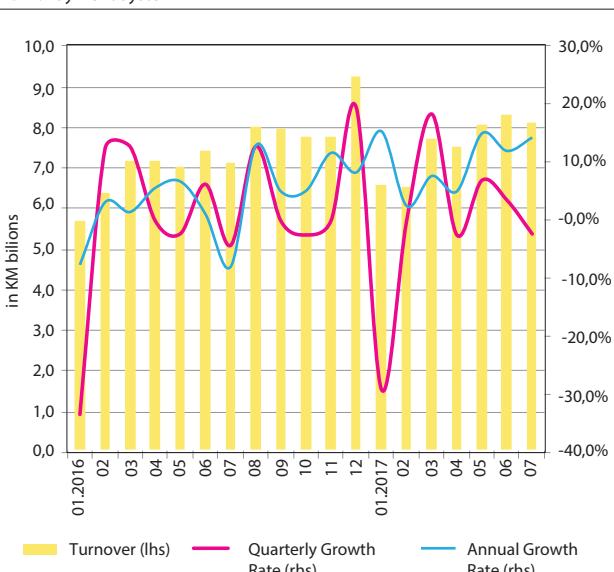

In July, there was a monthly growth of the revenues from indirect taxes, mainly as a result of the growth of excise duties which recorded an increase of KM 22.2 million. The customs themselves recorded a decrease in the amount of KM 1.7 million. The total collected revenues from indirect taxes and other revenues for the first seven months amounted to KM 3.90 billion and compared to the previous year they increased by 7.0%. At the same time, the amount of funds allocated for reimbursements amounted to KM 662.8 million with the annual increase of 19.6%.

G16: Debt Repayment in 2017 by Foreign Creditors

In the first seven months of the current year, the total of KM 484.7 million of public foreign debt was serviced, which was a half of the total amount planned to be serviced in 2017. The largest part of the repaid and planned amount for 2017 is related to the liabilities of BH towards the IMF. Significant repayments are also related to loans of development banks and similar institutions.

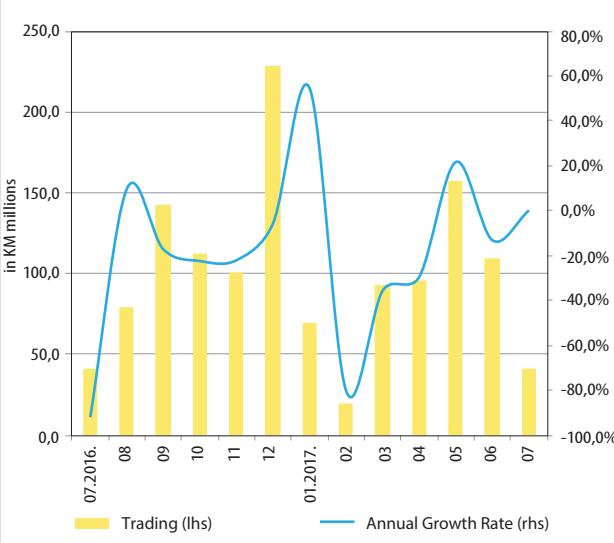

G17: Payment System

In July, in internal interbank payment system, the total turnover amounted to KM 8.07 billion in 3.45 million transactions. Compared to the previous month, the value of the turnover decreased by 2.46%, while at the annual level, the growth rate of the turnover remained high amounting to 14.21%. Such high growth rate was maintained mainly due to the growth of the turnover in RTGS (15.2%). There is still a very high degree of correspondence between the trends of the values of turnover in Giro Clearing and RTGS.

Source: CBBH

G18. Trading in Bosnia and Herzegovina Stock Exchanges

A very low level of trading was recorded in BH stock exchanges in July. The total of KM 40.97 million was traded, out of it, 69.2% of trading applied to BLSE. Compared to the same month of the previous year, the total trading in July was almost at the same level, and compared to the previous month, it was lower by 62.5%. At BLSE, 84% applied to the public offer of twelve month treasury bills, while at SASE, regular purchase of shares (90.4% of the total trading) was prevailing in the structure of trade in July.

Notes applicable for tables 4, 5, 7, 8, 9, 10, 11, 12, 13.

