SUMMARY

In the first eight months, net revenues from indirect taxes increased at the annual level resulting from VAT growth rate and its collection (Graph 1). Continuing positive trends in the VAT collection reflected the growth of domestic spending and the growth of VAT on imports (Graph 2). In August, there was a slow decline of both debts and the level of deposits of the general government sector with commercial banks (Graph 3). On the other hand, the companies' deposits growth trend was continued in August, mainly impacted by the growth of deposits of non-financial companies (Graph 4). Due to the continuing growth of foreign assets and decline of foreign liabilities, net foreign assets of commercial banks reached its historical highest value (Graph 5). Regarding commercial banks' lending, a low credit growth at the monthly level in the sectors of households, Entity governments and non-financial public companies could not compensate the decline of lending to other sectors, so the total loans did not increase at all compared to the previous month (Graph 6). A strong monthly growth of foreign exchange reserves was mainly impacted by special allocation of SDRs, while the coverage of currency board for August amounted to 105.62% (Graph 7). The largest contribution to the monthly growth of reserve money came from the increase of banks' deposits with monetary authorities (Graph 8). In the end of August, required reserve and excess reserves increased significantly, while the CBBH kept the required reserve rate unchanged (Graph 9). During the last three months, a downward trend of yields on the euro area countries' bonds was again observed (Graph 10). Energy prices in the current year had record values, the reasons for such high prices being both in supply and in demand (Graph 11). Significant inflation was recorded in the reporting month (Graph 12), resulting from the base effect from the previous year, but also due to difficulties in supply chains, and increased demand after the period marked by restricted movement of citizens. Besides transport prices, the prices of food and beverages increased considerably, while on the other hand, a continuing downward trend of prices was recorded in the category of clothes and footwear (13). With the administrative unemployment rate still significantly higher compared to the neighbouring countries, the record low number of the unemployed was registered in August (Graph 14). In the period of the first eight months, compared to the same period of the previous year, a strong growth of industrial production was recorded, which impacted the values of exports exceeding the pre-pandemic level (Graphs 15 and 16). Due to the growth of industrial production, and final consumption, of households primarily, the import upward trend continued in August (Graph 17). Nominal effective exchange rate of KM (NEER), at the monthly level, depreciated, while appreciation was recorded at the annual level (Graph 18).

G01: Monthly Changes of Indirect Taxes

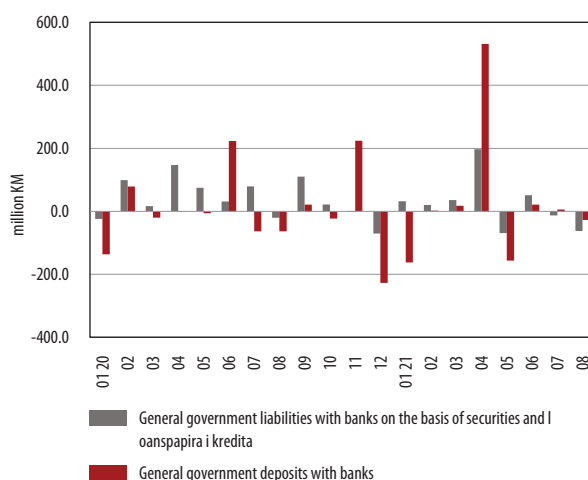

Source: Indirect Taxation Authority

During the first eight months, cumulative net revenues from indirect taxes amounted to KM 4.42 billion, which is 14.2% growth at the annual level. The mentioned high growth of collection resulted mainly from high growth rates of VAT. Compared to the same period of the record year 2019, net revenues from indirect taxes increased by 3.4%. At the monthly level, a growth of net revenues was recorded in August (5.6%), with significant amounts of reimbursements, reaching KM 116.7 million in the same month. Preliminary data for September indicate a further recovery of revenues, particularly revenues from VAT, which exceeded the pre-crisis amounts of collection.

G02: Revenues from VAT

Source: Indirect Taxation Authority

During the first eight months, the net amount of KM 2.81 billion was collected on the basis of VAT, which is higher by even KM 406 million (16.9%) compared to the same period of the previous year. Continuing positive trends in the VAT collection reflected the growth of domestic spending and the growth of VAT on imports. The growth of VAT on imports was slightly lower despite very high import growth rates. The amounts of reimbursements based on VAT remained significant following the export growth trend.