-The revised data for the period January 2006 – November 2015 are based on the active sub-balance of the banks with majority state owned capital from the Federation of BH, with the passive sub-balance excluded. Through such supplement of statistics, the users are provided with higher analytical usefulness of data and objective indicators on the current operations of banks in BH. Passive sub-balance includes the liabilities based on foreign loans and old foreign exchange savings of citizens until 31 March 1992 and it does not reflect the current operations of the bank, so this sub-balance in the privatization process will be taken over by the Ministry of Finance of FBH according to the Law on Initial Balance Sheets of Banks and the Law on Privatization, as it has been done for the previously privatized banks. The performed revision mainly influenced the decrease of loans to public companies in a foreign currency, decrease of foreign liabilities, decrease of other items of assets and liabilities on the basis of old foreign exchange savings, and in considerably lower amounts, on items of loans to the Entity Government, fixed assets, non-residents' deposits, shares and capital.

The data on the „complete“ balance sheet, with the included passive sub-balance, are still available at: http://statistics.cbbh.ba:4444/Panorama/novaview/SimpleLogin_bs.aspx

- In November 2014, two banks have realized the sale and transfer of part of the loan portfolio which resulted with increase in reserves with monetary authorities in the amount of 64 million KM and a decrease in the following items: claims of non-financial private enterprises 260 million KM, foreign liabilities 101 million KM and other items (net) 95 million KM. (napomena uz tabele T

-Due to the application of International Accounting Standards (IAS) and the International Financial Reporting Standards applied in BH Federation banks and the transfer of money flows in December 2011 data, the following changes have occurred at the assets side: decrease of loans by KM 155 million, an increase in other assets by KM 10 million, at the liabilities side: decrease of liabilities to non-residents in the amount of KM624 million, an increase in loan loss provisions by KM 472 million and other liabilities increased by KM 7 million.

- In February 2011, one bank from BH Federation reclassified deposits in the amount of around KM 80 million, from the deposits of public companies to the Entities' governments deposits, in line with the IMF recommendations.

- By order of the FBH Banking Agency, in June 2010, one bank made a reclassification of about KM 300 million of claims based on securities on domestic institutional sectors to the claims on non-residents. In December 2010, the same bank made this reclassification, retroactively, in the respective amounts for the period from August 2009 when the error occurred, until May 2010. The above reclassification was reflected in the increase in foreign assets and decrease in other items net.

- One bank from FBH made a reclassification of financial instruments in the foreign assets amounting to about KM 40 million for the period January - August 2010. Claims on non-residents based on loans were reclassified in claims on non-residents on the basis of securities, which resulted in changes in the short- term and long- term foreign assets.

- By order of the Banking Agency of Republika Srpska one bank made a reclassification of financial instruments on the liabilities side, for the period of September 2008 - November 2010, i.e.. the decrease in time and savings deposits of non-bank financial institutions and government sector, and the increase in loans from the same sectors, respectively, in the appropriate amounts, by months, ranging from 50 - 150 million KM.

- In accordance with new regulations of the RS Banking Agency, published in the Official Gazette of RS, no.136/10, which has regulated a new manner of recording receivables classified in category "E", accounting and bookkeeping of interest on non-performing assets and calculation of general and special provisions, RS banks , in the data for December 2010, implemented the mentioned regulations, by transferring these items from off-balance records into balance sheet. The correction was reflected on the assets side, as increase of loans in the amount of about KM 144 million, and increase of due interest in the amount of KM 36 million, and on the liabilities side, as increase in provisions for loan losses amounting to about KM 180 million within the capital account.

By order of the Banking Agency of Republika Srpska, one bank made a reclassification of financial instruments on the liabilities side, for the period of September 2008 - November 2010, i.e. decrease in time and savings deposits of non-bank financial institutions and government sector, and the increase in loans from the same sectors, respectively in the appropriate amounts, by months, ranging from KM 50 - 150 million.

According to new regulations of the RS Banking Agency, published in the Official Gazette of RS no.136/10, which have defined a new way of recording claims classified in category "E", accounting and recording of interest on non-performing assets and calculation of general and special provisions , RS banks, in the data for December 2010 implemented the mentioned regulations, by transferring these items from off-balance records into balance sheet. The correction was reflected on the assets side, as increase of loans in the amount of KM 144 million, and increase of due interest in the amount of KM 36 million, and on the liabilities side, as increase in provisions for loan losses amounting to KM 180 million within the capital account.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Notes:

Gross foreign reserves consist of balance sheet positions of short-term foreign assets of the CBBH (gold, CBBH SDR holdings, foreign exchange in the CBBH vault, transferable deposits in foreign currency with non-resident banks and other) and investment in securities according to the CBBH Investment Committee Decision from July 2006. Net foreign reserves represent a difference between gross foreign reserves and liabilities to non-residents. Monetary liabilities of the CBBH include money outside monetary authorities and deposits of residents with monetary authorities. Net foreign assets of CBBH represent a difference between net foreign exchange reserves and monetary liabilities of the CBBH.

Since 01 July 2017, the status change of the merger of subsidiary company UniCredit Leasing d.o.o. Sarajevo to the company Unicredit Bank d.d. Mostar has taken place. Accordingly, Unicredit Leasing d.o.o. Sarajevo has stopped existing as of 30 June 2017 and the data on the merged company are presented within the report on UniCredit Bank d.d. Mostar, starting from the report for July 2017.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Notes:

The currency outside monetary authorities is taken from the CBBH Balance Sheet and it consists of cash outside the central bank (monetary authorities). Deposits of commercial banks are commercial banks' funds in accounts at the CBBH. Transferable deposits of other domestic sectors with monetary authorities are deposits of other domestic sectors (except central government deposits). The central government consists of BH Institutions, Entity governments, Entity Social Security Funds and those of Brčko District. Social security funds on Entity level (from Federation of BH: Pension Fund, Health Care Fund of FBH, Employment Fund of FBH, and from Republika Srpska: Pension and Disability Insurance Fund of RS, Health Care Fund of RS, Employment Fund of RS and Fund for Child Protection of RS) are classified on the central government level.

Cash outside banks is taken over from the CBBH Balance Sheet (Table 6) and represents cash in circulation outside the central bank (monetary authorities) and cash outside commercial banks. Transferable deposits in the domestic currency are taken from the Monetary Survey (Table 5). They consist of deposits of non-central government (cantons and municipalities), deposits of public and private companies, other financial institutions and deposits of other domestic sectors (households, non-profit institutions and other unclassified sectors). Other deposits in the domestic currency, transferable and other deposits in foreign currency are taken over from the Monetary Survey (Table 5). They consist of deposits of non-central government (cantons and municipalities), deposits of public and private companies, other financial institutions and deposits of other domestic sectors (households, non-profit institutions and other unclassified sectors).

Reserve money (primary money or monetary base) is entirely taken from the CBBH Balance Sheet (Table 6). It consists of cash outside monetary authorities, deposits of commercial banks and deposits of other domestic sectors (except for deposits of the central government) with monetary authorities. According to national definition, money supply comprises all transferable and other deposits of domestic nonbank and nongovernment sectors, as well deposits of local government in domestic and foreign currency. Deposits of entity Social Security Funds are included into the central government on Entity level and by that they are excluded from money supply or monetary aggregates. Monetary aggregate M1 comprises cash outside banks and transferable deposits in domestic currency of all domestic sectors (except for deposits of the central government). Monetary aggregate QM is defined in the same way as the corresponding item in the Monetary Survey (Table 5). It consists of other deposits in domestic currency, transferable and other deposits in a foreign currency of all domestic sectors (except for deposits of the central government). Money supply M2 comprises monetary aggregates, M1 and QM.

Since 01 July 2017, the status change of the merger of subsidiary company UniCredit Leasing d.o.o. Sarajevo to the company Unicredit Bank d.d. Mostar has taken place. Accordingly, Unicredit Leasing d.o.o. Sarajevo has stopped existing as of 30 June 2017 and the data on the merged company are presented within the report on UniCredit Bank d.d. Mostar, starting from the report for July 2017.