G03: Liabilities and Deposits of the General Government with Commercial Banks, Monthly Changes

Source: CBBH

In the end of August, the total liabilities of the general government sector with commercial banks amounted to KM 3.20 billion, which is an annual growth of KM 251.4 million or 8.5%. In August, there was a slow decline of both debts and the level of deposits of the general government sector with commercial banks, compared to the previous month. The banking sector exposure to the general government sector in the end of August was 9.0% of the total banking sector assets.

G04: Monthly Deposit Growth Rate

Source: CBBH

In August, the growth of bank deposits was recorded in the sixteenth consecutive month. Compared to their lowest level in the last two years (April 2020), the total deposits were higher by 16.0%, household deposits by 10.5% and deposits of non-financial private companies by 46.5%. The upward trend of companies' deposits was continued in August, as well as one year trend of decline of the monthly growth of household deposits. Regarding other sector deposits, the most significant was the growth of municipal authorities' deposits, continuing for the eighth consecutive month. At the annual level, the total deposits in August were higher by 12.0%, the annual growth rate of deposits of non-financial private companies being 28.0%, and that of households being 9.0%.

G05: Foreign Liabilities

Source: CBBH

Trends of net foreign assets and its components continued in the reporting period. Due to the continuing growth of foreign assets and decline of foreign liabilities, net foreign assets reached its historical highest value. The positions of foreign assets and foreign liabilities in the end of August were KM 5.07 billion and KM 1.88 billion respectively. Decline of foreign liabilities was brought about by a decrease of other deposits by 7.1% (8/2021/7/2020), while the other balance sheet positions of foreign liabilities did not significantly change.

G06: Monthly Credit Growth in BH Banks

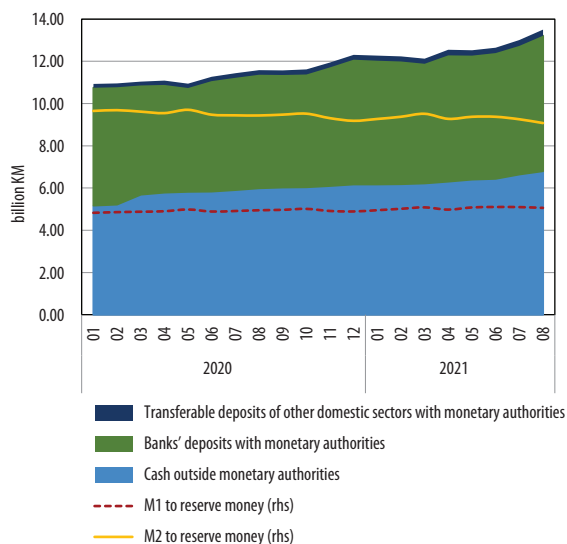

Source: CBBH

For the second successive month, loans to non-financial private companies did not contribute to credit growth. The credit growth at the monthly level in the sectors of households, Entity governments and non-financial public companies could not compensate the decline of lending to other sectors, so the total loans in August did not increase at all compared to the previous month (0.05%). This was the second month that the monthly growth of the total loans was converging to zero, which is a form of credit stagnation, although positive and high sector credit growth rates exist at the annual level.

G07: The CBBH Foreign Exchange Reserves

Source: CBBH

Compared to the previous month, during August 2021, the foreign exchange reserves increased by KM 911 million, so in the end of August, the foreign exchange reserves amounted to KM 15.49 billion. The monthly growth of the foreign exchange reserves was mainly impacted by special allocation of SDRs in August amounting to KM 602.54 million. The foreign debt repayment in August accounted for KM 65.90 million. Currency board coverage in August was 105.62%.