Monetary data updated according to the MMF methodology (Monetary and Financial Statistics Manual, 2000), from January 2006

Notes:

The Monetary Survey presents the consolidated data from the Balance Sheet of CBBH - monetary authorities (Table 6) and the Consolidated Balance Sheet of Commercial Banks of Bosnia and Herzegovina (Table 7). Foreign assets (net) represent the difference between total foreign assets of the CBBH - monetary authorities and commercial banks of BH and total foreign liabilities of the CBBH - monetary authorities and commercial banks of BH. Domestic loans represent commercial banks' claims on all domestic sectors, but it should be noted that claims on central government are presented in net amounts, i.e. they are reduced by the deposits of central government with the CBBH and with BH commercial banks. The central government consists of BH Institutions, Entity governments, Entity Social Security Funds and those of Brčko District. According to new methodology, Social Security Funds are classified on the central government level as Entities' off-budget funds, which has a direct impact on the data about net claims on the central government in Monetary Survey.

Since 01 July 2017, the status change of the merger of subsidiary company UniCredit Leasing d.o.o. Sarajevo to the company Unicredit Bank d.d. Mostar has taken place. Accordingly, Unicredit Leasing d.o.o. Sarajevo has stopped existing as of 30 June 2017 and the data on the merged company are presented within the report on UniCredit Bank d.d. Mostar, starting from the report for July 2017.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Notes:

Money M1 comprises currency outside banks, transferable deposits in the domestic currency of all domestic sectors (except for deposits of central government). Quasi money QM comprises other deposits in the domestic currency, transferable and other deposits in foreign currency of all domestic sectors (except for deposits of the central government). Money supply M2 comprises monetary aggregates, money M1 and quasi money QM. Other liabilities include securities, loans, shares and other equity and other items (net). According to a new methodology, loans are presented as separate financial instruments on the side of liabilities (with which the calculated interest is added), and also shares and other equity. Other items (net) are unallocated items of liabilities reduced by the unallocated items of assets. Other items (net) also comprise restricted deposits, counter-items of funds and government lending funds.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Notes:

The CBBH (monetary authorities) foreign assets comprise gold, foreign currency in CBBH vault, foreign currency deposits with foreign banks, SDR holdings, foreign securities and other. Claims on domestic sectors consist of claims on employees of CBBH for the long-term loans and claims on commercial banks on the basis of settlement accounts. Reserve money (primary money or monetary base) is comprised of cash outside monetary authorities, deposits of commercial banks and deposits of other domestic sectors (except for the central government) with monetary authorities. Cash outside banks represents cash in circulation outside the central bank (monetary authorities) and cash outside commercial banks. The CBBH foreign liabilities are comprised of short-term liabilities towards non-residents, deposits of non-residents and other short-term liabilities towards non-residents and liabilities towards the IMF (Account 1 and 2). Deposits of central government with CBBH are transferable and other deposits of BH Institutions, Entity governments, Entity social security funds and those of Brčko District in domestic currency. Shares and other equity are comprised of equity, current year result, general and special reserves and revaluation/adjustment. Other items (net) are unallocated items of liabilities reduced by the unallocated items of assets.

Since 01 July 2017, the status change of the merger of subsidiary company UniCredit Leasing d.o.o. Sarajevo to the company Unicredit Bank d.d. Mostar has taken place. Accordingly, Unicredit Leasing d.o.o. Sarajevo has stopped existing as of 30 June 2017 and the data on the merged company are presented within the report on UniCredit Bank d.d. Mostar, starting from the report for July 2017.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Notes:

Consolidated balance sheet of commercial banks includes consolidated balance sheets of commercial banks covered by Main Unit Sarajevo, Main Unit Mostar, Main Bank RS, Brčko District (from July 2001 until November 2002), NBRB (until December 1998) and the NBBH (until November 2002). Mutual claims and liabilities among the commercial banks have been consolidated. Banks' reserves consist of cash in the banks' vaults and banks' deposits with the Central Bank of Bosnia and Herzegovina. Foreign assets of commercial banks include: foreign currency in the vaults, transferable and other deposits with non-residents in foreign currency, loans to non-residents, securities of non-residents in foreign currency, and other claims on non-residents.

Claims on general government include claims on all levels of government: the central government (BH Institutions, Entity governments, Entity social security funds and Brčko District) and non-central governments (canton and municipality governments). Claims on other domestic sectors include claims on public non-financial enterprises, private non-financial enterprises, other financial institutions and claims on other domestic sectors (households, non-profit institutions and other unclassified sectors). Balance sheets of commercial banks of Federation of BH in addition to active sub-balance sheets include data from passive sub-balance sheets as well. Passive sub-balance sheets include liabilities arising from foreign loans and frozen foreign currency deposits of citizens, which occurred until 31 March 1992. These liabilities will be taken over, in the process of privatisation, by Ministry of Finance of Federation of BH in accordance with the entity Law on Opening Balance Sheets of Enterprises and Banks and Law on Privatisation.

Since 01 July 2017, the status change of the merger of subsidiary company UniCredit Leasing d.o.o. Sarajevo to the company Unicredit Bank d.d. Mostar has taken place. Accordingly, Unicredit Leasing d.o.o. Sarajevo has stopped existing as of 30 June 2017 and the data on the merged company are presented within the report on UniCredit Bank d.d. Mostar, starting from the report for July 2017.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Notes:

Notes: Central government deposits include transferable and other deposits in domestic and foreign currency of BH Institutions, Entity governments, Entity social security funds and those of Brčko District. Transferable and other deposits of other domestic sectors in domestic and foreign currency represent banks liabilities towards non-central government (canton and municipality governments), public non-financial enterprises, private non-financial enterprises, other financial institutions and other domestic sectors (households, non-profit institutions and other unclassified sectors). Foreign liabilities of commercial banks include banks liabilities to non-residents based on transferable and other deposits, loans, securities, trade loans and advance payments and other accounts payable. According to a new methodology, loans are presented as a separate financial instrument on the side of liabilities, with which the calculated interest is added.

Shares and other equity include equity, retained earnings, current year result, general and special reserves and adjustment /revaluation. Other items (net) are unallocated items of liabilities reduced by the unallocated items of assets. Restricted deposits are also included in other items (net).

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Notes:

By order of FBA in March 2010, loans to households with currency clause with one bank were reclassified, from loans in EUR to loans in KM.

From September 2004, change in structure of loans by currency is result of implementation of recommendations of IMF Mission for monetary and financial statistics in BH from May 2004. According to that, all loans in KM which include currency clause (indexed to euro), should be classified as loans in KM (domestic currency).

Data on structure of deposits and loans by currency in Republika Srpska until September 1999 are not available, so for this period the total amount of deposits and loans in RS is included in the column Total.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Notes:

Deposits of domestic institutional sectors represent liabilities of commercial banks towards all institutional sectors. Deposits on the BH level represent deposits with commercial banks covered by Main Unit Sarajevo, Main Unit Mostar, Main Bank RS, Brčko Branch (from July 2001 until November 2002), deposits with NBRs (until December 1998), deposits with NBBH (until November 2002) and deposits with the Payment Bureaus Sarajevo and Mostar (until November 1999). Sight deposits represent liabilities of commercial banks related to transaction accounts and sight deposits in domestic and foreign currency.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Notes:

Loans to domestic institutional sectors represent claims of commercial banks on all institutional sectors. Loans at the BH level include loans extended by commercial banks covered by Main Unit Sarajevo, Main Unit Mostar, Main Bank RS, Brčko Branch (from July 2001 until November 2002), loans with NBRS (until December 1998) and NBBH (until November 2002). The total of claims on all levels of government and funds (short-term and long-term) are shown in Table of short-term loans (columns 3,4,5,6,7) in total amount, because source data do not provide a maturity structure of claims for governments and funds. Short – terms loans represent claims of commercial banks on all domestic institutional sectors up to one year, in domestic and foreign currency. Claims on BH Institutions have been reclassified since April 2010.

Notes:

Since 01 July 2017, the status change of the merger of subsidiary company UniCredit Leasing d.o.o. Sarajevo to the company Unicredit Bank d.d. Mostar has taken place. Accordingly, Unicredit Leasing d.o.o. Sarajevo has stopped existing as of 30 June 2017 and the data on the merged company are presented within the report on UniCredit Bank d.d. Mostar, starting from the report for July 2017.