G08: Reserve Money and Monetary Multiplication

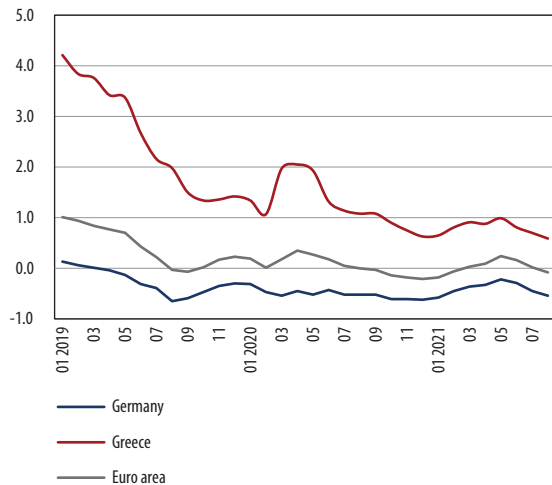

Source: CBBH

Reserve money in August recorded a monthly growth of KM 502.7 million. The largest contribution to this growth came from the increase of banks' deposits with monetary authorities (KM 334.99 million). Compared to the same period of the previous year, reserve money was higher by 16.64% amounting to KM 13.50 billion in the end of August. The upward trend of monetary aggregate M2 was present in August, mainly under the impact of growth of monetary aggregate M1 (due to the growth of transferable deposits in the local currency). Taking into account the trends of money supply components and reserve money, monetary multiplier M2 in the end of the reporting period, slightly decreased.

G09: Reserve Account and Implicit Rate

Source: CBBH

Compared to the end of July 2021, the required reserve base increased by KM 256.13 million, while excess reserves in the end of August reached KM 3.29 billion. In the end of May, required reserves amounted to KM 2.90 billion, which is an 8.6% growth compared to the same period of the previous year. Such growth of both the base and excess reserves indicate that the system is stable. Implicit rate compared to July 2021 increased to amount to 21.34% in August. After the introduction of remuneration on foreign currency base, applied from 01 June 2021, system decrease of the base in other currencies was not observed. Base in KM was increasing mainly under the impact of the growth of the Entity government deposits in accounts with commercial banks. The CBBH kept the required reserve rate unchanged.

G10: Yields on Ten Year Bonds

Source: Eurostat

Following the growth of yields on the euro area countries' bonds in May, the downward trend of yields on the euro area countries' bonds was again observed over the last three months. The pandemic bond purchase programme significantly decreased the yields on bonds even in the countries with high public debt levels, and decreased also the difference compared to the first class bonds. Despite monthly decline (8/2021 - 7/2021.) by 5 basis points on the average, yields in August were still higher on the average by 20 basis points compared to December last year.

G11: Trends of Prices of Oil, Coal and Natural Gas ,2019=100

Source: www.indexmundi.com, www.tradingeconomics.com

The prices of natural gas and coal in the current year reached the record values, amounting to \$13.16 and \$172, respectively in August, which, compared to the average in 2019, was a growth of more than 300%, i.e. 220%. The reasons of such high energy prices were in supply and also in demand. Due to global economic recovery, considerable quantities of natural gas from Russia were directed to the Far East countries, while South America countries purchased significant quantities of American liquefied gas. The additional incentive for the growth of gas prices came from the uncertainty related to the putting in operation of the Nord Stream 2 gas pipeline. On the other hand, a long winter and growth of industrial production resulted in the storages of natural gas in Europe, particularly Germany, being at the historically low levels for this period of the year.

G12: Trend of Average Consumer Prices in August, 2015=100

Source: BHAS; EUROSTAT

Significant inflation was recorded in August, resulting from the base effect from the previous year, but also due to difficulties in supply chains, and increased demand after the period marked by restricted movement of citizens. Inflationary pressure on the general price level came particularly from the categories of transport, food and beverages, and utility costs having the largest shares in the structure of the total consumer basket. At the end of August, the inflation in the EU amounted to 3.2%, while at the same time, the growth of prices in the USA was 5.3%. Observing the trend of average prices by years, it is visible that domestic prices recorded the smallest deviations from the base year.

G13: Annual Change of Consumer Prices by Categories, in the First Eight Months

Source: BHAS

An accelerated growth of consumer prices at the annual level was recorded in August, due to a strong growth of transport prices, primarily as a result of the low base from the previous year. Besides transport prices, the prices of food and beverages increased considerably, while on the other hand, a continuing downward trend of prices was recorded in the category of clothes and footwear. Observing the period of the first eight months, low inflation was recorded of 0.6% compared to the same period of the previous year.