* Interest rates in table for revolving loans and credit cards and their amounts refer to the outstanding amounts.

IRF – initial rate fixation

... insufficient data to be published

The interest rate on the revolving loans and credit cards, includes data on credit cards with loan facility. Considering that credit cards with loan facility imply an interest free deferred payment (0% ir), they are not published.

No data for interest rates on loans in foreign currency based on credit cards and overdrafts to households.

Notes:

From 1 July 2016, the required reserves rate applied by the CBBH to the base for calculation of required reserves is 10%. From 1 July 2016, the CBBH applies the new rates for the calculation of fees to the funds in the banks' reserves accounts : in the accounting period, the Central Bank does not charge a fee on the amount of required reserves in commercial banks' reserves accounts, and on the amount of excess reserves, the CBBH charges the fee at the rate equal to 50% of the rate applied to commercial banks' deposits (deposit facility rate) by the European Central Bank.

Since 01 May 2015, the Central Bank has calculated the compensation for a bank on the amount of the bank's funds in the reserve account with the Central Bank in the calculation period, as it follows:

- on the reserve requirement amount – the average of EONIA recorded in the same period on the market reduced by 10 basis points, or minimum zero,
- on the amount of the funds exceeding the reserve requirement – zero rate of compensation.

The zero rate of compensation on the reserve requirement is applied in case the average EONIA decreased by 10 basis points has a negative value.

From 1 September 2014, the remuneration rate has been calculated on the basis of the weighted average interest rate which was earned by the Central Bank of BH on the market in the same period on deposits invested up to a month ; and 70% is calculated on the amount of required reserve or minimum 0, while 90% of the mentioned rate is calculated on the amount of excess reserves or minimum 0.

From February 1st, 2011 the required reserves rate on deposits and borrowed assets with contracted term of maturity up to one year was declined from 14% to 10%,while the required reserves rate on deposits and borrowed assets with contracted term of maturity over one year is not changed. From August 1st 2011. the remuneration rate is calculated by the weighted average interest rate which were earned by the Central Bank on deposits invested up to a month in the same period; 70% of this rate is calculated on the amount of required reserves while 90% of the same rate is calculated on the amount of excess reserves.

From July 1st, 2010 remuneration rate on the amount of required reserves is changed and calculated as an average of interest rates, which were earned by the Central bank on overnight deposits in the same period,while remuneration rate on the amount of excess reserves is not changed.

From January 1st, 2009 the required reserves rate is 14% on deposits and borrowed assets with contracted term of maturity up to one year and 10% on deposits and borrowed assets with contracted term of maturity over one year.From April 1st, 2009 remuneration rate is calculated as:- On the amount of required reserves is 0,5%;- On the amount of excess reserves on the rate calculated as an average of interest rates, which were earned by the Central bank on deposits invested up to u month. From May 1st, 2009 the required reserves rate is 7% on deposits and borrowed assets with contracted term of maturity over one year.

From January 1st, 2008 required reserves rate was increased from 15% to 18%. From October 11th, 2008 required reserves rate was declined from 18% to 14%.

*The base for calculation of required reserves includes deposits and borrowed funds in domestic and other currency expressed in KM.

Notes:

Consumer Price Index with temporary reductions of prices is a type of Consumer Price Index, in calculation of which, we take in account the reductions in prices of certain goods and services, in accordance with the EU Regulation, No 2602/2000.

Notes:

The share of BH exports to the country in total BH exports for 2010 was used as a criterion for presenting the country of exports. Thus, all countries with higher share of exports than 4% of the total BH exports for 2010 are separately presented, while the other countries are presented in the column "Other Countries".

Until February 12, 2007, the data on exports to Serbia and Montenegro were presented as exports to Serbia, but since then Serbia and Montenegro have been presented separately.

Notes:

The share of BH imports from the country in total BH imports for 2010 was used as a criterion for presenting the country of imports. Thus, all countries with higher share of imports than 3% of total BH imports for 2010 are separately presented, while the other countries are presented in the column "Other Countries".

Until February 12, 2007, the data on imports from Serbia included imports from Montenegro as well, while since then imports from Montenegro has been included in the column "Other Countries".