G14: The Number of the Unemployed in August

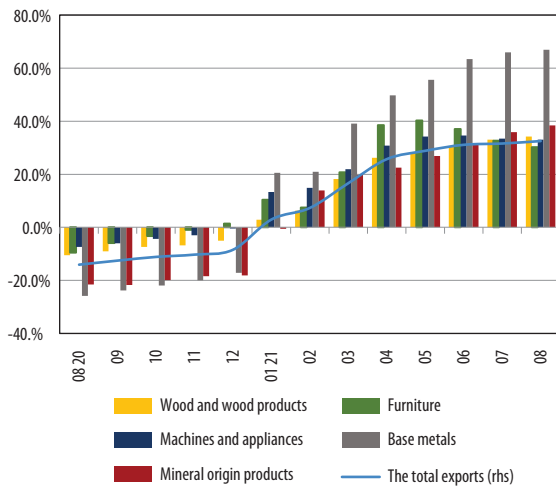

Source: BHAS, EUROSTAT

In August, the record low number of the unemployed was registered, the administrative unemployment rate staying significantly higher than in the neighbouring countries. According to the latest data, the administrative unemployment rate amounted to 32.5%, while the unemployment rate based on survey, which is quite different from the administrative rate due to a different approach and recording of active persons particularly, amounted to 18.1% at the end of the second quarter. In the end of August, unemployment in the EU was 6.8%, which was higher by only 20 percentage points compared to the pre-pandemic level.

G15: Annual Change of Industrial Production, in the First Eight Months

Source: BHAS

After the strongest decline of industrial production recorded in the previous year due to corona crisis, the record growth of production was recorded in the current year. In the period of the first eight months, compared to the same period of the previous year, a strong growth of industrial production was recorded, mainly determined by the growth of manufacturing industry (14.2%), and production and supply of electric energy and gas (14.4%). The industrial production growth of 2.1% was also recorded compared to the same period of 2019, indicating a relative recovery of this sector after a strong pandemic shock.

G16: Exports by the Main Product Groups(Cumulative), Annual Changes

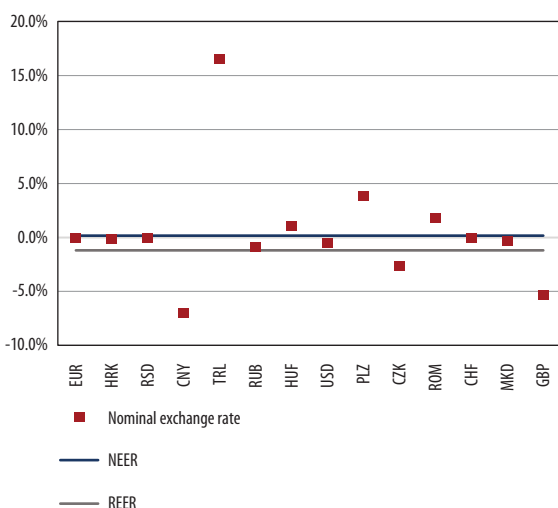

Source: BHAS

The value of exports in the first eight months of 2021 amounted to KM 8.75 billion, and compared to the same period of the previous year, exports were higher by 32.54%. Industrial production growth in the countries which are the main trade partners, and also the growth of prices of stock exchange goods influenced the value of exports exceeding the pre-pandemic level. In August, at the monthly level, exports declined by 7.96%. In the first eight months of 2021, all the main export groups of products recorded a growth at the annual level. The exports of base metals increased by 66.93%, those of mineral origin products by 38.44%, those of machines and appliances by 33.03%, and those of furniture by 30.16%.

G17: Imports by the Main Product Groups(Cumulative), Annual Changes

Source: BHAS

Due to the growth of industrial production, and final consumption, of households primarily, the import upward trend continued in August, at the annual level. The value of imports in the first eight months of 2021 amounted to KM 13.29 billion, and compared to the same period of the previous year, they were higher by 22.62%. High values of imports mainly resulted from low base values and the growth of prices of stock exchange goods, the quantity effect not to be neglected also. The value of imports in August compared to the previous month declined by 8.54%. In the first eight months, all the main groups of products recorded a growth at the annual level. The value of imports of base metals at the annual level increased by 55.90%, those of mineral origin products by 34.47%, means of transport by 23.11%, and those of machines and appliances by 19.67%.

G18: Annual Changes of Foreign Exchange Rate

Source: CBBH

Nominal effective exchange rate of KM (NEER) in August, at the monthly level, depreciated by 22 bp, while appreciation of 17 bp was present at the annual level. Such change of NEER was brought about by the nominal change of KM against the currencies of developing countries, resulting from the trend of EUR (our peg currency). The nominal exchange rate of KM in August, at the annual level, recorded the highest appreciation in relation to Turkish lira by 16.52% and Polish zloty by 3.81%, while a strong depreciation was recorded in relation to Chinese yuan by 7.03% and British pound by 5.31%. Real effective exchange rate of KM (REER) in August, at the annual level, depreciated by 1.19%.

Note: Brief notes on methodology can be found below each table, while more detailed ones are available at www.cbbh.ba

Notes applicable for tables 4. 5. 7. 8. 9. 10. 11. 12. 13.

Since 01 July 2017, the status change of the merger of subsidiary company UniCredit Leasing d.o.o. Sarajevo to the company Unicredit Bank d.d. Mostar has taken place. Accordingly, Unicredit Leasing d.o.o. Sarajevo has stopped existing as of 30 June 2017 and the data on the merged company are presented within the report on UniCredit Bank d.d. Mostar, starting from the report for July 2017.

The revised data for the period January 2006 – November 2015 are based on the active sub-balance of the banks with majority state owned capital from the Federation of BH, with the passive sub-balance excluded. Through such supplement of statistics, the users are provided with higher analytical usefulness of data and objective indicators on the current operations of banks in BH. Passive sub-balance includes the liabilities based on foreign loans and old foreign exchange savings of citizens until 31 March 1992 and it does not reflect the current operations of the bank, so this sub-balance in the privatization process will be taken over by the Ministry of Finance of FBH according to the Law on Initial Balance Sheets of Banks and the Law on Privatization, as it has been done for the previously privatized banks. The performed revision mainly influenced the decrease of loans to public companies in a foreign currency, decrease of foreign liabilities, decrease of other items of assets and liabilities on the basis of old foreign exchange savings, and in considerably lower amounts, on items of loans to the Entity Government, fixed assets, non-residents' deposits, shares and capital.

The data on the „complete“ balance sheet, with the included passive sub-balance, are still available at: http://statistics.cbbh.ba:4444/Panorama/novaview/SimpleLogin_bs.aspx

In November 2014, two banks have realized the sale and transfer of part of the loan portfolio which resulted with increase in reserves with monetary authorities in the amount of 64 million KM and a decrease in the following items: claims of non-financial private enterprises 260 million KM, foreign liabilities 101 million KM and other items (net) 95 million KM.

Due to the application of International Accounting Standards (IAS) and the International Financial Reporting Standards applied in BH Federation banks and the transfer of money flows in December 2011 data, the following changes have occurred at the assets side: decrease of loans by KM 155 million, an increase in other assets by KM 10 million, at the liabilities side: decrease of liabilities to non-residents in the amount of KM 624 million, an increase in loan loss provisions by KM 472 million and other liabilities increased by KM 7 million.

In February 2011, one bank from BH Federation reclassified deposits in the amount of around KM 80 million, from the deposits of public companies to the Entities' governments deposits, in line with the IMF recommendations.

By order of the FBH Banking Agency in June 2010, one bank made a reclassification of about KM 300 million of claims based on securities on domestic institutional sectors to the claims on non-residents. In December 2010, the same bank made this reclassification, retroactively, in the respective amounts for the period from August 2009 when the error occurred, until May 2010. The above reclassification was reflected in the increase in foreign assets and decrease in other items net.

One bank from FBH made a reclassification of financial instruments in the foreign assets amounting to about KM 40 million for the period January - August 2010. Claims on non-residents based on loans were reclassified in claims on non-residents on the basis of securities which resulted in changes in the short- term and long- term foreign assets.

By order of the Banking Agency of Republika Srpska one bank made a reclassification of financial instruments on the liabilities side, for the period of September 2008 - November 2010, i.e., the decrease in time and savings deposits of non-bank financial institutions and government sector, and the increase in loans from the same sectors, respectively, in the appropriate amounts, by months, ranging from 50 - 150 million KM.

In accordance with new regulations of the RS Banking Agency, published in the Official Gazette of RS, no.136/10, which has regulated a new manner of recording receivables classified in category "E", accounting and bookkeeping of interest on non-performing assets and calculation of general and special provisions, RS banks, in the data for December 2010, implemented the mentioned regulations, by transferring these items from off-balance records into balance sheet. The correction was reflected on the assets side, as increase of loans in the amount of about KM 144 million, and increase of due interest in the amount of KM 36 million, and on the liabilities side, as increase in provisions for loan losses amounting to about KM 180 million within the capital account.

Notes:

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Gross foreign reserves consist of balance sheet positions of short-term foreign assets of the CBBH (gold, CBBH SDR holdings, foreign exchange in the CBBH vault, transferable deposits in foreign currency with non-resident banks and other) and investment in securities according to the CBBH Investment Committee Decision from July 2006. Net foreign reserves represent a difference between gross foreign reserves and liabilities to non-residents. Monetary liabilities of the CBBH include money outside monetary authorities and deposits of residents with monetary authorities. Net foreign assets of CBBH represent a difference between net foreign exchange reserves and monetary liabilities of the CBBH.

Notes:

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

The currency outside monetary authorities is taken from the CBBH Balance Sheet and it consists of cash outside the central bank (monetary authorities). Deposits of commercial banks are commercial banks' funds in accounts at the CBBH. Transferable deposits of other domestic sectors with monetary authorities are deposits of other domestic sectors (except central government deposits). The central government consists of BH Institutions, Entity governments, Entity Social Security Funds and those of Brčko District. Social security funds on Entity level (from Federation of BH: Pension Fund, Health Care Fund of FBH, Employment Fund of FBH, and from Republika Srpska: Pension and Disability Insurance Fund of RS, Health Care Fund of RS, Employment Fund of RS and Fund for Child Protection of RS) are classified on the central government level.

Cash outside banks is taken over from the CBBH Balance Sheet (Table 6) and represents cash in circulation outside the central bank (monetary authorities) and cash outside commercial banks. Transferable deposits in the domestic currency are taken from the Monetary Survey (Table 5). They consist of deposits of non-central government (cantons and municipalities), deposits of public and private companies, other financial institutions and deposits of other domestic sectors (households, non-profit institutions and other unclassified sectors). Other deposits in the domestic currency, transferable and other deposits in foreign currency are taken over from the Monetary Survey (Table 5). They consist of deposits of non-central government (cantons and municipalities), deposits of public and private companies, other financial institutions and deposits of other domestic sectors (households, non-profit institutions and other unclassified sectors).

Reserve money (primary money or monetary base) is entirely taken from the CBBH Balance Sheet (Table 6). It consists of cash outside monetary authorities, deposits of commercial banks and deposits of other domestic sectors (except for deposits of the central government) with monetary authorities. According to national definition, money supply comprises all transferable and other deposits of domestic nonbank and nongovernment sectors, as well deposits of local government in domestic and foreign currency. Deposits of entity Social Security Funds are included into the central government on Entity level and by that they are excluded from money supply or monetary aggregates. Monetary aggregate M1 comprises cash outside banks and transferable deposits in domestic currency of all domestic sectors (except for deposits of the central government). Monetary aggregate QM is defined in the same way as the corresponding item in the Monetary Survey (Table 5). It consists of other deposits in domestic currency, transferable and other deposits in a foreign currency of all domestic sectors (except for deposits of the central government). Money supply M2 comprises monetary aggregates, M1 and QM.

Notes:

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports and in accordance with the recommendations of the IMF Manual and Guidelines for the 2016 compilation of monetary and financial statistics.

Monetary data updated according to the MMF methodology (Monetary and Financial Statistics Manual, 2000), from January 2006.

The Monetary Survey presents the consolidated data from the Balance Sheet of CBBH - monetary authorities (Table 6) and the Consolidated Balance Sheet of Commercial Banks of Bosnia and Herzegovina (Table 7). Foreign assets (net) represent the difference between total foreign assets of the CBBH - monetary authorities and commercial banks of BH and total foreign liabilities of the CBBH - monetary authorities and commercial banks of BH. Domestic loans represent commercial banks' claims on all domestic sectors, but it should be noted that claims on central government are presented in net amounts, i.e. they are reduced by the deposits of central government with the CBBH and with BH commercial banks. The central government consists of BH Institutions, Entity governments, Entity Social Security Funds and those of Brčko District. According to new methodology, Social Security Funds are classified on the central government level as Entities' off-budget funds, which has a direct impact on the data about net claims on the central government in Monetary Survey.

Notes:

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports and in accordance with the recommendations of the IMF Manual and Guidelines for the 2016 compilation of monetary and financial statistics.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Money M1 comprises currency outside banks, transferable deposits in the domestic currency of all domestic sectors (except for deposits of central government). Quasi money QM comprises other deposits in the domestic currency, transferable and other deposits in foreign currency of all domestic sectors (except for deposits of the central government). Money supply M2 comprises monetary aggregates, money M1 and quasi money QM. Other liabilities include securities, loans, shares and other equity and other items (net). According to a new methodology, loans are presented as separate financial instruments on the side of liabilities (with which the calculated interest is added), and also shares and other equity. Other items (net) are unallocated items of liabilities reduced by the unallocated items of assets. Other items (net) also comprise restricted deposits, counter-items of funds and government lending funds.

Note:

Monetary data updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000), from January 2006.

The CBBH (monetary authorities) foreign assets comprise gold, foreign currency in the CBBH vault, foreign currency deposits with foreign banks, SDR holdings, foreign securities and other. Claims on domestic sectors consist of claims on employees of the CBBH for the extended long-term loans and claims on commercial banks on the basis of settlement accounts.

Reserve money (primary money or monetary base) is comprised of cash outside monetary authorities, deposits of commercial banks and deposits of other domestic sectors (except for the central government) with monetary authorities. Cash outside banks represents cash in circulation outside the Central Bank (monetary authorities) and cash outside commercial banks.

The CBBH foreign liabilities are comprised of short-term liabilities towards non-residents, deposits of non-residents and other short-term liabilities towards non-residents and liabilities towards the IMF (Accounts 1 and 2).

Deposits of central government with the CBBH are transferable and other deposits of BH Institutions, Entity Governments, Entity Social Security Funds and those of Brčko District in the local currency. Shares and other equity comprise the equity, current year result, general and special reserves and adjustment/revaluation. Other items (net) are unallocated items of liabilities reduced by the unallocated items of assets.

Notes:

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports and in accordance with the recommendations of the IMF Manual and Guidelines for the 2016 compilation of monetary and financial statistics.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Consolidated balance sheet of commercial banks includes consolidated balance sheets of commercial banks covered by Main Unit Sarajevo, Main Unit Mostar and Main Bank of Republika Srpska CBBH and it represents consolidation of mutual claims and liabilities among the commercial banks. Banks' reserves consist of cash in the banks' vaults and banks' deposits with the Central Bank of Bosnia and Herzegovina. Foreign assets of commercial banks include: foreign currency in the vaults, transferable and other deposits with non-residents in foreign currency, loans to non-residents, securities of non-residents in foreign currency, and other claims on non-residents.

Claims on general government include claims on all levels of government: the central government (BH Institutions, Entity governments, Entity social security funds and Brčko District) and non-central governments (canton and municipality governments). Claims on other domestic sectors include claims on public non-financial enterprises, private non-financial enterprises, other financial institutions and claims on other domestic sectors (households, non-profit institutions and other unclassified sectors).

Notes:

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports and in accordance with the recommendations of the IMF Manual and Guidelines for the 2016 compilation of monetary and financial statistics.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Central government deposits include transferable and other deposits in domestic and foreign currency of BH Institutions, Entity governments, Entity social security funds and those of Brčko District. Transferable and other deposits of other domestic sectors in domestic and foreign currency represent banks liabilities towards non-central government (canton and municipality governments), public non-financial enterprises, private non-financial enterprises, other financial institutions and other domestic sectors (households, non-profit institutions and other unclassified sectors). Foreign liabilities of commercial banks include banks liabilities to non-residents based on transferable and other deposits, loans, securities, trade loans and advance payments and other accounts payable. According to a new methodology, loans are presented as a separate financial instrument on the side of liabilities, with which the calculated interest is added.

Shares and other equity include equity, retained earnings, current year result, general and special reserves and adjustment / revaluation. Other items (net) are unallocated items of liabilities reduced by the unallocated items of assets. Restricted deposits are also included in other items (net).

Notes:

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Total deposits represent liabilities of commercial banks of BH towards all domestic institutional sectors in domestic and foreign currency. Total loans represent claims of commercial banks of BH on all institutional sectors, in domestic and foreign currency.

Notes:

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

By order of FBA in March 2010, loans to households with currency clause with one bank were reclassified, from loans in EUR to loans in KM.

Notes:

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Deposits of domestic institutional sectors represent liabilities of commercial banks towards all institutional sectors. Deposits on the BH level represent deposits with commercial banks covered by Main Unit Sarajevo, Main Unit Mostar and Main Bank of Republika Srpska CBBH Banja Luka. Sight deposits represent liabilities of commercial banks related to transaction accounts and sight deposits in domestic and foreign currency.

Notes:

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Loans to domestic institutional sectors represent claims of commercial banks on all institutional sectors. Loans at the BH level include loans extended by commercial banks covered by Main Unit Sarajevo, Main Unit Mostar and Main Bank of Republika Srpska CBBH Banja Luka. The total of claims on all levels of government and funds (short-term and long-term) are shown in Table of short-term loans (columns 3,4,5,6,7) in total amount, because source data do not provide a maturity structure of claims for governments and funds. Short-term loans represent claims of commercial banks on all domestic institutional sectors up to one year, in domestic and foreign currency.

Notes:

Revised data for July 2021

Since 01 July 2017, the status change of the merger of subsidiary company UniCredit Leasing d.o.o. Sarajevo to the company Unicredit Bank d.d. Mostar has taken place. Accordingly, Unicredit Leasing d.o.o. Sarajevo has stopped existing as of 30 June 2017 and the data on the merged company are presented within the report on UniCredit Bank d.d. Mostar, starting from the report for July 2017.

* Interest rates in table for revolving loans and credit cards and their amounts refer to the outstanding amounts.

IRF – initial rate fixation

... insufficient data to be published

The interest rate on the revolving loans and credit cards, includes data on credit cards with loan facility. Considering that credit cards with loan facility imply an interest free deferred payment (0% ir), they are not published.

No data for interest rates on loans in foreign currency on the basis of credit cards and overdrafts to non-financial corporations.

Notes:

From July 1st, 2016 the required reserves rate applied by the CBBH to the base for calculation of required reserves is 10.0%.

From 1 July 2016, the CBBH applies the new rates for the calculation of fees to the funds in the banks' reserves accounts: in the accounting period, the Central Bank does not charge a fee on the amount of required reserves in commercial banks' reserves accounts, and on the amount of excess reserves, the CBBH charges the fee at the rate equal to 50.0% of the rate applied to commercial banks' deposits (deposit facility rate) by the European Central Bank. Since May 1st, 2015 the Central Bank has calculated the compensation for a bank on the amount of the bank's funds in the reserve account with the Central Bank in the calculation period, as it follows:

-on the reserve requirement amount – the average of EONIA recorded in the same period on the market reduced by 10 basis points, or minimum zero.

-on the amount of the funds exceeding the reserve requirement – zero rate of compensation.

The zero rate of compensation on the reserve requirement is applied in case the average EONIA decreased by 10 basis points has a negative value.

From September 1st, 2014 the remuneration rate has been calculated on the basis of the weighted average interest rate which was earned by the Central Bank of BH on the market in the same period on deposits invested up to a month and 70.0% is calculated on the amount of required reserve or minimum 0, while 90.0% of the mentioned rate is calculated on the amount of excess reserves or minimum 0.

From August 1st, 2011 the remuneration rate is calculated by the weighted average interest rate which were earned by the Central Bank on deposits invested up to a month in the same period. 70.0% of this rate is calculated on the amount of required reserves while 90.0% of the same rate is calculated on the amount of excess reserves.

From February 1st, 2011 the required reserves rate on deposits and borrowed assets with contracted term of maturity up to one year was declined from 14.0% to 10.0%, while the required reserves rate on deposits and borrowed assets with contracted term of maturity over one year is not changed.

From July 1st, 2010 remuneration rate on the amount of required reserves is changed and calculated as an average of interest rates, which were earned by the Central bank on overnight deposits in the same period, while remuneration rate on the amount of excess reserves is not changed.

From May 1st, 2009 the required reserves rate is 7.0% on deposits and borrowed assets with contracted term of maturity over one year.

From April 1st, 2009 remuneration rate is calculated as:

-On the amount of required reserve is 0,5%.

-On the amount of excess reserves on the rate calculated as an average of interest rates, which were earned by the Central bank on deposits invested up to one month.

From January 1st, 2009 the required reserves rate is 14.0% on deposits and borrowed assets with contracted term of maturity up to one year and 10.0% on deposits and borrowed assets with contracted term of maturity over one year.

From October 11th, 2008 required reserves rate was declined from 18.0% to 14.0%.

From January 1st, 2008 required reserves rate was increased from 15.0% to 18.0%.

*The base for calculation of required reserves includes deposits and borrowed funds in domestic (in KM and KM with the currency clause) and other currency expressed in KM.

Notes:

Criteria for presenting country is the share of export of the country in total three-year BH export (2016,2017,2018).

Thus, all countries with share higher than 3.0% are separately presented, while the other countries are presented as sum in the column Other countries.

Notes:

Criteria for presenting country is the share of import of the country in total three-year BH import (2016,2017,2018).

Thus, all countries with share higher than 3.0% are separately presented, while the other countries are presented as sum in the column Other countries
